Made To Order The Myth Of Reproductive:

Made to Order Patricia Spallone, Deborah Lynn Steinberg, 1987 Conjunto de ensayos que desde una perspectiva feminista hacen un analisis critico de las consecuencias de las nuevas tecnologias reproductivas en lo que estas suponen de control social y medico del cuerpo de las mujeres quienes ven reducida su integridad su autonomia y la fuerza del movimiento de liberacion feminista *Knowledge as Resistance* Stevienna de Saille, 2017-11-27 This book presents a historicised account of the Feminist International Network of Resistance to Reproductive and Genetic Engineering FINRRAGE a coordinated effort during the 1980s and 1990s by an international group of women to create and disseminate feminist knowledge about the then new field of reproductive technologies Bringing insights from science and technology studies together with social movements and feminist theory it seeks to examine larger questions about knowledge and expertise in activist engagements with rapidly developing technologies as well as explore an important and neglected episode of feminist history Its findings will be relevant to scholars in science studies gender and women s studies and social movements as well as to anyone with an interest in reproductive technologies and the history of feminist activism

Encyclopedia Of Reproductive Technologies Annette Burfoot, 2019-08-19 This collection of encyclopedic entries provides a broad based appreciation of new reproductive technologies that includes accessible technological descriptions and their historical and social contexts The collection is divided into five thematic areas Theories of Reproduction Ancient to Contemporary Early Reproductive Technologies Post War De *The Other Machine* Dion Farquhar, 2014-04-23 With technological advances in reproduction no longer confined to the laboratory or involving only the isolated individual women and men are increasingly resorting to a variety of technologies unheard of a few decades ago to assist them in becoming parents The public at large and feminists as a group are confused and divided over how to view these technologies and over what positions to take on the moral and legal dilemmas they give rise to Farquhar argues that two perspectives have tended to dominate feminist discussions of these issues She labels these fundamental feminism and market liberalism By linking a theoretical approach with a practical set of issues Farquhar s *The Other Machine* provides a rigorous analysis of contemporary feminist debates *Bodies in Glass* Deborah Lynn Steinberg, 1997 An imaginative and original reappraisal of reproductive science *Bodies in glass* explores the complex cultural landscape and emergent iconographic bodies of in vitro fertilisation IVF and medical genetic discourse Through a compelling deconstruction of medical and legal languages texts and institutional practices Deborah Lynn Steinberg traces the convergence of four key logics authorial recombinant embryo protectionist and eugenic which she argues are embedded in the field of IVF the textual material processes of erasure and recombination of women s bodies and reproductive fitness *Reproductive Genetics, Gender and the Body* Elizabeth Ettorre, 2013-04-15 This book is all about reproductive genetics a sociological concept developed to define the use of DNA based technologies in the medical management and supervision of reproduction and pregnant women In a searching analysis

Elizabeth Ettorre uncovers the hidden social processes involved in the development of these technologies Focussing on prenatal screening she explores how the key concepts of gender and the body are intertwined with the process of building genetic knowledge and some of the unintended consequences for women These include the injection of biology into social relationships and the development of a gendered discourse of shame and stigmatisation in which the perfect body becomes idealised and new conceptions of disability are shaped It becomes clear that the modernist tradition of scientific disinterestedness is being replaced by a new ethic the making of moral judgements by scientists Reproductive Genetics Gender and the Body draws on interviews with European medical legal and nursing professionals and raises important issues around the gendered female body the site of genetic capital It challenges professional and scholar alike to grapple with and think through their responsibilities in this complex field where the competing issues have yet to be resolved **After**

Nature Marilyn Strathern,1992-03-12 After Nature is a timely account of fundamental constructs in English kinship at a moment when advances in reproductive technologies are raising questions about the natural basis of kinship relations

