Maps and Politics Jeremy Black,2000-09-01 We all rely on the apparent accuracy and objectivity of maps but often do not see the very process of mapping as political Are the power and purpose of maps inherently political Maps and Politics addresses this important question and seeks to emphasize that the apparent objectivity of the map making and map using process cannot be divorced from aspects of the politics of representation Maps have played and continue to play a major role in both international and domestic politics They show how visual geographical representations can be made to reflect and advance political agendas in powerful ways The major developments in this field over the last century are responses both to cartographic progression and to a greater emphasis on graphic imagery in societies affected by politicization democratization and consumer and cultural shifts Jeremy Black asks whether bias free cartography is possible and demonstrates that maps are not straightforward visual texts but contain political and politicizing subtexts that need to be read with care

Masons, Tricksters and Cartographers David Turnbull,2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys
