Grieve, 2001-10-15 With the increasing recognition of the importance of fillers for reinforcing and enhancing polymer properties current research is progressing rapidly This volume of Macromolecular Symposia presents highlights of the Eurofillers 99 conference held in Lyon France September 6 9 1999 Recent research furthering our understanding of the properties and processing of fillers and their interactions with polymers was presented along with new ideas addressing the need for filled polymers with combinations of varied properties The possibilities presented by nanotechnology were also introduced through contributions concerning investigations into nanofillers such as clays and whiskers and nanocomposites

**Rubber Nanocomposites**

Sabu Thomas, Ranimol Stephen, 2010-04-09 *Rubber Nanocomposites Preparation Properties and Applications* focuses on the preparation characterization and properties of natural and synthetic rubber nanocomposites. The book carefully debates the preparation of unmodified and modified nanofillers, various manufacturing techniques of rubber nanocomposites, structure morphology and properties of nanocomposites. The text reviews the processing characterization and properties of 0D and 2D nanofiller reinforced rubber nanocomposites. It examines the polymer filler interaction, i.e. the compatibility between matrix and filler using unmodified and modified nanofillers. The book also examines the applications of rubber nanocomposites in various engineering fields which include tyre engineering. The book also examines the current state of the art, challenges and applications in the field of rubber nanocomposites. The handpicked selection of topics and expert contributions make this survey of rubber nanocomposites an outstanding resource for anyone involved in the field of polymer materials design. A handy one stop reference resource for important research accomplishments in the area of rubber nanocomposites. Covers the various aspects of preparation, characterization, morphology, properties and applications of rubber nanocomposites. Summarizes many of the recent technical research accomplishments in the area of nanocomposites in a comprehensive manner.
