Gérard Deledalle,1989-01-01 This collective volume contains carefully selected papers presented at the international semiotics conference Semiotique et pragmatique that took place in Perpignan on 17 to 19 November 1983 The volume starts of with four debate papers by Searle Apel Greimas and Landowski and is followed then by the main section which is subdivided by a historical a theoretical and a practical section The Empire of Signs Yoshihiko Ikegami,1991 Like Roland

Barthes well known book L Empire des signes from which the title of the present collection is taken this volume contains essays dealing with certain aspects of Japanese culture **On the Medieval Theory of Signs** Umberto Eco,Costantino Marmo,1989-01-01 In the course of the long debate on the nature and the classification of signs from Boethius to Ockham there are at least three lines of thought the Stoic heritage that influences Augustine Abelard Francis Bacon the Aristotelian tradition stemming from the commentaries on De Interpretatione the discussion of the grammarians from Priscian to the Modistae Modern interpreters are frequently misled by the fact that the various authors regularly used the same terms Such a homogeneous terminology however covers profound theoretical differences The aim of these essays is to show that the medieval theory of signs does not represent a unique body of semiotic notions there are diverse and frequently alternative semiotic theories This book thus represents an attempt to encourage further research on the still unrecognized variety of the semiotic approaches offered by the medieval philosophies of language **Bibliographic Guide to Conference**

Publications New York Public Library. Research Libraries,1991 Vols for 1975 include publications cataloged by the Research Libraries of the New York Public Library with additional entries from the Library of Congress MARC tapes

Thinking in Psychological Science Jaan Valsiner,2017-12-02 This book explores the development of ideas in psychology s past It is the initial volume in a series intended to shape such ideas into a valuable resource for the discipline s future Scientists in general are known to ignore their own history considering it to be a graveyard of failures In Thinking in Psychological Science selected ideas of key figures in the cognitive comparative and developmental sides of psychology Karl Duncker Karl Biihler Tamara Dembo Zing Young Kuo C Lloyd Morgan Alexander Chamberlain and Arnold Gesell are traced and the social contexts of their ideas are given a collective analysis focusing on the potential of these ideas for the present state of psychology Representing the scientist as hero has become a necessary component when applying for research monies from governmentally controlled funding agencies Yet the reality is just the opposite Science is not just the product of heroes it is the product of many individuals who often search for solutions to basic problems throughout their lifetimes while

only a few arrive at breakthroughs Still familiarity with the flow of thought in the efforts to solve the basic problems of humankind is necessary for any understanding of creativity This book analyzes the processes involved in the search for solutions to major theoretical problems of development Kuo Gesell action and cognition Bihler Bunker Dembo and methodology Morgan Ultimately this is an exciting volume that reveals real science in the making Thinking in Psychological Science will be of interest to students of the social sciences and intellectual history It is ideal for graduate and upper level undergraduate courses in psychology the sociology of science and cognitive science
