Critical Theory to Structuralism David Ingram, 2014-09-11 Philosophy in the middle of the 20th Century between 1920 and 1968 responded to the cataclysmic events of the time Thinkers on the Right turned to authoritarian forms of nationalism in search of stable forms of collective identity will and purpose Thinkers on the Left promoted egalitarian forms of humanism under the banner of international communism Others saw these opposed tendencies as converging in the extinction of the individual and sought to retrieve the ideals of the Enlightenment in ways that critically acknowledged the contradictions of a liberal democracy racked by class cultural and racial conflict Key figures and movements discussed in this volume include Schmitt Adorno and the Frankfurt School Arendt Benjamin Bataille French Marxism Black Existentialism Saussure and Structuralism Levi Strauss Lacan and Late Pragmatism These individuals and schools of thought responded to this modernity crisis in different ways but largely focused on what they perceived to be liberal democracy's betrayal of its own rationalist ideals of freedom equality and fraternity

The Routledge Companion to the Frankfurt School Peter E. Gordon, Espen Hammer, Axel Honneth, 2018-09-03 The portentous terms and phrases associated with the first decades of the Frankfurt School exile the dominance of capitalism fascism seem as salient today as they were in the early twentieth century The Routledge Companion to the Frankfurt School addresses the many early concerns of critical theory and brings those concerns into direct engagement with our shared world today In this volume a distinguished group of international scholars from a variety of disciplines revisits the philosophical and political contributions of Theodor W Adorno Walter Benjamin Max Horkheimer Herbert Marcuse Jürgen Habermas Axel Honneth and others Throughout the Companion's focus is on the major

ideas that have made the Frankfurt School such a consequential and enduring movement. It offers a crucial resource for those who are trying to make sense of the global and cultural crisis that has now seized our contemporary world. **Critical Theory, Democracy, and the Challenge of Neoliberalism** Brian Caterino, Phillip Hansen, 2019-08-27 Using ideas derived from the critical theory of the Frankfurt School, this book develops key elements of a radical theory of democracy that challenges both the assumptions and commitments of contemporary neo liberalism. **Critical Approaches to International Security** Karin M. Fierke, 2015-03-06 During the Cold War the concept of international security was understood in military terms as the threat or use of force by states. The end of East West hostilities however brought critical perspectives to the fore as scholars sought to explain the emergence of new challenges to international stability such as environmental degradation, immigration and terrorism. The second edition of this popular and highly respected text offers a wide ranging and comprehensive analysis of the growing field of critical security studies. All the chapters have been fully revised and updated to map the on going evolution of debates about international security since 1989 including the more recent shift in emphasis from critiques of the realist practices of states to those of global liberal governance. Topics covered include the relationship between security and change, identity, the production of danger, fear and trauma, human insecurity and emancipation. The book explores the meaning and use of these concepts and their relevance to real life situations ranging from the War on Terror to the Arab Spring, migration, suffering in war, failed states and state building and the changing landscape of the international system with the emergence of a multipolar world and the escalation of global climate change. Written with verve and clarity and incorporating new seminar activities and questions for class discussion, this book will be an invaluable resource for students of international relations and security studies. *The Frankfurt School, Jewish Lives, and Antisemitism* Jack Jacobs, Jack Lester Jacobs, 2015 This book explores the ways in which the Jewish backgrounds of leading Frankfurt School Critical Theorists shaped their lives, work and ideas. **Concepts of Cabralism** Reiland Rabaka, 2014-07-16 By examining Amílcar Cabral's theories and praxes as well as several of the antecedents and major influences on the evolution of his radical politics and critical social theory, *Concepts of Cabralism* Amílcar Cabral and Africana Critical Theory simultaneously reintroduces, chronicles and analyzes several of the core characteristics of the Africana tradition of critical theory. Reiland Rabaka's primary preoccupation is with Cabral's theoretical and political legacies that is to say with the ways in which he constructed, deconstructed and reconstructed theory and the aims, objectives and concrete outcomes of his theoretical applications and discursive practices. The book begins with the Negritude Movement and specifically the work of Léopold Senghor, Aimé Césaire and Jean Paul Sartre. Next it shifts the focus to Frantz Fanon's discourse on radical disalienation and revolutionary decolonization. Finally it offers an extended engagement of Cabral's critical theory and contributions to the Africana tradition of critical theory. Ultimately *Concepts of Cabralism* chronicles and critiques, revisits and revises the black radical tradition with an eye toward the ways in which classical black radicalism informs or

should inform not only contemporary black radicalism African nationalism and Pan Africanism but also contemporary efforts to create a new anti racist anti sexist anti capitalist anti colonialist and anti imperialist critical theory of contemporary society what has come to be called Africana critical theory

