Mathematics Education For A Changing World:

Mathematics Education for a Changing World Stephen S. Willoughby, 1990 A discussion of mathematics curriculum and teaching methods based on the standards issued by the National Council of Teachers of Mathematics NCTM and National Council of Supervisors of Mathematics NCSM is presented The standards emphasize the connectedness of each of the branches of mathematics and underline the relationship of each branch to science and technology The standards also propose teaching estimation graphing statistics and probability at earlier stages than is now common This text turns these new standards into a practical reality for teachers and administrators Chapters include 1 Why Change 2 Recent Recommendations of Professional Groups 3 Implementing Recommendations 4 Problem Solving 5 Technological Developments 6 Connections and 7 Fostering Change KR

Equity in Mathematics Education Constantinos Xenofontos, 2019-10-01 Following in the steps of the socio political turn of the discipline Equity in Mathematics Education Addressing a Changing World emerged as a response of the editor and the chapter authors to the enormous changes that have in the last years occurred at a global level for example the ongoing war in Syria the political in actions of powerful nations to fight climate change the rise of far right parties in many countries around the world and so on In recent years massive migration waves from the Middle East have caused significant demographic changes to many European countries Canada and the US that are reflected in schools and classrooms These observations have led this book's contributors to reconsider the concept and or practice of equity and its related concept social justice and the role of mathematics education research in addressing and promoting a fairer world Contrary to other perhaps highly specialized books concerned with similar topics this book aims to provide a smooth yet deep introduction to those who are new to this research area Equity in Mathematics Education Addressing a Changing World contributes to the understanding of equity and its complex relations to mathematics education It is anticipated that it will support individuals in teaching educational research policy making and planning and teacher education in becoming more aware of the interplay between school mathematics and socio political issues that ultimately impacts the lives of learners and their communities teachers as practitioners and as citizens the wider society and the world as a whole Even though each chapter can be read independently of others an engagement with all chapters in this volume will provide readers with a solid holistic understanding of the research territory of equity and mathematics education

Science and Mathematics Education for 21st Century Citizens Laurinda Leite, 2020 This book addresses the challenges that face science and mathematics education if it is to be relevant to 21st century citizens as well as the ways that outstanding specialists from several countries around the world think it should deal with those challenges Starting with the issue of science and mathematics teacher education in a changing world it moves on to deal with innovative approaches to teaching science and mathematics It then discusses contemporary issues related to the role played by technology in science and mathematics education the challenges of the STEM agenda and ways of making science and

mathematics education more inclusive Finally it focuses on assessment issues as the success of science and mathematics education depends at least in part on the purposes for which and ways in which students learning is assessed There is a worldwide trend towards providing meaningful science and mathematics education to all children for the sake of literacy and numeracy development and a need to produce enough science and technology specialists This trend and need coupled with the concern raised by students disengagement in these two knowledge areas and the role that technology may play in countering it put increasingly high demands on teachers As shown in this book science and mathematics education may offer a unique contribution in developing responsible citizens by fostering skills required in order to assume wider responsibilities and roles focusing on personal social and environmental dimensions For instance it offers unique insights into how teachers can build on students complicated and interconnected real worlds to help them learn authentic and relevant science and mathematics Additionally the book highlights potential positive relationships between science and mathematics which are often envisaged as having a conflicting relationship in school curricula By uncovering the similarities between them and by providing evidence that both areas deal with issues that are relevant for citizens daily lives the book explores ways of linking and giving coherence to science and mathematics knowledge as components of everyday life settings It also provides directions for future research on the educational potential of interconnecting science and mathematics at the different educational levels Therefore this is a worthwhile book for researchers teacher educators and schoolteachers It covers theoretical perspectives research based approaches and practical applications that may make a difference in education that is relevant and inclusive for citizens in the 21st century
