## Maximizing Harm:

Maximizing Harm Stephen Young, 2000      The Routledge International Handbook of the Psychology of Morality Naomi Ellemers, Stefano Pagliaro, Félice van Nunspeet, 2023-07-31 This cutting edge handbook examines moral psychology and behavior uncovering layers of human morality through a comprehensive overview of topics and approaches Featuring an array of expert international contributors the book addresses five key themes moral reasoning moral judgments moral emotions moral behavior and moral self views Each section includes empirical chapters that address these themes at the intrapersonal interpersonal intragroup or intergroup level Each section starts with a reflective chapter from a leading scholar in this field of study who shares their personal vision on key issues and future developments Drawing on emerging research and featuring real world examples the book offers a deeper understanding of the social psychological factors that shape our moral behavior and how this plays out in our daily lives The Routledge International Handbook of the Psychology of Morality will be essential reading for academics and students in social psychology the psychology of morality business ethics and related areas It will also be a compelling resource for legal and HR professionals policy makers and anyone interested in understanding the complex and multi faceted nature of human morality      *Humanitarianism in Question* Michael Barnett, Thomas G. Weiss, 2012-05-15 Years of tremendous growth in response to complex emergencies have left a mark on the humanitarian sector Various matters that once seemed settled are now subjects of intense debate What is humanitarianism Is it limited to the provision of relief to victims of conflict or does it include broader objectives such as human rights democracy promotion development and peacebuilding For much of the last century the principles of humanitarianism were guided by neutrality impartiality and independence More recently some humanitarian organizations have begun to relax these tenets The recognition that humanitarian action can lead to negative consequences has forced humanitarian organizations to measure their effectiveness to reflect on their ethical positions and to consider not only the values that motivate their actions but also the consequences of those actions In the indispensable *Humanitarianism in Question* Michael Barnett and Thomas G Weiss bring together scholars from a variety of disciplines to address the humanitarian identity crisis including humanitarianism s relationship to accountability great powers privatization and corporate philanthropy warlords and the ethical evaluations that inform life and death decision making during and after emergencies      **A Compendium of Responsible Artificial Intelligence** Deepak Kumar Jain, Kirti Raj Bhatele, Deepak Garg, Gaurav Dhiman, 2025-07-15 Taking a broad multidisciplinary approach to the ethical legal and practical dimensions of developing AI the book puts key issues such as bias transparency accountability and privacy at center stage From computer science through law and ethics into policy it lays down the roadmap on which developers data scientists and policymakers could bring AI technologies properly attuned to societal values This book can be read as a resource for those who want to be able to guide the development and deployment of responsibly controlled AI systems      *The Oxford Handbook of Social*

*Cognition, Second Edition* Donal E. Carlston, Kurt Hugenberg, Kerri L. Johnson, 2024 This revised edition overhauls the first edition with a majority of chapters reconceptualized focusing on offering a comprehensive review and a new multigenerational perspective The chapter also includes a multitude of new topics including gender identity intersectionality prejudice happiness and wellbeing questionnaire methodology and more      Advanced Social Psychology Eli J. Finkel, Roy F. Baumeister, 2019-03-15 Social psychology uses clever even ingenious research methods to explore the most essential questions of the human psyche Why do we help some people and harm others Why do we pay so much more attention to high powered people than they pay to us If humans evolved from great apes why are human selves so much more elaborate How does our attachment to our parents when we are infants influence the success or failure of our romantic relationships when we are adults Can behaving morally license us to behave immorally shortly afterward How do social relationships make us more versus less prone toward physical illness This volume an update to the original 2010 edition provides a graduate level introduction to social psychology The target audience consists of first year graduate students MA or PhD in social psychology and related disciplines marketing organizational behavior etc although it is also appropriate for upper level undergraduate courses The authors are world renowned leaders on their topic and they have written state of the art overviews of the discipline s major research domains The chapters are not only scientifically rigorous but also accessible and engaging They convey the joy excitement and promise of scientific investigations into human sociality      *Liberalism Undressed* Jethro K. Lieberman, 2012-10-25 During the past 40 years many of liberalism s most distinguished defenders have presented complex controversial abstruse and even impenetrable theories to justify liberal institutions and practices often relying on metaphysical constructs imaginary beings and fanciful events to describe abstract liberal principles that rarely reach real world problems This book proposes that John Stuart Mill s harm principle that the state may act only to prevent harm to others can justify a government capable of dealing with pressing modern problems of human harm while restrained enough to provide people freedom to live life on their own terms      ALGORITHMIC HARM CASS R. SUNSTEIN, 2025      **Ethics in Cyberspace** Thomas Ploug, 2009-04-21 Over the last few decades information and communication technology has come to play an increasingly prominent role in our dealings with other people Computers in particular have made available a host of new ways of interacting which we have increasingly made use of In the wake of this development a number of ethical questions have been raised and debated Ethics in Cyberspace focuses on the consequences for ethical agency of mediating interaction by means of computers seeking to clarify how the conditions of certain kinds of interaction in cyberspace for example in chat rooms and virtual worlds differ from the conditions of interaction face to face and how these differences may come to affect the behaviour of interacting agents in terms of ethics      Felony Murder Guyora Binder, 2012-05-09 The felony murder doctrine is one of the most widely criticized features of American criminal law Legal scholars almost unanimously condemn it as irrational concluding that it imposes punishment without fault and presumes guilt without proof Despite this