Sex/Machine Patrick D. Hopkins,1998 As powerful interacting social and physical forces gender and technology shape our experiences cultures and identities sometimes in such comfortable and subtle ways that it takes effort to appreciate them sometimes in such conspicuous and explosive ways that everyone recognizes their importance Delving into these issues is an opportunity to discover how technology promises or threatens to rewrite our ideas about sex sexuality and gender identity

Women, Medicine, Ethics and the Law Susan Sherwin,Barbara Parish,2020-09-10 This title was first published in 2002 A collection of articles focused on women within a general study of medicine ethics and the law Topics covered include areas where the institutions of medicine ethics and the law intersect in women s reproductive and sexual lives the impact of legal policies and dominant ethical beliefs on many aspects of women s health and the health practices and policies of bioethics and health law The editors recognise that it is important not to lose sight of social differences other than gender such as race ethnicity class age sexuality religion level of physical and mental ability and family relationships In their approach they seek to consider the lives and experiences of women as primary Hence they focus on the question of how women s encounters with the health care system are structured by gender and other socially significant dimensions of their lives rather than the question of how women differ from the male norm *The Oxford Handbook of Gender and Politics*

Georgina Waylen,2013-04-04 The Oxford Handbook of Gender and Politics brings to political science an accessible and comprehensive overview of the key contributions of gender scholars to the study of politics and it shows how these contributions produce a richer understanding of politics and societies *Gender, Identity & Reproduction* S. Earle,G.

Letherby,2003-10-31 Gender Identity and Reproduction draws on a variety of perspectives relevant to an understanding of reproduction across the life course Through a consideration of the representation of reproductive identities and experiences the book highlights difference and diversity in relation to contemporary reproductive choices The book focuses on women s

and men's experiences of agency control and negotiation within the context of cultural medical political theoretical and lay ideologies of the reproductive process in contemporary Western societies **Resources in Education**, 1989 **Embodied Progress** Sarah Franklin, 2002-09-11 New reproductive technologies such as in vitro fertilization have been the subject of intense public discussion and debate worldwide In addition to difficult ethical moral personal and political questions new technologies of assisted conception also raise novel socio cultural dilemmas How are parenthood kinship and procreation being redefined in the context of new reproductive technologies Has reproductive choice become part of consumer culture Embodied Progress offers a unique perspective on these and other cultural dimensions of assisted conception techniques Based on ethnographic research in Britain this study foregrounds the experiences of women and couples who undergo IVF whilst also asking how such experiences may be variously understood Living With Contradictions Alison M Jaggar, 2018-03-08 This book explores some of the moral and public policy issues that divide Western especially North American feminists as the twentieth century ends and the twenty first century begins It represents an in house discussion among feminists and their social ethics Manufacturing Babies and Public Consent Jose Van Dijck, 1995 On Christmas day 1993 a 59 year old British woman gave birth to healthy twins In Italy the very same week a black woman bore a white baby produced from the semen of her white husband and an egg donated by a white woman Heated debates ensued across the United States and Europe Fifteen years ago the very idea of conception outside a woman's womb triggered science fiction fantasies and alarmist speculations Today thousands of babies are manufactured with the help of in vitro fertilization and related technologies each year The application of these procedures has continuously shifted the boundaries of conception and reproduction In the public debate on new reproductive technologies many voices have been heard medical scientists hailing the new technologies as an unprecedented advance feminists raising apprehensions about the way in which these technologies might rob a woman of her reproductive autonomy and bodily integrity and ethicists religious groups and politicians expressing concerns about the social and moral implications of the new technologies Mapping out the public debate in the three discourses which play the most significant role in the distribution of public meanings science journalism and fiction Jos Van Dyck here traces the ways in which this public consent has been manufactured This book examines important questions about the relationship between science technology and popular culture The Political Geographies of Pregnancy Laura R. Woliver, 2010-10-01 A searing study of how modern reproductive politics shapes women's bodily agency Pregnancy indisputably takes place within a woman's body But as reproductive power finds its way into the hands of medical professionals lobbyists and policymakers the geographies of pregnancy are shifting and the boundaries need to be redrawn argues Laura R Woliver The Political Geographies of Pregnancy is a vigorous analysis of the ways modern reproductive politics are shaped by long standing debates on abortion and adoption surrogacy arrangements new reproductive technologies medical surveillance and the mapping of the human genome Across a politically charged backdrop of

