Dyslexia in Practice Janet Townend, Martin Turner, 2012-12-06 Dyslexia is a specific learning difficulty that hinders the learning of literacy skills This problem with managing verbal codes in memory is neurologically based and tends to run in families Other symbolic systems such as mathematics and musical notation can also be affected Dyslexia can occur at any level of intellectual ability It can accompany but is not a result of lack of motivation emotional disturbance sensory impairment or meagre opportunities The effects of dyslexia can be alleviated by skilled specialist teaching and committed learning Moreover many dyslexic people have visual and spatial abilities which enable them to be successful in a wide range of careers The appearance of this book is to be welcomed It represents a full statement of the best practice to be found in the many kinds of intervention that are conducted with dyslexic students It addresses some fundamental questions that are seldom asked and much of what the skilled teacher knows and does is set down here in print for the first time From the Preface Collectively the chapters provide a synthesis of current practice focusing on how to assess and treat the symptoms of dyslexia guided by a proper understanding of the cognitive and linguistic weaknesses that underpin the condition The book makes clear that the backbone of intervention for dyslexia is a highly structured multisensory approach that teaches reading and spelling skills at the appropriate rate However it is also explicit in pointing out that such a programme must be delivered with due attention to individual differences in the other cognitive skills that contribute to literacy development and take account of the learner's style interests and not least their confidence and self esteem This book provides an important resource for teachers who wish to become competent in the skills required for the assessment teaching supporting and counselling of dyslexic people in a variety of settings It promises to reach many teachers and in turn their students and families Margaret J Snowling University of York UK **Teaching Mathematics** Pamela Cowan, 2006-02-13 Practical advice for teachers of Mathematics at the beginning of their careers in primary or secondary schools with guidance on effective teaching classroom practice and career development *Dyslexia, Dyspraxia and Mathematics* Dorian Yeo, 2008-04-30 Written by a teacher with many years experience of teaching mathematics to primary school dyslexic and dyspraxic children

with a wide range of abilities this book is designed to be a practical teaching guide. It offers detailed guidance and specific teaching suggestions to all specialist teachers, support teachers, classroom teachers and parents who either directly teach mathematics to dyslexic and dyspraxic children or who support the mathematics teaching programmes of dyslexic or dyspraxic children. Although the book has grown out of teaching experience, it is also informed by widely acknowledged contemporary and international research which explores the cognitive aspects of learning mathematics and tries to understand why it is that some children fail to learn mathematics. Many of the teaching principles described in the text have specific and quite far reaching implications. The theoretical arguments should therefore also be of interest to special needs coordinators, heads of maths departments, head teachers or other professionals who are responsible for designing or modifying the maths learning programmes of children with special learning and maths difficulties. In more general terms, the book hopes to contribute to the broad discussion of the cognitive features and educational needs of dyslexic and dyspraxic children.

Making Inclusion Work for Children with Dyspraxia Lois Addy, Gill Dixon, 2013-01-11. Drawing on their considerable experiences of the syndrome as well as current research findings, the authors help teachers and other education professionals to better understand the needs of a dyspraxic child. Through practical strategies, they show how teachers can make all the difference to a child's ability to succeed in the classroom, and case studies show how parents, teachers and therapists can work together to facilitate learning. Whilst providing a unique insight and approach to the complex condition of dyspraxia, this lively informative text also examines specific cases and scenarios, considering the perspectives of teachers and parents. It handles a range of crucial topics such as issues surrounding diagnosis, the developmental differences and characteristics of dyspraxia, conventional and alternative intervention strategies, an exploration of the pressure of families, ways of improving home-school liaison. Teachers, SENCOs and other educational professionals will find this book provides a wealth of essential information and guidance, whilst parents will also find much to support them in the daily care and welfare of their child. Numeracy for QTLS Liz Keeley-Browne, Anne Price, 2016-09-17.

By 2010, the Government requires all teaching staff in the Lifelong Learning Sector to gain the QTLS Qualified Teacher Learning and Skills teaching qualification. In addition to the new qualification, all those training to teach in the post-compulsory FE sector must also have reached an acceptable skill level in literacy, numeracy and ICT before they qualify. This is referred to as the minimum core, and states that literacy skills must be equivalent to a level 3 qualification (A Level standard) and numeracy skills must be equivalent to level 2 (GCSE). This aims to be the first core textbook in the market to support those undertaking initial teacher training in the post-compulsory learning and skills sector (formerly FE). The text is structured in

line with the requirements and specifications of the minimum core and therefore guides students to achieve the minimum core and pass the new national tests in order to achieve their QTLS qualification This is achieved by developing the student s personal knowledge skills and strategies in order to ensure that they support their own students when they start teaching training themselves In addition a self audit of numeracy skills is available online in order to identify areas of personal strengths and weakness
