**Political Science Quarterly** ,1987 Offers timely analysis of both domestic and foreign policy issues as well as of political institutions and processes      *Cold War Analytical Structures and the Post Post-War World* Cori E. Dauber,1993-02-22 This volume takes a perspective on the debate over deterrence theory that has never been used before Other books either address the differences between the two competing schools of thought those who support Mutual Assured Destruction MAD and those who support nuclear warfighting or examine particular policies from within the perspective of one or the other school of thought Cori Dauber examines deterrence theory at a structural level which allows a focus on the similarities between the major perspectives on nuclear strategic doctrine By examining such issues as validity standards and the evaluation of evidence Dauber is able to assess deterrence as a theory of persuasion and to examine the way deterrence discourse so shapes the thinking of policy makers and analysts that it still drives our analysis of alternatives even in the post Soviet era Dauber concludes that deterrence is a system designed to use weapons capabilities as a form of non verbal communication with an Other for the last forty years the Soviet Other Understanding these rhetorical structures and the way they function is essential in predicting the restrictions that deterrence places on the way the United States responds to foreign nations Cold War Analytical Structures and the Post Post War World serves as a model for how scholars in argument and persuasion can apply their methods to real world situations      **New Technologies and the Arms Race** Carlo Schaerf,Brian Holden

**Inadvertent Escalation** Barry R. Posen,2014-01-13 In this sobering book Barry R Posen demonstrates how the interplay between conventional military operations and nuclear forces could in conflicts among states armed with both conventional and nuclear weaponry inadvertently produce pressures for nuclear escalation Knowledge of these hidden pressures he

believes may help some future decision maker avoid catastrophe Building a formidable argument that moves with cumulative force he details the way in which escalation could occur not by mindless accident or by deliberate preference for nuclear escalation but rather as a natural accompaniment of land naval or air warfare at the conventional level Posen bases his analysis on an empirical study of the east west military competition in Europe during the 1980s using a conceptual framework drawn from international relations theory organization theory and strategic theory The lessons of his book however go well beyond the east west competition Since his observations are relevant to all military competitions between states armed with both conventional and nuclear weaponry his book speaks to some of the problems that attend the proliferation of nuclear weapons in longstanding regional conflicts Optimism that small and medium nuclear powers can easily achieve stable nuclear balances is he believes unwarranted
