On The Move to Meaningful Internet Systems 2003: CoopIS, DOA, and ODBASE Zahir Tari, Douglas C. Schmidt, 2003-10-25 missions in fact also treat an envisaged mutual impact among them As for the 2002 edition in Irvine the organizers wanted to stimulate this cross pollination with a program of shared famous keynote speakers this year we got Sycara ble Soley and Mylopoulos and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice We received an even larger number of submissions than last year for the three conferences 360 in total and the workshops 170 in total Not only can we therefore again claim a measurable success in attracting a representative volume of scientific papers but such a harvest allowed the program committees of course to compose a high quality cross section of worldwide research in the areas covered In spite of the increased number of submissions the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 i e around 1 paper out of every 4 5 submitted For the workshops the acceptance rate was about 1 in 2 Also for this reason we decided to separate the proceedings into two volumes with their own titles and we are grateful to Springer Verlag for their collaboration in producing these two books The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees *Reasoning Web - Semantic Technologies for Advanced Query Answering* Thomas Eiter, Thomas Krennwallner, 2012-08-18 This volume contains the lecture notes of the 8th Reasoning Web Summer School 2012 held in Vienna Austria in September 2012 in the form of worked out tutorial papers on the various topics that have been covered in that school The 2012 summer school program had been put together under the general leitmotif of advanced query answering topics for the Web The idea was to address on the one hand foundations and computational aspects of query answering in formalisms methods and technology and on the other hand to also spotlight some rising or emerging application fields relating to the Semantic Web in which query answering plays a role and which by their nature also pose new challenges and problems for this task linked stream processing geospatial data semantic wikis and argumentation on the web fall in this category **Databases and Information Systems IV** Olegas Vasilecas, Johann Eder, Albertas Caplinskas, 2007 Contains papers that present original results in business modeling and enterprise engineering database research data engineering data quality and data analysis IS engineering Web engineering and application of AI methods *International Conference on Scientific and Statistical Database Management* , 2004 **Multidimensional Databases: Problems and**
