Algorithms for Decision Making

Mykel J. Kochenderfer, Tim A. Wheeler, Kyle H. Wray, 2022-08-16 A broad introduction to algorithms for decision making under uncertainty introducing the underlying mathematical problem formulations and the algorithms for solving them Automated decision making systems or decision support systems used in applications that range from aircraft collision avoidance to breast cancer screening must be designed to account for various sources of uncertainty while carefully balancing multiple objectives This textbook provides a broad introduction to algorithms for decision making under uncertainty covering the underlying mathematical problem formulations and the algorithms for solving them The book first addresses the problem of reasoning about uncertainty and objectives in simple decisions at a single point in time and then turns to sequential decision problems in stochastic environments where the outcomes of our actions are uncertain It goes on to address model uncertainty when we do not start with a known model and must learn how to act through interaction with the environment state uncertainty in which we do not know the current state of the environment due to imperfect perceptual information and decision contexts involving multiple agents The book focuses primarily on planning and reinforcement learning although some of the techniques presented draw on elements of supervised learning and optimization Algorithms are implemented in the Julia programming language Figures examples and exercises convey the intuition behind the various approaches presented

Game Theory: A Nontechnical Introduction To The Analysis Of Strategy (Fourth Edition)

Roger A McCain, 2023-05-29 As with the previous editions this fourth edition relies on teaching by example and the Karplus Learning Cycle to convey the ideas of game theory in a way that is approachable intuitive and interdisciplinary Noncooperative equilibrium concepts such as Nash equilibrium mixed strategy equilibria and subgame perfect equilibrium are systematically introduced in the first half of the book Bayesian Nash equilibrium is briefly introduced The subsequent chapters discuss cooperative solutions with and without side payments rationalizable strategies and correlated equilibria and applications to elections social mechanism design and larger scale games New examples include panic buying supply chain shifts in the pandemic and global warming

Sam And The Mysteries Of Shadows: The Discovery Shreyan Binu, SHADOWS There is something about shadows Ever had that feeling it was creeping behind you And just when you turn around its back to where it was Your fears were right shadows are not just reflections of us there is much more to them than meets the eye

Models of Conflict and Cooperation Rick Gillman, David Housman, 2009 Models of Conflict and Cooperation is a comprehensive introductory game theory text for general undergraduate students As a textbook it provides a new and distinctive experience for students working to become quantitatively literate Each chapter begins with a dialogue that models quantitative discourse while previewing the topics presented in the rest of the chapter Subsequent sections develop the key ideas starting with basic models and ending with deep concepts and results Throughout all of the sections attention is given to promoting student engagement with the material through relevant models recommended activities and exercises The general game models that are discussed include deterministic strategic sequential bargaining coalition and fair division

games There is a separate essential chapter that discusses player preferences All of the chapters are designed to strengthen the fundamental mathematical skills of quantitative literacy logical reasoning basic algebra and probability skills geometric reasoning and problem solving A distinctive feature of this book is its emphasis on the process of mathematical modeling
