understanding that there is no winning system that can beat the mathematical odds that the casino has against a player. However, this book teaches you strategies to follow while in the casino, giving you a large amount of information to help you walk out a winner. These tips can benefit players of all experience levels. You will learn to think how the casino thinks and avoid the traps they set for every player. Inside, you will find the general rules for each of the main games, tips on how to approach a table, what to say to the dealers, how to handle your money, and especially a broad range of specific strategies or systems for each of the games covered. This book makes the game and strategy information easy to understand and follow, as well as fun and enjoyable to read, with a bit of irreverent humor sprinkled throughout.

Roulette Winning Made Easy - Part 2. Secrets of Winning Casino Roulette Online! Narasimhan R, 2017-03-10

Roulette is one of the challenging and strategic casino betting games where we keep limited stakes for betting to get profit depending upon the strategy we use. The percentage of winning would be up to 98% approximately if proper mathematical approach and strategy are used with the numbers or sections on the board. Obviously, if we are a bit careless and lazy to miss any sequence, strategy leads to minimum or maximum loss. So the roulette must be played very carefully with a stable mind and quite intelligent approach only for limited time in a day or week. Keep in mind that if we play long hours continuously, roulette wins. So keep the play minimum in a day. Though the roulette game comes under gambling, it is like a chess board where you will win if properly played with advanced techniques. European and American roulette games are very popular, and we choose European roulette as an example throughout this book to understand well and increase winning chance. European roulette has single zero 0, and American roulette has double 0 00s, where almost playing style is the same with approaches. There are many different types of casinos available, like direct casinos in a club where really you can play with the people, and second approach is to play online. Let us focus on online casinos for our games where we play with available online casino vendors. Do not try to go for roulette computers or number generators or any other cross-cut cheating methods where you will lose your brain and money to play really with the roulette system. Believe in your talent and knowledge, learn well, and really you can perform at the best. Some of the online casino vendors are Royal Panda, Royal Vegas, Spin Palace, Best 365, Indio Casino, 1Cent Casino, etc. As we are giving only a few strategic approach or techniques to win the roulette game for money, more about these online casinos can be searched in the sites like www.casino.org etc or google the same. These online casino sites are giving free play of roulette where you can use dummy money to play and learn. First practise any methods of strategies in that and then play with your hard earned money to win. Do not play with the real money unless you are at expert level to play roulette. This book is not for learning history or basics, full strategies of roulette games. Please learn roulette theory of basics first by searching in google or from the above mentioned sites and then go through these methods. It has few roulette strategic approaches to win or gain 3% to 5% or even 10% to 15% everyday of your investment. Couple of methods given in this book are really a treasure and out of thousands of iterations with the profit of more than 100%. This winning returns are possible in a month or so. But if people

are greedy they may loose more than what they invested so daily if you limit your profit you will have reasonable bulk returns like 30% to 50% every month Without dragging much let us dive in to the topics Happy Casino Playing **Roulette**
