interested in sociology and social theory today BOOK JACKET Marx and Weber on Oriental Societies Lutfi
Sunar, 2016-05-06 The Orient was central to the work of Marx and Weber both figures building their theories around the
question of why modernity appeared to emerge only in the West While Marx's account focused on the accumulation of capital
in the West Weber's explanation for this phenomenon centred on Western rationalization Extending recent work comparing
the social theories of Marx and Weber this book examines their approaches to Oriental societies showing how in spite of the
differences in their respective theorizations of the historical and political development of the West their work on the form of
modern society in the Orient converges each complementing the other Fully conversant with recent scholarly work on Marx

and Weber this comprehensive re examination of the points of convergence and departure in their work requires us to re evaluate both their positions in the history of sociology and their relevance to contemporary social questions As such it will appeal to scholars of social and political theory and classical sociology

Democracy and the Political in Max Weber's Thought Terry Maley, 2011-01-01 Max Weber is best known as one of the founders of modern sociology and the author of the Protestant Ethic and the Spirit of Capitalism but he also made important contributions to modern political and democratic theory In Democracy and the Political in Max Weber's Thought Terry Maley explores through a detailed analysis of Weber's writings the intersection of recent work on Weber and on democratic theory bridging the gap between these two rapidly expanding areas of scholarship Maley critically examines how Weber's realist model of democracy defines and constrains the possibilities for democratic agency in modern liberal democracies Maley also looks at how ideas of historical time and memory are constructed in his writings on religion bureaucracy and the social sciences Democracy and the Political in Max Weber's Thought is both an accessible introduction to Weber's political thought and a spirited defense of its continued relevance to debates on democracy **Critical**

perspectives on Marx's approach to Social Classes in Society Saied Qadir Fage Ibrahim, Rebaz Jalal Mahmood, 2016-02-01 Scientific Essay from the year 2016 in the subject Sociology Social System and Social Structure language English abstract Social class issues have taken a crucial role in the social sciences Martti 2000 The term social class was developed in the 18th and 19th centuries and has been used widely particularly by sociologists and political economic theorists such as Thomas Hobbes John Locke Jean Jacques Rousseau Karl Marx Max Weber Ralf Dahrendorf and so on Encyclopaedia Britannica 2012 It is clear that societies have been stratified into various classes Roberts 2001 Social inequality and the differences between people are two such obvious characteristics in every society that it has become necessary to classify society into the different classes Crompton and Gubbay 1980 Furthermore Steenberge 2012 states that normally individuals are grouped into classes based on their economic positions and similar political and economic interests within their culture Inequalities can be seen as being stratified on the basis of social class and this has been a main area of Marx's theory Social class is a key to comprehending the different social opportunities available to different social groups and individuals in societies Marsh et al 2000 In the Communist Manifesto Marx saw the whole of society as likely to have just two huge classes Bourgeoisie and Proletariat which come into direct conflict with one another especially in capitalist societies Crompton 1993 Whilst Weber's viewpoint about social class is analogous with Marx's perspective he supposed that having private property could have a role in the formation of social classes in societies Reid 1981 He also assumed that the variances between social classes in society might be a source of social conflict between them but viewed the conflict in a different way to Marx as Weber had seen that the social struggle between the classes over making goods as a normal conflict in all societies A further divergence in Dahrendorf and Marx's perspectives is that the former focuses on the amount of power to explain the structure of social class in society **Marx, Marginalism and Modern Sociology** Simon Clarke, 2016-07-27 Marx Marginalism and Modern Sociology offers an original interpretation of Marx's critique of political economy as the basis

of a critique of modern economics and sociology The core of the book is an account of Marx's theory of alienated labour as the basis of Marx's work as a whole The critical implications of this theory are developed through an analysis of the historical development of liberal social theory from political economy to the modern disciplines of economics and sociology
