Harvey, 1996 The Mappa Mundi arguably the most famous of all medieval world maps is now displayed in Hereford Cathedral This book was commissioned to mark the map's display in a newly built museum and the map is here seen in context with other detailed maps of the 12th to the 14th centuries at that period these were a peculiarly English genre on which recent discoveries have thrown new light The map's origins are examined as well as the sources for its geographical outlines and for the wealth of information it provides This account intended for a general audience is of one of the most revealing artefacts surviving from the 13th century The book includes new photography of the map itself

Mappae mundi Konrad Miller, 1895 **The Cambridge History of American Literature: Volume 1, 1590-1820** Sacvan Bercovitch, Cyrus R. K. Patell, 1997-01-28 Volume I of The Cambridge History of American Literature was originally published in 1997 and covers the colonial and early national periods and discusses the work of a diverse assemblage of authors from Renaissance explorers and Puritan theocrats to Revolutionary pamphleteers and poets and novelists of the new republic Addressing those characteristics that render the texts distinctively American while placing the literature in an international perspective the contributors offer a compelling new evaluation of both the literary importance of early American history and the historical value of early American literature **Logistics of Warfare in the Age of the Crusades** John H. Pryor, 2006 How were the Crusades made possible This volume is the first to bring together experts from the fields of medieval Western Byzantine and Middle Eastern studies specifically to address the logistics of Crusading It deals with questions of manpower types and means of transportation by land and sea supplies financial resources roads and natural land routes sea lanes and natural sailing routes Of particular importance is the attention given to the horses and other animals on which transport of supplies and the movement of armies depended **Angels on the Edge of the World** Kathy Lavezzo, 2006 In a view that sweeps from the tenth century to the mid 16th century this text shows how the English people's concern with their island's relative isolation on the global map contributed to the emergence of a distinctive English national consciousness in which marginality came to be seen as a virtue **The Hereford Mappa Mundi** Gabriel Alington, 1996 The Hereford World Map P. D. A. Harvey, 2006 The famous Hereford world map the Mappa Mundi dates from around 1300 and was painted on one skin of calf parchment In setting the Hereford world map in context Harvey and

his 24 collaborators introduce us to medieval ideas of the world and man's place in it **Library of Congress Subject Headings** Library of Congress, 2011 **The Cartographic Imagination in Early Modern England** D.K.

Smith, 2016-04-01 Working from a cultural studies perspective author D K Smith here examines a broad range of medieval and Renaissance maps and literary texts to explore the effects of geography on Tudor Stuart cultural perceptions. He argues that the literary representation of cartographically related material from the late fifteenth to the early seventeenth century demonstrates a new strain not just of geographical understanding but of cartographic manipulation which he terms the cartographic imagination. Rather than considering the effects of maps themselves on early modern epistemologies, Smith considers the effects of the activity of mapping, the new techniques, the new expectations of accuracy and precision which developed in the sixteenth century on the ways people thought and wrote. Looking at works by Spenser, Marlowe, Raleigh, and Marvell among other authors, he analyzes how the growing ability to represent physical space accurately brought with it not just a wealth of new maps but a new array of rhetorical techniques, metaphors, and associations which allowed the manipulation of texts and ideas in ways never before possible. Picturing Experience in the Early Printed Book Elizabeth

Ross, 2015-06-10 Bernhard von Breydenbach's *Peregrinatio in terram sanctam* (Journey to the Holy Land), first published in 1486, is one of the seminal books of early printing and is especially renowned for the originality of its woodcuts. In *Picturing Experience in the Early Printed Book*, Elizabeth Ross considers the *Peregrinatio* from a variety of perspectives to explain its value for the cultural history of the period. Breydenbach, a high-ranking cleric in Mainz, recruited the painter Erhard Reuwich of Utrecht for a religious and artistic adventure in a political hot spot: a pilgrimage to research the people, places, plants, and animals of the Levant. The book they published after their return ambitiously engaged with the potential of the new print medium to give an account of their experience. The *Peregrinatio* also aspired to rouse readers to a new crusade against Islam by depicting a contest in the Mediterranean between the Christian bastion of the city of Venice and the region's Muslim empires. This crusading rhetoric fit neatly with the state of the printing industry in Mainz, which largely subsisted as a tool for bishops' consolidation of authority, including selling the pope's plans to combat the Ottoman Empire. Taking an artist on such an enterprise was unprecedented. Reuwich set a new benchmark for technical achievement with his woodcuts, notably a panorama of Venice that folds out to 162 meters in length and a foldout map that stretches from Damascus to Sudan around the first topographically accurate view of Jerusalem. The conception and execution of the *Peregrinatio* show how and why early printed books constructed new means of visual representation from existing ones and how the form of a printed book emerged out of the interaction of eyewitness experience and medieval scholarship, real travel and spiritual pilgrimage, curiosity and fixed belief, texts and images. **Trading Territories** Jerry Brotton, 2020-06-30 In this generously illustrated

book, Jerry Brotton documents the dramatic changes in the nature of geographical representation which took place during the sixteenth century, explaining how much they convey about the transformation of European culture at the end of the early

modern era He examines the age's fascination with maps charts and globes as both texts and artifacts that provided their owners with a promise of gain be it intellectual political or financial From the Middle Ages through most of the sixteenth century Brotton argues mapmakers deliberately exploited the partial often conflicting accounts of geographically distant territories to create imaginary worlds As long as the lands remained inaccessible these maps and globes were politically compelling They bolstered the authority of the imperial patrons who employed the geographers and integrated their creations into ever more grandiose rhetorics of expansion As the century progressed however geographers increasingly owed allegiance to the administrators of vast joint stock companies that sought to exploit faraway lands and required the systematic mapping of commercially strategic territories By the beginning of the seventeenth century maps had begun to serve instead as scientific guides defining objectively valid images of the world

Michelet, 2006-06-08 Creation Migration and Conquest Imaginary Geography and Sense of Space in Old English Literature explores the Anglo Saxons spatial imaginaire tracing its political literary and intellectual backgrounds and analysing how this imaginaire shapes perceptions and representations of geographical space The book elaborates new interpretative paradigms drawing on the work of continental scholars and literary critics and on complementing interdisciplinary scholarship of medieval imaginary spaces and their representations It gathers evidence from both Old English verse and historico geographical documents and focuses on the juncture between traditional scientific learning and the symbolic values attributed to space and orientation Combining close reading with an original theoretical model Creation Migration and Conquest offers innovative interpretations of celebrated texts and highlights the links between place identity and collective identity

Geographical Aesthetics

Elizabeth Straughan, 2016-03-03 Geographical Aesthetics places the terms aesthetics and geography under critical question together responding both to the increasing calls from within geography to develop a geographical aesthetics and a resurgence of interdisciplinary interest in conceptual and empirical questions around geoaesthetics environmental aesthetics as well as the spatialities of the aesthetic Despite taking up an identifiable role within the geographical imagination and sensibilities for centuries and having what is arguably a key place in the making of the modern discipline aesthetics remains a relatively under theorized field within geography Across 15 chapters Geographical Aesthetics brings together timely commentaries by international interdisciplinary scholars to rework historical relations between geography and aesthetics and reconsider how it is we might understand aesthetics In renewing aesthetics as a site of investigation but also an analytic object through which we can think about worldly encounters
