Ana Fred,Terry Caelli,Robert P.W. Duin,Aurélio Campilho,Dick de Ridder,2004-10-29 This volume contains all papers presented at SSPR 2004 and SPR 2004 hosted by the Instituto de Telecomunicac oes Instituto Superior T ecnico Lisbon Portugal August 18 20 2004 This was the fourth time that the two workshops were held back to back The SSPR was the tenth International Workshop on Structural and Synt ic Pattern Recognition and the SPR was the fth International Workshop on Statistical Techniques in Pattern Recognition These workshops have traditi ally been held in conjunction with ICPR International Conference on Pattern Recognition and are the major events for technical committees TC2 and TC1

respectively of the International Association for Pattern Recognition IAPR. The workshops were closely coordinated being held in parallel with plenary talks and a common session on hybrid systems. This was an attempt to resolve the dilemma of how to deal with the need for narrow focus specialized workshops yet accommodate the presentation of new theories and techniques that blur the distinction between the statistical and the structural approaches. A total of 219 papers were received from many countries with the submission and reviewing processes being carried out separately for each workshop. A total of 59 papers were accepted for oral presentation and 64 for posters. In addition four invited speakers presented informative talks and overviews of their research. They were Alberto Sanfeliu from the Technical University of Catalonia Spain, Marco Gori from the University of Siena Italy, Nello Cristianini from the University of California USA and Erkki Oja from Helsinki University of Technology Finland winner of the 2004 Pierre Devijver Award.

**Perspectives on the Introductory Phase of Empirical Research Articles** (Kathy) Ling Lin, 2019-10-22. Combining English for Specific Purposes (ESP) genre based analysis, corpus based language studies and semi structured interviews, this book represents the first multi faceted project on the macro structure of empirical research articles (ERAs) from both synchronic and diachronic perspectives and on the I LR patterned introductory phase comprising two introductory sections i.e. the Introduction and the Literature Review in ERAs drawn from civil engineering and applied linguistics journals regarding their rhetorical organization, use of citation and structural and functional links and variations. The project comprises three logically interconnected studies using a multi perspective: the cross disciplinary cross generic emic and published advice vs actual expert practices perspectives approach. It will make a significant contribution to our understanding of the genre evolution, rhetorical organization and citation features of ERAs, enrich English for Academic Purposes (EAP) theories and facilitate the development of EAP pedagogy and materials.
