Essentials of Evidence-Based Practice of Neuroanesthesia and Neurocritical Care Hemanshu Prabhakar, 2021-11-18 The current practice of medicine is largely moving toward applying an evidence based approach Evidence based medicine is the integration of best research evidence using systematic reviews of the medical literature and then translating it into practice by selecting treatment options for specific cases based on the best research Clinicians rely on the availability of evidence and accordingly take decisions to provide best treatment to their patients Clinical management of neurologically compromised patients is challenging and varied for this reason treating physicians including neuroanesthesiologists are always in search of best available evidence for patient management and care

Essentials of Evidence Based Practice of Neuroanesthesia and Neurocritical Care highlights the various controversies that exist in the practice of neuroanesthesia and provides conclusive evidence based solutions This comprehensive resource succinctly discusses evidence based practice of neuroanesthesia based on systematic reviews in clinical neuroscience research Topics include neurophysiology ICP or CPP thresholds neuropharmacology intravenous or inhalational anesthetics and neuromonitoring ICP monitoring Evidence based practice is now an integral part of neuroscience and this book will help residents and trainees gain knowledge to apply it to their practice

Endorsements Reviews Evidence based practice is facilitating changes at a rapid pace in neuroanesthesia and neurocritical care practice Its practice is exceedingly crucial in neuroanesthesia and neurocritical care considering the criticality of the neurologically sick patients which leaves little or no room for error for an acceptable outcome in them Patient management in Neuroanesthesia and neurocritical care has many contentious issues because of rapidly evolving changes in their management which require treatment guided by the latest available evidence in literature Dr Hemanshu Prabhakar is a strong proponent of evidence based practice for the management of neurologically ill patients both for

surgical procedures and their management in neurointensive care unit Undoubtedly this book will be of enormous benefits to the students as well as teachers of neuroanesthesia and neurocritical care sub specialties Parmod Bithal Editor In Chief Journal of Neuroanaesthesiology and Critical Care JNACC Highlights the various controversies that exist in the practice of neuroanesthesia and provides conclusive evidence based solutions Topics include neurophysiology ICP or CPP thresholds neuropharmacology intravenous or inhalational anesthetics and neuromonitoring ICP monitoring Provides residents and trainees with the knowledge to apply evidence based practice of neuroanesthesia to their practice **Intraoperative Neurophysiologic Monitoring in Neurosurgery** Johannes Schramm,Aage R. Møller,2012-12-06 A state of the art presentation of intraoperative neuro physiologic monitoring by specialists from well known international medical centers
