

Preface

Authors rarely have the privilege, after twenty-five years, of viewing a work of considerable size. We are grateful to have had this privilege, because the need for a comprehensive of the Hawaiian Dictionary has long been evident, judging from the requests of scholars and of many other readers, not only in Hawai'i, but from all parts of the world. Work of revision, begun in 1972, has taken so long that the compilers often wondered if they would live to see the final form of this labor of love. In this preface we review the additions and changes that have been incorporated in this latest edition.

About 3,000 new entries have been added to the Hawaiian-English section, bringing the total number of entries in that section to about 28,000. Almost certainly it is the largest and most complete of any Polynesian dictionaries. Partly because of the increased interest in Hawaiiana, many books have appeared since the first edition was compiled in the early 1950s. Those sources most productive of new entries and additional meanings of old entries include the following (see the References for bibliographic details): Handy and Pokai 1958, 6 1959, Goddard and Brock 1960, Kamakau 1961, 1964, 1976, Neal 1963, Johnson and Mabeleona 1970, Pokai, Haertig, and Lee 1972, Elbert and Pokai 1979, Sr. John 1982.

In addition to entirely new entries and meanings, many changes have been effected that, we hope, will increase the usefulness of the book. These include a means of showing stress groups to facilitate pronunciation of words with more than three syllables; indication of Hawaiian parts of speech; scientific names of plants changed since the early 1950s; additional ancestral reconstructions; classical origins of Hawaiian borrowings;

corrections of previous errors that were made in knowledge of the language proper; and many more items relevant than, when consulted, should enhance understanding of words and their many features.

Hawaiian language newspapers—careless records for names of rains, stars, winds, sea fighting holds, and much else—were reviewed, as well as the important old books in Hawaiian by Krieger and by Hays, and volumes 5 and 6 of the *Forerunner* series. Many legal and land terms from about the middle of the last century were uncovered by William H. Wilson and Ray Kalk Egan, as they translated Hawaiian-language documents at the Hawai'i State Archives.

Effort has been expended, through careful cross-referencing, to make the English Hawaiian section a more detailed "index" of the riches, many of them hidden, on the Hawaiian-English side. Here are some comparisons of the number of epithets and cross references to sayings in the Hawaiian-English section (the number of examples in the present edition precedes the number in the previous edition): insects (45, 20), laziness (48, 0), love (18, 8), rain names (138, 17), warriors (20, 5), wind names (160, 139). These topics are also entered: 94 sea fighting holds (most of them are poetic and have no obvious connection with combat), 67 hula terms, and 22 epithets for vagabonds.

Hula masters and students have called the dictionary their bible, perhaps because of the many citations from chants, songs, and ancient prayers, the poetic sayings and epithets, and the abundance of pithy proverbs that comment on many aspects of ancient Hawaiian life. Perhaps no other Polynesian dictionary contains as much poetry, folklore, and ethnology.
