Marble Skin Slavenka Drakulić, 1995      *Facing the Colours of Roman Portraiture* Amalie Skovmøller, 2020-09-07 The fact that most ancient marble portraits were once intentionally polychrome has always been lurking at the corners of art historical and archaeological research Despite the fact that the colours of the sculpted forms completed enhanced and even extended the plastic shapes the topic has not been devoted much dedicated attention This book represents the first full length academic monograph which explores the original polychromy of Roman white marble portraiture It presents results from scientific analysis of portraits in statuary and bust formats dating to the first three centuries CE The book also explores the cultural and social significance of colours in their original contexts and how the immaterial affects of the polychrome three dimensional images can be integrated into the traditional research into ancient portraiture which has tended to place overwhelming emphasis on iconography typology and biography By doing so the ancient sculpted marble form as we know it will be exposed and confronted and the impact of manipulated material effects that were meant to evoke a broad range of multisensory experiences will be emphasized The book puts forth a new way of analysis to be tested and developed in the future

**Translucent Building Skins** Scott Murray, 2013-05-07 Exploring the design of innovative building enclosure systems or skins in contemporary architecture and their precedents in earlier twentieth century modern architecture this book examines the tectonics the history and the influence of translucency as a defining characteristic in architecture Highly illustrated throughout with drawings and full colour photographs the book shows that translucency has been and continues to be a fertile ground for architectural experimentation Each chapter presents a comparative analysis of two primary buildings a recent project paired with a historical precedent highlighting how architects in different eras have realized the distinctive effects of translucency The included buildings span a variety of program types ranging from a single family residence to a factory to a synagogue Whether it is Pierre Chareau s glass lens curtain wall at the Maison de Verre Frank Lloyd Wright s wall of stacked glass tubes at the Johnson Wax Research Tower or Peter Zumthor s use of acid etched glass in a double skin envelope at the Kunsthhaus Bregenz the included projects each offer an exemplary case study of innovations in materiality and fabrication techniques Today among many contemporary architects there is an engagement with new technologies new material assemblies and new priorities such as sustainability and energy efficiency A resurgent interest in translucency as a defining quality in buildings has been an important part of this recent dialogue and this book makes essential reading for any architect looking to incorporate aspects of translucency into their buildings

*Marble Statuettes of the Roman Period* Brian Martens, 2025-07-18 The excavations of the Athenian Agora have played a major role in bringing to light the rich sculptural legacy of ancient Athens The project s storerooms boast one of the most important bodies of sculpture from classical antiquity covering the complete range and history of output in a storied center of artistic production This volume presents for the first time the marble statuettes and statuette fragments carved between the 1st century BCE

and the 4th century CE that have been excavated from the Agora since 1931. Comprising one in six figural sculptures found at the site, these works are testament to a thriving demand for small divine images in Roman period Greece that has been insufficiently recognized until now. Among these broken and battered figures are the portraits of polytheistic Athens, naked Aphrodite at her bath, winged Eros assisting his mother, tired Herakles after a labor, teenage Artemis aiming her bow, attentive Asklepios dispatching cures. The author marshals a detailed and heavily illustrated catalogue of 672 objects to offer new data to the study of Greek iconography and sculptural production. Taken as a collective whole, the statuettes document the vibrant religion, society and art of Athens and beyond. TheDadLab Sergei Urban, 2019-05-14. Bodies in the Bog and the Archaeological Imagination Karin Sanders, 2009-12 Over the past few centuries northern Europe's bogs have yielded mummified men women and children who were deposited there as sacrifices in the early Iron Age and kept startlingly intact by the chemical properties of peat In this remarkable account of their modern afterlives Karin Sanders argues that the discovery of bog bodies began an extraordinary and ongoing cultural journey Throughout the nineteenth and twentieth centuries Sanders shows these eerily preserved remains came alive in art and science as material metaphors for such concepts as trauma nostalgia and identity Sigmund Freud Joseph Beuys Seamus Heaney and other major figures have used them to reconsider fundamental philosophical literary aesthetic and scientific concerns Exploring this intellectual spectrum Sanders contends that the power of bog bodies to provoke such a wide range of responses is rooted in their unique status as both archeological artifacts and human beings They emerge as corporeal time capsules that transcend archaeology to challenge our assumptions about what we can know about the past By restoring them to the roster of cultural phenomena that force us to confront our ethical and aesthetic boundaries Bodies in the Bog excavates anew the question of what it means to be human
