spas for asthma now rose in social status and became associated with the upper classes and the literati For Marcel Proust and Charles Dickens asthma shaped their lives and their creativity From early in the 20th century the idea of asthma as an allergic disease became established and the search for environmental causes was on Hay fever was closely linked and pharmaceutical companies began to make antihistamines anti inflammatories and bronchodilators Asthma sufferers were warned to beware of pets simplify their furnishings and take holidays by the sea far from pollens But a newly emerging concept was that attacks could be triggered by stress and psychological factors With musicians such as Schoenberg and Berg as celebrity sufferers the idea of asthma as an lite disease persisted In recent years attitudes have changed again as incidences of asthma grew dramatically across the world especially among the young The disease has now become closely linked to modern lifestyles and the many products of civilization The battle against house dust mites began and whole new lines of anti allergenic products and foods were launched asthma has proved highly lucrative over the years But the disease has remained fashionable even becoming the theme of several pop songs Asthma the biography is part of the Oxford series Biographies of Diseases edited by William and Helen Bynum In each individual volume an expert historian of medicine tells the story of a particular disease or condition throughout history not only in terms of growing medical understanding of its nature and cure but also shifting social and cultural attitudes and changes in the meaning of the name of the disease itself
