

# Drowning Awareness

## NURSE'S NOTES

Drowning can occur anywhere there is water such as bathtubs, buckets, toilets, swimming pools, hot tubs, and lakes.

Drowning can occur in seconds in small amounts of water. Most bathtub deaths occur during a brief lapse in supervision.

Drowning is the most common cause of "unintentional injury deaths" for those with seizure disorders.

Children ages 1-4 die from drowning more than any other cause of death. Drowning is the 2nd leading cause of death for ages 5-14.

Prevent drowning by always swimming with a buddy, wear a life jacket, swim near lifeguards when available, and teach kids how to swim early.

Don't rely on foam or air-filled devices. When near water, designate one person to supervise those who need help. Give 100% of your attention!

Every year in the United States there are an estimated 4,000 fatal drownings, which is an average of 11 drowning deaths per day, and 8,000 nonfatal drownings, which is an average of 22 nonfatal drownings per day. Among adolescents and adults, alcohol use is involved in up to 70% of deaths associated with water recreation like boating or swimming.
