*Anthropology or How to Observe a Human Being* Albert Piette, 2019-04-26 It may seem obvious that the human being has always been present in anthropology This book however reveals that he has never really been a part of it Theoretical Anthropology or How to Observe a Human Being establishes the foundations and conditions both theoretical and methodological which make it possible to consider the human being as a topic of observation and analysis for himself as an entity and not in the perspective of understanding social and cultural phenomena In debate with both anthropologists and philosophers this book describes and analyzes the human being as a volume To this end a specific lexicon is built around the notions of volume volumography and volumology These notions are further illustrated and enriched by several drawings

Иоганн Вольфганг Гёте, 2021-03-16 **Tales of Literacy for the 21st Century** Maryanne Wolf, 2016-07-21 The Literary Agenda is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities The category of the literary has always been contentious What is clear however is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought It is sceptically challenged from within for example by the sometimes rival claims of cultural history contextualized explanation or media studies It is shaken from without by even greater pressures by economic exigency and the severe social attitudes that can follow from it by technological change that may leave the traditional forms of serious human communication looking merely antiquated For just these reasons this is the right time for renewal to start reinvigorated work into the meaning and value of literary reading Being Literate in the 21st Century wrestles with critical timely questions for 21st century society How does literacy change the human brain What does it mean to be a literate or a non literate person in the present digital culture for example what will be lost in the present reading brain and what will be gained with different mediums than print What are the consequences of a digital reading brain for the literary mind and for writing itself Can knowledge about the reading brain and advances in technology offer new forms of literacy and new forms of knowledge to the peoples in remote regions of the world who would never otherwise become literate By using both research from cognitive neuroscience psycholinguistics child development and education and considering literary examples from world literature Maryanne Wolf plots a course that seeks to preserve the deepest forms of reading from the past while developing the cognitive skills necessary for this century's next generation

**The Maxims (Bilingual Edition: French Text, with a Revised English Translation)** François de La Rochefoucauld, 2022-02-14 Of all the French epigrammatic writers La Rochefoucauld 1613 1680 is at once the most widely known and the most distinguished Voltaire said One of the works that most largely contributed to form the taste of the French nation and to diffuse a spirit of justice and precision is the collection of maxims by François de La Rochefoucauld though there is scarcely more than one truth running through the book that self love is the motive of everything yet this thought is presented under so many varied aspects that it is nearly always striking And Lord Chesterfield in his letters to his son Till you come to know mankind by your own experience I know no thing nor no man that can in the

meantime bring you so well acquainted with them as La Rochefoucauld his little book of Maxims which I would advise you to look into for some moments at least every day of your life is I fear too like and too exact a picture of human nature I own it seems to degrade it but yet my experience does not convince me that it degrades it unjustly The Maxims were first published in 1665 under the title Reflections or sentences and moral maxims and the edition of 1678 the fifth from which the text has been used for the present translation was the last revised by the author and published in his lifetime with maxims numbered 1 to 504 Maxims which appeared in previous editions and were suppressed by La Rochefoucauld can be found in the second part entitled Maxims withdrawn by the author here numbered 505 to 583 The French original of this bilingual edition was reviewed by Philippe Renaud The English translation originally by John William Willis Bund and James Hain Friswell has been thoroughly revised by Rebecca Hazell and Philippe Renaud
