The Sugar Season Douglas Whynott, 2014-03-04. A year in the life of one New England family as they work to preserve an ancient, lucrative and threatened agricultural art: the sweetest harvest, maple syrup. How has one of America's oldest agricultural crafts evolved from a quaint enterprise with sugar parties and the delicacy sugar on snow to a modern industry? At a sugarhouse owned by maple syrup entrepreneur Bruce Bascom, 80,000 gallons of sap are processed daily during winter's end. In *The Sugar Season*, Douglas Whynott follows Bascom through one tumultuous season, taking us deep into the sugarbush where sunlight and sap are intimately related and the sound of the taps gives the woods a rhythm and a ring. Along the way, he reveals the inner workings of the multimillion-dollar maple sugar industry. Make no mistake, it's big business, complete with a Maple Hall of Fame, a black market, a major syrup heist monitored by Homeland Security, a Canadian organization called The Federation and a Global Strategic Reserve that's comparable to OPEC, fitting since a barrel of maple syrup is worth more than a barrel of oil. Whynott brings us to sugarhouses where we learn the myriad subtle flavors of syrup and how it's assigned a grade. He examines the unusual biology of the maple tree that makes syrup possible and explores the maples and the industry's chances for survival, highlighting a hot button issue: how global warming is threatening our food supply. Experts predict that by the end of this century, maple syrup production in the United States may suffer a drastic decline. As buckets and wooden spouts give way to vacuum pumps and tubing, we see that even the best technology can't overcome warm nights in the middle of a season and that only determined men like Bascom can continue to make a sweet life out of rugged land.
