theory this book explores how international law changes through means other than treaty making Highlighting the social dynamics through which different areas and institutional contexts have generated their own pathways it presents a theoretical framework for tracing change processes and the conditions that affect their success Based on this framework each contribution illuminates the paths of change we observe in contemporary international law The explorations centre on strategies forms forces and social contexts and draw on primary source material and in depth case studies Overall the volume offers a fascinating account of an international legal order in flux with a dynamic not captured through traditional doctrinal lenses and helps situate change processes and their varied implications in international law and politics A relevant book for everyone wanting to understand change and its consequences in international law This is an open access title It is made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 International licence It is available to read and download as a PDF version on the Oxford Academic platform

Bottlenecks Joseph Fishkin, 2014-01-10 Equal opportunity is a powerful idea and one with extremely broad appeal in contemporary politics political theory and law But what does it mean On close examination the most attractive existing conceptions of equal opportunity turn out to be impossible to achieve in practice or even in theory As long as families are free to raise their children differently no two people s opportunities will be equal nor is it possible to disentangle someone s abilities or talents from her background advantages and disadvantages Moreover given different abilities and disabilities different people need different opportunities confounding most ways of imagining what counts as equal This book proposes an entirely new way of thinking about the project of equal opportunity Instead of focusing on the chimera of literal equalization we ought to work to broaden the range of opportunities open to people at every stage in life We can achieve this in part by loosening the bottlenecks that constrain access to opportunities the narrow places through which people must pass in order to pursue many life paths that open out on the other side A bottleneck might be a test like the SAT a credential requirement like a college degree or a skill like speaking English It might be membership in a favored caste or racial group Bottlenecks are part of the opportunity structure of every society But their severity varies By loosening them we can build a more open and pluralistic opportunity structure in which people have more of a chance throughout their lives to pursue paths they choose

for themselves rather than those dictated by limited opportunities This book develops this idea and other elements of opportunity pluralism then applies this approach to several contemporary egalitarian policy problems class and access to education workplace flexibility and work family conflict and antidiscrimination law *The Neurotic Personality* R G Gordon, 2013-11-05 This is Volume VIII of nineteen in a collection of Abnormal and Clinical Psychology Originally published in 1927 this book discusses the idea that to treat the neurotic we must understand him and try to discover why his personality differs from the normal and that we must answer the questions why a patient breaks down at all why one person breaks down in one way and another shows a different group of symptoms and when he has broken down what is likely to happen to him

The Path of Least Resistance for Managers Robert Fritz, 1999 Explains the structural causes of success and failure and how to redesign the organization or team for success **The Frames We Live By** Yeong Hwan Choi, 2024-08-19 The Frames We Live By Breaking Free from Others Narratives The World's Frames Crafting Your Own Philosophy We live in a world governed by countless frameworks From early on society instills norms and expectations that shape our lives whether it's through school culture or modern debates But life isn't so simple it's unpredictable often feeling like a roll of the dice Maybe luck of the draw is a more accurate phrase With uncertainty everywhere our thoughts are easily swayed by external forces and rapidly shifting trends Consider this The universe has been expanding for roughly 13.8 billion years but our lives even in this modern age where living to 100 is possible are still just fleeting moments Yet within this vastness we must carve out our own space building frameworks that are truly ours Despite the chaos we need to discover how to embrace our unique perspectives and construct our personal philosophies Philosophy isn't just abstract thought it's practical wisdom for dealing with everyday life It's about defining our values and goals deciding how to live Writing is a way to connect with others I've written this book from the unique perspective of my own frame and as you read you may find moments that resonate with your own experiences or challenge them If so congratulations you've started building your own frame In a world where life's paths seem pre-determined it's vital to break free and embark on a journey of crafting your philosophy Only then can we find true freedom
