Manual Of Strabismus Surgery:

Manual of Strabismus Surgery Caroline J. MacEwen, Richard Gregson, 2003 The first section covers the general assessment and investigation of the squinting patient before considering whether surgery is the best form of treatment The second section addresses common squint disorders describing the conditions and highlighting the surgical options to be considered The final section provides a step by step account of the surgical procedures indicating when they should be used and illustrating specific techniques This is an essential manual for trainees in clinical practice and those preparing for examinations who need to know how to competently manage this commonly encountered disorder Optometrists will also find it of great value when managing these patients both pre and post operatively Using a problem oriented approach diagnosis and assessment of conditions are introduced before addressing treatment options Specific disorders are covered in detail indicating when to use surgical treatment and which techniques to use The surgical procedures are covered in a step by step format with clear line diagrams highlighting the required techniques A separate chapter covers general and specific surgical complications

phenomenon of metagnosis the experience of learning in adulthood of a longstanding condition It can occur when the condition has remained undetected e g colorblindness and or when the diagnostic categories themselves have shifted e g ADHD More broadly it can occur with unexpected revelations bearing upon selfhood such as surprising genetic test results Though this phenomenon has received relatively scant attention learning of an unknown condition is often a significant and bewildering revelation one that subverts narrative expectations and customary categories How do we understand these revelations In addressing this topic Danielle Spencer approaches narrative medicine as a robust research methodology comprising interdisciplinarity narrative attentiveness and the creation of writerly texts Beginning with Spencer s own experience the book explores the issues raised by metagnosis from communicability to narrative intelligibility to different ways of seeing Next it traces the distinctive metagnostic narrative arc through the stages of recognition subversion and renegotiation discussing this trajectory in light of a range of metagnostic experiences from Blade Runner to real world mid life diagnoses Finally it situates metagnosis in relation to genetic revelations and the broader discourses concerning identity Spencer proposes that better understanding metagnosis will not simply aid those directly affected but will serve as a bellwether for how we will all navigate advancing biomedical and genomic knowledge and how we may fruitfully interrogate the very notion of identity Ocular Therapeutics Handbook Bruce E.
