R. Zohdy, Robert J. Bisdorf, 1991 Science Software ,1988 Science Perspectives for 3D Spectroscopy Markus Kissler-Patig, Jeremy Walsh, Martin M. Roth, 2007-12-03 You will hold in your hands the proceedings of the last conference ever on integral eld spectroscopy So the daring statement that we organizers made at the end of an extremely interesting and busy week of conference in October 2005 Indeed the quality and diversity of the contributions in this book indicated that integral eld spectroscopy had evolved into a mature technique Future books would not be dedicated to the technique as such but to the science achieved with 3D spectroscopy that is a dedicated book after this one

assembling science results across so many fields is unlikely to appear again or have you seen a proceeding dedicated to long lit spectroscopy recently In a sense this is very encouraging The idea of this conference was an offspring of the Research and Training Network RTN Euro3D sponsored by the European Commission The goal of this network was to promote integral field spectroscopy from an technique for experts to a common user utility for astronomical research When we first talked about this conference the VLT for example was not yet equipped with any integral field spectrograph We were wondering whether anyone would actually attend the conference in 4 years time and would have anything to report upon We were rewarded for our optimism and very positively surprised about the progress made in the years after that A progress of course driven by the advent of so many integral field spectrographs around the world installed on 4m to 8 10m class telescopes Many of these instruments are referred to in the present book Yet this is explicitly not a book dedicated to technical issues but focusing on the science Thus the name of the conference Science Perspectives for 3D Spectroscopy

Publications of the Geological Survey Geological Survey (U.S.), 1993 *Monarchs, Ministers, and Maps* David Buisseret, 1992-12-15 These diverse essays investigate political factors behind the rapid development of cartography in Renaissance Europe and its impact on emerging European nations By 1500 a few rulers had already discovered that better knowledge of their lands would strengthen their control over them by 1550 the cartographer's art had become an important instrument for bringing territories under the control of centralized government Throughout the following century increasing governmental reliance on maps demanded greater accuracy and more sophisticated techniques This volume a detailed survey of the political uses of cartography between 1400 and 1700 in Europe answers these questions When did monarchs and ministers begin to perceive that maps could be useful in government For what purposes were maps commissioned How accurate and useful were they How did cartographic knowledge strengthen the hand of government By focusing on particular places and periods in early modern Europe the chapters offer new insights into the growth of cartography as a science the impetus behind these developments often rulers attempting to expand their power and the role of mapmaking in European history The essay on Poland reveals that cartographic progress came only under the impetus of powerful rulers another

explores the French monarchy's role in the burst of scientific cartography that marked the opening of the splendid century. Additional chapters discuss the profound influence of cartographic ideas on the English aristocracy during the sixteenth century, the relation of progress in mapmaking to imperialistic goals of the Spanish and Austrian Habsburgs, and the supposed primacy of Italian mapmaking following the Renaissance. Contributors to this volume are Peter Barber, David Buisseret, John Marino, Michael J. Mikos, Geoffrey Parker, and James Vann. The Maps of Memory Marjorie Agosin, 2020-09-22. In this captivating and exquisite Kirkus Reviews starred review sequel to the Pura Belpr Award-winning *I Lived on Butterfly Hill*, thirteen-year-old Celeste Marconi returns home to Chile and, after the dictator is removed, makes it her mission to rebuild her community and find those who are still missing. During Celeste Marconi's time in Maine, thoughts of the brightly colored cafes and salty air of Valparaíso, Chile, carried her through difficult homesick days. Now she's finally returned home to find the horrible years of the dictatorship have left their mark on her once beautiful and vibrant community. Determined to help her beloved Butterfly Hill, she encourages and joins her neighbors in fighting to regain what they've lost. But more than anything, Celeste wishes she could find her best friend Lucilla, who was one of thousands of people who disappeared during the dictatorship and who hasn't been heard from in over a year. She joins protests for information, but the trail seems cold until she receives a letter that changes everything. This sets Celeste off on her biggest adventure yet, where she'll uncover more heartbreaking truths of what her country has endured. But every small victory makes a difference, and even if Butterfly Hill can never be what it was, moving forward and healing can make it something even better.

The World Map, 1300-1492 Evelyn Edson, 2007-05-30. In the two centuries before Columbus, mapmaking was transformed. *The World Map, 1300-1492* investigates this important transitional period of mapmaking. Beginning with a 1436 atlas of ten maps produced by Venetian Andrea Bianco, Evelyn Edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps. She finds that both the makers and users of maps struggled with changes brought about by technological innovation: the compass, quadrant, and astrolabe; rediscovery of classical mapmaking approaches; and increased travel. To reconcile the tensions between the conservative and progressive
