Quality Uncertainty and Perception Lalit Wankhade, Balaji Dabade, 2010-06-16 It has been observed that the studies of quality are pursued in various disciplines like economics quality management and marketing science and are seen isolated The treatments imparted to these studies are also different and has the backdrop of discipline in which the work has been pursued The nature of isolation is equally seen when quality uncertainty and perceived quality were pursued separately without showing any inkling that these can be complimentary Economist and Nobel Laureate Akerlof 1970 wrote a seminal piece The market for lemons quality uncertainty and market mechanism where he described quality uncertainty due to information asymmetry It refers to the fact that a party in a transaction may have more information than the other This is information asymmetry If the seller has more information than the buyer about the product quality he she may sell it as if it is a high quality product In reality it could be a low quality product The buyer does not have the information regarding the quality of the offered product The market condition that led to this transaction is quality uncertainty due to information asymmetry
