Consuming Happiness Mehita

Iqani, 2023-06-27 This book offers a collection of scholarly writing on the meanings of happiness in relation to consumption. The concept of happiness in relation to consumption deserves critical attention. While administrative marketing scholars might take for granted the notion that consumption and brand engagement produces positive affects in consumers such as enjoyment and thrill, more analysis and theoretical exploration are needed to shed light on what that satisfaction and pleasure means in the context of an increasingly unjust and unequal world. This question is particularly pressing in terms of exploring consumer cultures in the global south. The chapters in this volume explore how material practices link to structures of power and exploitation. Taken together, they offer nuanced insight into what notions of a good and fulfilling life mean both to individual consumers and to the societies in which they participate, especially when those societies are characterised by inequality and poverty alongside wealth and elite consumption. This collection places the spotlight on consumption practices that are the various forms of social action including communication and marketing that are implemented in everyday life in relation to the market economy with and through it. This book will be of great value to students and scholars who are interested in the everyday practices of consumption within a range of fields such as business and management sociology, media and cultural studies. The chapters in this book were originally published in *Consumption Markets Culture: Drag in the Global Digital Public Sphere*. Niall Brennan, David Gudelunas, 2022-08-19 This volume explores drag in global online spaces as a distinct departure from the established success and limitations of RuPaul's Drag Race. Centred around discourses of LGBTQ visibility and political mobilization, the volume addresses how these discourses have moved beyond the increasingly limited qualities of the television series to reconfigure the parameters of drag in emerging communities and spaces. By reconceiving of drag in new settings, this volume uncovers the crucial social and political potential for community building in an increasingly fragmented and isolated global space. Chapters by a diverse team of authors delve into the recognition of new articulations of LGBTQ visibility and political mobility through drag in online space, the implications of drag celebrity for issues such as labor and profit in the digital sphere, the reappropriation of mainstream drag in emerging online environments and communities, and the reverberations of drag in underrepresented and underresearched areas of the world. Offering new insights into the rise of drag in a global digital public sphere, this volume will be of interest to scholars and students of media studies, cultural studies, digital media and cultural studies, critical race studies, gender studies, sexuality studies, queer theory, film and television studies.
