Galster,2019-03-13 Drawing on economics sociology geography and psychology Galster delivers a clear sighted explanation of what neighborhoods are how they come to be and what they should be Urban theorists have tried for decades to define exactly what a neighborhood is But behind that daunting existential question lies a much murkier problem never mind how you define them how do you make neighborhoods productive and fair for their residents In *Making Our Neighborhoods Making Our Selves* George C Galster delves deep into the question of whether American neighborhoods are as efficient and equitable as they could be socially financially and emotionally and if not what we can do to change that Galster aims to redefine the relationship between places and people promoting specific policies that reduce inequalities in housing markets and beyond **Class in America** Robert

(Re)Generating Inclusive Cities Dan Zuberi, Ariel Judith Taylor, 2017-07-20 As suburban expansion declines cities have become essential economic cultural and social hubs of global connectivity This book is about urban revitalization across North America in cities including San Francisco Toronto Boston Vancouver New York and Seattle Infrastructure projects including the High Line and Big Dig are explored alongside urban neighborhood creation and regeneration projects such as Hunters Point in San Francisco and Regent Park in Toronto Today these urban regeneration projects have evolved in the context of unprecedented neoliberal public policy and soaring real estate prices Consequently they make a complex contribution to urban inequality and poverty trends in many of these cities including the suburbanization of immigrant settlement and rising inequality Re Generating Inclusive Cities wrestles with challenging but important questions of urban planning including who benefits and who loses with these urban regeneration schemes and what policy tools can be used to mitigate harm We propose a new way forward for understanding and promoting better urban design practices in order to build more socially just and inclusive cities and to ultimately improve the quality of urban life for all **Sunburnt Cities**

Justin B. Hollander, 2011-01-18 In recent years there has been a growing focus on urban and environmental studies and the skills and techniques needed to address the wider challenges of how to create sustainable communities Central to that demand is the increasing urgency of addressing the issue of urban decline and the response has almost always been to pursue growth policies to attempt to reverse that decline The track record of growth policies has been mixed at best Until the first decade of the twenty first century decline was assumed to be an issue only for former industrial cities the so called Rust Belt But the sudden reversal in growth in the major cities of the American Sunbelt has shown that urban decline can be a much wider issue Justin Hollander s research into urban decline in both the Sun and Rust Belts draws lessons planners and policy makers that can be applied universally Hollander addresses the reasons and statistics behind these shrinking cities with a positive outlook arguing that growth for growth s sake is not beneficial for communities suggesting instead that urban development could be achieved through shrinkage Case studies on Phoenix Flint Orlando and Fresno support the argument and Hollander delves into the numbers literature and individual lives affected and how they have changed in response to the declining regions Written for urban scholars and to suit a wide range of courses focused on contemporary urban studies this

Walkable Cities Carlos J. L. Balsas, 2019-10-01 Examines how cities of various sizes on both sides of the Atlantic Ocean are making walkability improvements a part of their overall urban revitalization strategy Walkable precincts have become an important component of urban revitalization on both sides of the Atlantic In Walkable Cities Carlos J L Balsas examines a range of city scales and geographic settings on three continents focusing on the Iberian Peninsula Spain and Portugal Latin America Brazil and Mexico and the United States Phoenix and New York City He explains how this pedestrianization of Main Street approach to

central locations downtowns and midtowns has contributed to strengthening various urban functions such as urban vitality pedestrian and bicyclist safety tourism and more However it has also put pressure on less affluent peripheral and fragile areas due to higher levels of consumption and waste generation Balsas calls attention to the need to base urban revitalization interventions on more spatially and socially just interventions coupled with sustainable consumption practices that do not necessarily entail high growth levels but instead aim to improve the quality of city life The notion of commercial urbanism is both novel and engaging since much of the vibrancy of cities comes from commerce consumption and entertainment The idea itself is a major contribution of the book Tridib Kumar Banerjee University of Southern California **Taboo or Not Taboo?** Lori C. Bohm, 2018-03-29 Psychoanalysis has from its inception been a discipline concerned with overcoming the ill effects of certain social taboos Given this focus it might be assumed that psychoanalysis and its practitioners are free of the constraints imposed by restrictive taboos This book challenges this idea by examining a sampling of the taboos that are rife in the field It is not intended to offer a complete summary of all of the forbidden ideas clinical procedures behaviors and institutional practices in psychoanalysis but rather to raise consciousness about the fact that even within a field which encourages freedom of expression many issues remain difficult to fully discuss both in the consulting room and in professional discourse The book provides a refreshing thoughtful honest look at many of the taboos present in psychoanalysis even at this moment of greatly improved communication between the various theoretical schools in the field Reading it provides a sense of freedom for the reader as speaking of forbidden thoughts always does