reproductive issues Woliver exposes strategies that claim to uphold the best interests of children families and women but in reality complicate women s struggles to have control over their own bodies Utilizing feminist standpoint theory and promoting a feminist ethic of care Woliver looks at abortion politics modern adoption laws that cater to male headed families regulations that allow the state to monitor pregnant women but not always provide care for them and the power structures behind the seemingly benign world of egg selling and surrogate parenting She also considers the potentially staggering political implications of mapping the human genome and the exclusion of women s perspectives in discussions about legislation and advancements in reproductive technologies

Reproduction, Ethics, and the Law Joan C. Callahan,1995 Scholars already saturated with moral commentary on new reproductive arrangements are in for a stimulating surprise For this volume breaks new ground scrutinizing their impact at a more penetrating level and challenging the terms of the dominant debate It should set a standard for further work and receive the attention of mainstream thinkers and policy makers that it so richly deserves Human Studies a valuable contribution to the literature in an important and rapidly evolving area of law and applied ethics Ethics virtually every essay is thought provoking and well informed and together they address just the topics you d want to see covered as well as a few you might not have thought of Medical Humanities Review extremely interesting reading for all those who are involved in or wish to know more about the moral social and policy consequences of new reproductive technologies Biosocial Science This thought provoking collection of essays addresses moral and legal questions revolving around modern human reproduction an invaluable resource for any family law practitioner The Women s Advocate Editor Callahan presents a fascinating look at the facts facets and legal effects of modern technology on reproduction A work that provides insight on all issues concerning reproduction Choice The book is a valuable contribution to the literature in an important evolving area of law and applied ethics Ethics displays the richness of feminist scholarship It points the way for a fuller appreciation of the varied voices of feminist analyses in many other areas Journal of Health Politics Policy and Law a comprehensive compelling and carefully researched volume This is applied feminist ethics at its very impressive best Journal of Medical Ethics Essays address moral and legal quandaries related to human reproduction adding to the feminist dimension of the public discussion of these issues including new complexities in contraception and abortion technologies frozen embryos unwed fathers and the legal definition of parenthood and the use of fetal tissue

TechnoFeminism Judy Wajcman,2013-05-20 This timely and engaging book argues that technoscientific advances are radically transforming the woman machine relationship However it is feminist politics rather than the technologies themselves that make the difference TechnoFeminism fuses the visionary insights of cyberfeminism with a materialist analysis of the sexual politics of technology

Citizen Cyborg James Hughes,2004-10-27 A provocative work by medical ethicist James Hughes Citizen Cyborg argues that technologies pushing the boundaries of humanness can radically improve our quality of life if they are controlled democratically Hughes challenges both the technophobia of Leon Kass and Francis

Fukuyama and the unchecked enthusiasm of others for limitless human enhancement He argues instead for a third way democratic transhumanism by asking the question destined to become a fundamental issue of the twenty first century How can we use new cybernetic and biomedical technologies to make life better for everyone These technologies hold great promise but they also pose profound challenges to our health our culture and our liberal democratic political system By allowing humans to become more than human posthuman or transhuman the new technologies will require new answers for the enduring issues of liberty and the common good What limits should we place on the freedom of people to control their own bodies Who should own genes and other living things Which technologies should be mandatory which voluntary and which forbidden For answers to these challenges Citizen Cyborg proposes a radical return to a faith in the resilience of our democratic institutions *Border Patrols* Deborah Steinberg,Debbie Epstein,Richard Johnson,1997-01-01 This book explores the ways sexual divisions are constituted regulated and transgressed
