Kosslyn,2024-12-11 This timely book affirms that humans can flourish in the Age of AI by relying on their distinctive strengths and explores the skills and knowledge that are required to interact effectively efficiently and responsibly with AIs both today and in the future In Part I this book develops the Cognitive Amplifier Loop which allows humans to use AI to build on their cognitive and emotional strengths and manage their limitations Kosslyn discusses ways to employ this loop to offload tasks to AI and to utilize it to train us effectively and efficiently as well as how to use it to both learn and engage in critical thinking creative problem solving and manage cognitive and emotional constraints Part II establishes how to draw on the Cognitive Amplifier Loop to help us improve our human relationships addressing emotional intelligence effective communication leadership followership and collaboration skills Finally Part III builds on previous chapters to consider how to interact with AIs to help each of us learn and grow Throughout the book Kosslyn provides practical strategies and AI assisted exercises to help readers develop these essential skills and knowledge Kosslyn argues that by cultivating distinctively human capabilities we can not only coexist with AI but flourish in an AI infused world This book is a must read for anyone involved with AI education or Learning and Development in industry It will also appeal to anyone studying thinking and decision making AI and psychology and the use of technology in the classroom      *Post-Punk Perception* Edmund Wong,2013-07 Growing up in Singapore in the 80s has been challenging I didn t know much about life or economy I didn t know what I want to do apart from playing I know I had to study and get a job In school we had to write composition about our profession when we grow up I had never wanted to be a philosopher let alone writing about social philosophy It is just that growing up with a single parent is tough It is tougher when she is uneducated and I had to learn most things by myself After my National Service I decided to further studies That was when I was exposed to philosophy and psychology in the UK After graduation in 1999 with a degree in Electronics I came back home to resume my National Service I disrupt it and had about 2 months left The life in UK exposed me to something that I did not notice when growing up in Singapore I find local social scene unsatisfactory They are Confucians Muslims Christians freethinkers and humanists Most time they are preoccupied with how to earn more money Religion does not give me the fulfillment that it promised In addition most were based on Singaporeans interpretation of the Bible and Buddhism s dharma Most times I feel that everything that Singaporeans do has got to do with wealth creation or at least with the expenditure of it It end up like what Pope Francis referred to as the cult of money Organised religion involves more fear mongering than cultivating an inner grace and peace Hence this book is about how I relate an ancient thinker s ethics Aristotle to the present day I find Aristotle s ethics to most suit my needs as a man and lover It does not pretend to be more than what it seek the golden mean It does require us to think and explore the values to

find balance and achieve wisdom with intellectual and moral virtues I also find other philosophers French or not particularly insightful and thought provoking They offer me explanation and exploration on subjects like love sex and death Freudian psychoanalysis are also very penetrating in their findings and insights Moreover I needed some contemporary psychological theory not in depth psychoanalysis to back Aristotle s model of ethics intellectual and moral virtues Hence the psychological background of my book I got acquainted with these psychological theories when I was preparing myself to be a financial consultant I later found out more about them and they became useful in my work and life Hence I would like to share it with people in Asia so that they can ask the right kind of questions in life in order to learn more about themselves and the social milieu they are living in Because everyone of us are affected by the social sciences politics economics and sociology This book will I hope allow us to understand why we are irrational and how we can make rational changes through reasonings in their life and achieving eudaimonia My wish is simply to share what I enjoy doing apart from creating useful ideas to improve the world Through my book I hope to make others understand religion science and philosophy and how they play an increasingly integral part in the Asian century
