Meeting, Geertrui Klara Immink, 1984 **Dynamics of Infinite Dimensional Systems** Shui-Nee Chow, Jack K. Hale, 2013-06-29 The 1986 NATO Advanced Study Institute on Dynamics of Infinite Dimensional Systems was held at the Instituto Superior Técnico Lisbon Portugal In recent years there have been several research workers who have been considering partial differential equations and functional differential equations as dynamical systems on function spaces Such approaches have led to the formulation of more theoretical problems that need to be investigated In the applications the theoretical ideas have contributed significantly to a better understanding of phenomena that have been experimentally and computationally observed The investigators of this development come with several different backgrounds some from classical partial differential equations some from classical ordinary differential equations and some interested in specific applications Each group has special ideas and often these ideas have not been transmitted from one group to another The purpose of this NATO Workshop was to bring together research workers from these various areas It provided a soundboard for the impact of the ideas of each respective discipline We believe that goal was accomplished but time will be a better judge We have included the list of participants at the workshop with most of these giving a presentation Although the proceedings do not include all of the presentations it is a good representative sample We wish to express our gratitude to NATO and to Dr M di Lullo of NATO who unfortunately did not live to see the completion of this project *Applied Mechanics Reviews*, 1985 American Mathematical Society Sensitivity of Functionals with Applications to Engineering Sciences Vadim Komkov, 1984 **Variational Methods with Applications in Science and Engineering** Kevin W.
