## **Scraps Of The Untainted Sky Science Fiction Utopia Dystopia:**

*Scraps Of The Untainted Sky* Thomas Moylan, 2018-03-05 Dystopian narrative is a product of the social ferment of the twentieth century. A hundred years of war, famine, disease, state terror, genocide, ecocide, and the depletion of humanity through the buying and selling of everyday life provided fertile ground for this fictive underside of the utopian imagination. From the classical works by E. M. Forster, Yevgeny Zamyatin, Aldous Huxley, George Orwell, and Margaret Atwood through the new maps of hell in postwar science fiction and most recently in the dystopian turn of the 1980s and 1990s, this narrative machine has produced challenging cognitive maps of the given historical situation by way of imaginary societies which are even worse than those that lie outside their authors' and readers' doors. In *Scraps of the Untainted Sky*, Tom Moylan offers a thorough investigation of the history and aesthetics of dystopia. To situate his study, Moylan sets out the methodological paradigm that developed within the interdisciplinary fields of science fiction studies and utopian studies as they grow out of the oppositional political culture of the 1960 and 1970s, the context that produced the project of cultural studies itself. He then presents a thorough account of the textual structure and formal operations of the dystopian text. From there, he focuses on the new science fictional dystopias that emerged in the context of the economic, political, and cultural convulsions of the 1980s and 1990s, and he examines in detail three of these new critical dystopias: Kim Stanley Robinson's *The Gold Coast*, Octavia Butler's *The Parable of the Sower*, and Marge Piercy's *He, She, and It*. With its detailed, documented, and yet accessible presentation, *Scraps of the Untainted Sky* will be of interest to established scholars as well as students and general readers who are seeking an in-depth introduction to this important area of cultural production.

*Parasocial Politics* Jason Zenor, 2014-10-21 The popularity of cable news, satire, documentaries, and political blogs suggests that people are often absorbing and dissecting direct political messages from informational media. But entertainment media also discusses the important political issues of our time, though not as overtly. Nonetheless, consumers still learn, debate, and form opinions on important political issues through their relationship with entertainment media. While many scholarly books examine these political messages found in popular culture, very few examine how actual audiences read these messages. *Parasocial Politics* explores how consumers form complex relationships with media texts and characters and how these readings exist in the nexus between real and fictional worlds. This collection of empirical studies uses various methodologies, including surveys, experiments, focus groups, and mixed methods, to analyze how actual consumers interpret the texts and the overt and covert political messages encoded in popular culture.

*Contemporary Anarchist Studies* Randall Amster, Abraham DeLeon, Luis Fernandez, Anthony J. Nocella, II, Deric Shannon, 2009-02-10 This book highlights the recent rise in interest in anarchist theory and practice, attempting to bridge the gap between anarchist activism on the streets and anarchist studies in the academy. Bringing together some of the most prominent voices in contemporary anarchism, it includes pieces written on anarchist theory, pedagogy, methodologies, praxis, and the future.

*Invoking Hope* Phillip E. Wegner, 2020-06-30

An appeal for the importance of theory utopia and close consideration of our contemporary dark times What does any particular theory allow us to do What is the value of doing so And who benefits In *Invoking Hope* Phillip E Wegner argues for the undiminished importance of the practices of theory utopia and a deep and critical reading of our current situation of what Bertolt Brecht refers to as *finsteren Zeiten* or dark times *Invoking Hope* was written in response to three events that occurred in 2016 the five hundredth anniversary of the publication of Thomas More's *Utopia* the one hundredth anniversary of the founding text in theory Ferdinand de Saussure's *Course in General Linguistics* and the rise of the right wing populism that culminated in the election of Donald Trump Wegner offers original readings of major interventions in theory alongside dazzling utopian imaginaries developed from classical Greece to our global present from Theodor Adorno Ernst Bloch Alain Badiou Jacques Derrida Fredric Jameson Sarah Ahmed Susan Buck Morss and Jacques Lacan to such works as Plato's *Republic* W E B Du Bois's *John Brown Isak Dinesen's Babette's Feast* Kim Stanley Robinson's *2312* and more Wegner comments on an expansive array of modernist and contemporary literature film theory and popular culture With *Invoking Hope* Wegner provides an innovative lens for considering the rise of right wing populism and the current crisis in democracy He discusses challenges in the humanities and higher education and develops strategies of creative critical reading and hope against the grain of current trends in scholarship