The Philosophical Roots of Anti-Capitalism David Black, 2013-12-11 Alfred Sohn Rethel located the origin of philosophical abstraction in the false consciousness brought about by the new money economy of Greek Antiquity In the Enlightenment the conceptual barrier Kant put between phenomenal reality and the thing in itself expressed in Sohn Rethel's view the reified consciousness stemming from commodity exchange and the division of mental and manual labor Because Sohn Rethel saw the entire history of philosophy as branded by a timeless universal logic he dismissed Hegel's concept of totality as idealist and Hegel's critique of Kantian dualism as irrelevant to Marx's critique of political economy David Black in the title essay of *The Philosophical Roots of Anti Capitalism* suggests contra Sohn Rethel that Marx's exposition of the fetishism of commodities is historically specific to capitalist production and therefore cannot explain the origins of philosophy which Black shows to have involved various historical developments in Greek society and culture as well as monetization Just as Hegel's critique of Kantian formalism informs Marx's critique of capital Hegel's writings on how the proper organization of labor might abolish the barrier Aristotle put between production and the Realm of Freedom prefigure Marx's efforts to formulate of an alternative to capitalism Part Two Critique of the Situationist Dialectic Art Class Consciousness and Reification begins with Surrealism whose disappearance as a revolutionary artistic and social force Guy Debord and the Situationists sought to make up for by superseding the poetry of Art with the poetry of Life As well highlighting Debord's achievements in both theory and practice Black points to his philosophical shortcomings and relates these to Debord's later

pessimistic assessment of the possibility of revolutionary class consciousness within globalizing capitalism The four essays in Part Three cover the Aristotelian anarchism the ambivalent legacy of Lukacs theory of reification Raya Dunayevskaya s Hegelian Marxist concept of absolute negativity as revolution in permanence and Gillian Rose s philosophical challenge to both postmodernism and traditional Marxism

On the Trail to Wittgenstein's Hut

Ivar Oxaal,2017-09-08 One of the most influential philosophers of the twentieth century Ludwig Wittgenstein and the roots of his monumental *Tractatus* are explored in this imaginative work Oxaal picks up on themes developed in an earlier work of his on Jews Anti-Semitism and Culture in Vienna adding to it special issues concerning Wittgenstein's experiences in Norway in 1913-14 where he worked on ideas that were completed during the war Oxaal situates the great philosopher in time place and attitude showing how his personal background came to bear on the writing of the *Tractatus* Wittgenstein has often been criticized for traces of solipsism and even mysticism and Oxaal also examines these issues in a volume that integrates ethnography nationality and cultural studies Oxaal sheds new light on the theme of Wittgenstein's Jewishness and develops a new appreciation of the Wittgenstein family and Wittgenstein's better known years in Vienna The author is unsparing in his observations about racism and pessimism in Berlin and Great Britain during the period in which Wittgenstein worked and studied at Cambridge The writing of the *Tractatus* spanned the First World War In the period immediately after its completion Wittgenstein found himself in The Hague where he was in discussions and disputes with Bertrand Russell Oxaal covers these problems sensitively and with an appreciation of ambiguities in the life of a great philosopher and the confusions caused by a post war change in fortunes personal and familial This work of an eminent social scientist and

historian may not be the final statement on Wittgenstein but it most certainly must be considered in any serious assessments of an iconic figure of the twentieth century

The Politics of Protection Rackets in Post-New Order Indonesia Ian Douglas Wilson, 2015-03-24 Gangs and militias have been a persistent feature of social and political life in Indonesia During the authoritarian New Order regime they constituted part of a vast network of sub contracted coercion and social control on behalf of the state Indonesia s subsequent democratisation has seen gangs adapt to and take advantage of the changed political context New types of populist street based organisations have emerged that combine predatory rent seeking with claims of representing marginalised social and economic groups Based on extensive fieldwork in Jakarta this book provides a comprehensive analysis of the changing relationship between gangs militias and political power and authority in post New Order Indonesia It argues that gangs and militias have manufactured various types of legitimacy in consolidating localised territorial monopolies and protection economies As mediators between the informal politics of the street and the world of formal politics they have become often influential brokers in Indonesia s decentralised electoral democracy More than mere criminal extortion it is argued that the protection racket as a social relation of coercion and domination remains a salient feature of Indonesia s post authoritarian political landscape This ground breaking study will be of interest to students and scholars of Indonesian and Southeast Asian politics political violence gangs and urban politics
