Northern Life Pictures From The Past:

Warriors of the Northern Tribes Chris McNab, 2017-12-15 This exciting volume explores the lives of Native Americans living in what is now Alaska and Canada. Many of these tribes lived in weather conditions that were inhospitable to settlers at first. The book examines what happened when settlers and traders did make their way north including the Beaver Wars and the French and Indian War.

The Official Picture Carol Payne, 2013-06-01 Mandated to foster a sense of national cohesion, The National Film Board of Canada's Still Photography Division was the country's official photographer during the mid twentieth century. Like the Farm Security Administration and other agencies in the US, the NFB used photographs to serve the nation. Division photographers shot everything from official state functions to images of the routine events of daily life, producing some of the most dynamic photographs of the time seen by millions of Canadians and international audiences in newspapers, magazines, exhibitions, and filmstrips. In *The Official Picture*, Carol Payne argues that the Still Photography Division played a significant role in Canadian nation building during WWII and the two decades that followed. Payne examines key images, themes, and periods in the Division's history, including the depiction of women, munitions workers, landscape photography in the 1950s and 60s, and portraits of Canadians during the Centennial in 1967, to demonstrate how abstract concepts of nationhood and citizenship, as well as attitudes toward gender, class, linguistic identity, and conceptions of race, were reproduced in photographs. *The Official Picture* looks closely at the work of many Division photographers, from staff members Chris Lund and Gar Lunney during the 1940s and 1950s to the expressive documentary photography of Michel Lambeth, Michael Semak, and Pierre Gaudard in the 1960s and after. The Division also produced a substantial body of Northern imagery documenting Inuit and Native peoples. Payne details how Inuit groups have turned to the archive in recent years in an effort to reaffirm their own cultural identity. For decades, the Still Photography Division served as the country's image bank, producing a government-endorsed official picture of Canada. A rich archival study, *The Official Picture* brings the history of the Division, long overshadowed by the Board's cinematic divisions, to light.

Relocating Britishness Stephen Caunce, 2004-11-27 Offering a range of original perspectives on how Britishness might be constructed at the turn of the millennium and where it might be going, this volume pulls together various disciplines and a variety of geographical perspectives to offer a distinctive set of views for the understanding of Britishness and how it is expressed.

The Oxford History of Western Art Martin Kemp, 2000 *The Oxford History of Western Art* is the new authority on the development of visual culture in the West over the last 2700 years, from the classical period to the end of the twentieth century. OHTWA is an innovative and challenging reappraisal of how the history of art can be presented and understood. None of the currently available general histories of art offers the wealth of perspectives and cross-media references of this book. Through a carefully devised modular structure, readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time. Here, uniquely, is not the simple linear story of art but a rich

series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the redefinition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students
