American Chairs: Queen Anne and Chippendale John T. Kirk,1972 Chairs of the Queen Anne and Chippendale period 1730 1795 really one continuous development without a break have been chosen since this form shows the many facets of a gradual development is easily handled and is available in quantity In order not to prejudge where the chairs were made they were first grouped solely according to similar means of construction and design Only after groups of like objects were formed was attention paid to their histories labels and similar documentation Happily when analyzed enough of this secondary information was found associated with each group to provide the knowledge as to where they originated pg 4 Little Books about Old Furniture ,1927 **American Furniture in the Metropolitan Museum of Art** Morrison H. Blake,A. E. Hopkins,2013-09-25 The sovereigns of England unlike those of France have seldom taken to themselves the task of acting as patrons of the fine arts Therefore when we write of the Queen Anne period we do not refer to the influence of the undistinguished lady who for twelve years occupied the throne of England The term is merely convenient for the purpose of classification embracing as it does the period from William and Mary to George I during which the furniture had a strong family likeness and shows a development very much on the same line The change at the last quarter of the seventeenth century from the Jacobean models to the Dutch was probably the most important change that has come over English furniture It was a change which strongly influenced Chippendale and his school and remains with us to this day
