**Spiritual Dimensions of Advanced Practice Nursing** Melanie Rogers,2021-10-15 This book recognises the challenges associated with the concept of spirituality An awareness of this concept is integral to the provision of person centred holistic care However APNs ability to provide spiritual care is often impeded by time pressures and the prioritisation of clinical tasks

Confusion about the meaning of spirituality and its relationship to religion compound the challenges involved in providing spiritual care leaving APNs feeling ill equipped to address this area of care. Indeed many APNs view spirituality as synonymous with religion. This book provides clarity with the assumption that spirituality is innate to all of our patients and is related to what gives them hope meaning and purpose. Fundamentally it is about being human. APNs ability to practice with kindness compassion and empathy will naturally resonate with spiritually competent practice. It begins with an outline of the definitions of spirituality in addition to the concept of spiritually competent practice. An emphasis on the importance of personal development follows. Case studies from countries across the globe illustrate the benefit of integrating spirituality and provide evidence of the importance and relevance of integrating spirituality into practice. These include discussion and presentations of the related concepts of availability and vulnerability which will give APNs more confidence and competence to integrate spirituality into practice. This book is relevant for APNs students educators and researchers.

*Family Medicine* A.K. David, T.A.Jr. Johnson, D.M. Phillips, J.E. Scherger, Robert B. Taylor, 2013-06-29. Much is new in Family Medicine since the last edition of our textbook. For example not only is the therapy of human immunodeficiency virus HIV disease and the acquired immunodeficiency syndrome AIDS much different than a few years ago the epidemiology of the disease has also changed and more than half of the family physicians in a rural state such as Oregon have already managed patients with HIV disease or AIDS. 1 There are new immunization recommendations for children and new antibiotics for the treatment of bacterial infections. Computers are bringing medical informatics and on line consultation into office practice. Medicare physician payment reform is underway and the reality of rationing medical care has been recognized. There has been a recent increase in student interest in a family practice career. 2 coincidental with a Council on Graduate Medical Education COGME recommendation that at least 50 percent of all residency graduates 3 should enter practice as generalists. Also there is increasing awareness of the need for a 4 Center for Family Practice and Primary Care at the National Institutes of Health. This all new fourth edition is intended to present the scientific and practical basis of family medicine with special attention to what's new in family medicine. The emphasis is on how the physician provides continuing and comprehensive care for persons of all ages with clinical content selected from the perspective of family physicians. The format of the book like the practice of family medicine continues to change.