*The Epistemology of Utopia* Jorge Bastos da Silva, 2013-05-20 The emergence of Utopian Studies as a dynamic field of inquiry situated at the crossroads of several disciplines is a striking development of the past few decades It is symptomatic of a general trend towards the overcoming of epistemological and institutional boundaries and has borne fruit in a number of ways The traditions of utopianism have come to be valued as an important nurturing of possibilities devoted to the critique and the transformation of the world By undertaking the critical interrogation of the given utopia is a figure not only of inversion but of transcendence and fulfilment The present volume takes into account the international development of Utopian Studies in recent decades Its aim is to provide critical revisions revisitings of the assumptions and methods of the discipline through a set of theoretically informed essays that focus on a number of different manifestations of utopianism The topics covered range from Plato's *Republic* and More's *Utopia* to modern day cosmopolitics glocalization and the intersections of fiction with esotericism and science

**Secret Histories** Kathleen Diffley, Caroline Gebhard, Cheryl B. Torsney, 2025-03-15 The eighteen essays in this volume explore Constance Fenimore Woolson's prodigious range in period and genre as well as place from the Great Lakes to the defeated South and across storied Europe to the Mediterranean The whole of her professional life comes alive in this enlightening collection's triptych The first section *A Writer's Experiments* reveals that Woolson's play with familiar genres and unfamiliar characters began during the 1870s and extended until she died in 1894 Consistently she tested the limits of representing women's labor and their erotic desires The second section *Postbellum Souths* follows Woolson's travels through a land ravaged by war and injustice Drawing on theories of travel collective memory the Lost Cause religious controversy and a race bound region these

essays expose both the smugness of visitors and the agendas of residents that Woolson was among the first postwar writers to portray The third section Through an International Lens considers expatriate perceptions of European and Mediterranean cultures as well as misconceptions about the Gilded Age United States Here and throughout this volume responses to Woolson s travel sketches mingle with assessments of her fiction and poetry while her encounters with the writing of other Americans demonstrate how regularly Woolson made her century s literary terrain more subtle and complex Utopias in Nonfiction Film Simon Spiegel,2022-01-11 Comprehensive and thorough Utopias in Nonfiction Film takes a new direction in its surprise application to documentary that has the potential to shake up the field Jane Gaines Columbia University USA Spiegel has introduced a new sub genre to utopian studies the documentary film The book covers an impressive range of films making the book one of the few truly international and comparative works in utopian studies Lyman Tower Sargent University of Missouri St Louis USA Simon Spiegel s magisterial overview of utopian documentaries and nonfiction films is a treasure trove of information and unearths many forgotten and half forgotten films providing perceptive discussions of sidelined movies that deserve his and our critical scrutiny Eckart Voigts University of Braunschweig Institute of Technology Germany This book is the first major study on utopias in nonfiction film Since the publication of Thomas More s Utopia more than 500 years ago countless books have been written which describe a better world But in film positive utopias seem to be nonexistent So far research has focused almost exclusively on dystopias since positive outlooks seem to run contrary to the media s requirement Utopias in Nonfiction Film takes a new approach starting from the insight that literary utopias are first and foremost meant as a reaction to the ills of the present and not as entertaining stories it looks at documentary and propaganda films an area which so far has been completely ignored by research Combining insights from documentary research and utopian studies a vast and very diverse corpus of films is analysed Among them are Zionist propaganda films cinematic city utopias socialist films of the future as well as web videos produced by the Islamist terrorist group ISIS **The (Un)Certain Future of Empathy in Posthumanism, Cyberculture and Science Fiction** Elsa Bouet,2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 This volume investigates the future of empathy as contemplated by posthumanism cyberculture and science fiction As humanity increasingly networks and communicates online the reconfiguration of human communities through the removal and immediacy of the body challenges traditional notions of humanity and human capacity for empathy The impact of cyberculture and posthumanism on humanity and its capacity for empathy is here assessed through research in literature films neuroscience anthropology and philosophy This volume addresses the centrality of the body to human interactions and assesses how intrinsic it is to the defining of the human The exploration of posthuman narratives which display futuristic bodily modifications also engages with the anxieties and hopes for the future of human empathy Research in dystopian narratives shows that these anxieties are also expressed without the tropes of bodily modifications and that ideological distancing creates the conditions necessary for a lack of

empathy towards otherness      *Utopia Method Vision* Tom Moylan, Raffaella Baccolini, 2007 This collection addresses the ways in which the contributors approach their study of the objects and practices of utopianism understood as social anticipations and visions produced through texts and social experiments and of how in turn those objects and practices have shaped their intellectual work and research perspectives      *The Palgrave Handbook of Utopian and Dystopian Literatures* Peter Marks, Jennifer A.
