**The Logic of Compromise in Mexico** Gladys I. McCormick,2016-02-10 In this political history of twentieth century Mexico Gladys McCormick argues that the key to understanding the immense power of the long ruling Partido Revolucionario Institucional PRI is to be found in the countryside Using newly available sources including declassified secret police files and oral histories McCormick looks at large scale sugar cooperatives in Morelos and Puebla two major agricultural regions that serve as microcosms of events across the nation She argues that Mexico s rural peoples despite

shouldering much of the financial burden of modernization policies formed the PRI regime's most fervent base of support. McCormick demonstrates how the PRI exploited this support using key parts of the countryside to test and refine instruments of control including the regulation of protest, manipulation of collective memories of rural communities, and selective application of violence against critics that it later employed in other areas both rural and urban. With three peasant leaders, brothers named Rubén Porfirio and Antonio Jaramillo at the heart of her story, McCormick draws a capacious picture of peasant activism, disillusion, and compromise in state formation, revealing the basis for an enduring political culture dominated by the PRI. On a broader level, McCormick demonstrates the connections among modern state building in Latin America, the consolidation of new forms of authoritarian rule, and the deployment of violence on all sides.