the law persists in almost every U S jurisdiction Felony Murder is the first book on this controversial legal doctrine It shows that felony murder liability rests on a simple and powerful idea that the guilt incurred in attacking or endangering others depends on one s reasons for doing so Inflicting harm is wrong and doing so for a bad motive such as robbery rape or arson aggravates that wrong In presenting this idea Guyora Binder criticizes prevailing academic theories of criminal intent for trying to purge criminal law of moral judgment Ultimately Binder shows that felony murder law has been and should remain limited by its justifying aims

**Harm and Responsibility** Thomas J. Miceli, 2024-12-20 Risk is an ever present feature of life in a complex world and it is important for societies to manage it in a just and efficient manner One way to reduce risk is to assign responsibility for the associated harm In this book economist Thomas J Miceli examines harm and responsibility from an economic perspective The book focuses on how responsibility affects people s incentives to refrain from causing unnecessary harm to achieve what economists call optimal deterrence Secondly it is concerned with the quest for justice Defining this is part of the journey Does it mean compensating victims for unavoidable losses Does it involve punishing wrongdoers in proportion to the harm they have caused Is there a clear answer The book addresses these questions and more explaining how in some cases these objectives will align with deterrence and in others they will not The book discusses the ways that the law tempered by religious and social norms strikes a balance between these goals The principal areas of law that assign legal responsibility are tort law for accidental harms and criminal law for intentional harms There exist vibrant economic theories of both and this volume draws on this literature One theme that emerges is the role of causation in determining responsibility Attributing responsibility for a given harm to the party that caused it seems both morally just because it embodies personal responsibility and economically desirable because it achieves deterrence in the most direct manner And yet the law departs from this prescription in any number of ways both by limiting the responsibility of some who caused harm and by expanding responsibility to some who did not The book offers readers coherent economic explanations for these departures from a purely causal basis for legal responsibility Author Thomas J Miceli clarifies causation as reciprocal in nature and therefore not a uniquely defined concept This means that when an action by A causes harm to B the question is not how to restrain A but rather whether A has the legal right to take the action in question or whether B has the right to prevent it There will be a harm either way the relevant question is which party should bear it This insight ultimately leads to the fundamental problem of defining harm In most conflicts this can be straightforward as when A punches B but in others it is more challenging For example when does free speech become hate speech Where is the line drawn The book concludes by drawing out the implications of this fundamental ambiguity over the meaning of harm what that means for the law and what economic theory has to say about it

**New Technologies for Human Rights Law and Practice** Molly K. Land, Jay D. Aronson, 2018-04-19 New technological innovations offer significant opportunities to promote and protect human rights At the same time they also pose undeniable risks In some areas they may even be changing what we mean by human rights The fact that new technologies are often privately controlled raises further questions about accountability and transparency and the role of human rights in regulating these actors This volume edited by Molly K Land and Jay D Aronson provides an essential roadmap for understanding the relationship between technology and human rights law and practice It offers cutting edge analysis and practical strategies in contexts as diverse as autonomous lethal weapons climate change technology the Internet and social media and water meters This title is also available as Open Access

**New Methuselahs** John K. Davis, 2024-03-19 An examination of the ethical

issues raised by the possibility of human life extension including its desirability unequal access and the threat of overpopulation Life extension slowing or halting human aging is now being taken seriously by many scientists Although no techniques to slow human aging yet exist researchers have successfully slowed aging in yeast mice and fruit flies and have determined that humans share aging related genes with these species In *New Methuselahs* John Davis offers a philosophical discussion of the ethical issues raised by the possibility of human life extension Why consider these issues now before human life extension is a reality Davis points out that even today we are making policy and funding decisions about human life extension research that have ethical implications With *New Methuselahs* he provides a comprehensive guide to these issues offering policy recommendations and a qualified defense of life extension After an overview of the ethics and science of life extension Davis considers such issues as the desirability of extended life whether refusing extended life is a form of suicide the Malthusian threat of overpopulation equal access to life extension and the right against harm In the end Davis sides neither with those who argue that there are no moral objections to life enhancement nor with those who argue that the moral objections are so strong that we should never develop it Davis argues that life extension is on balance a good thing and that we should fund life extension research aggressively and he proposes a feasible and just policy for preventing an overpopulation crisis
