New Industrial Geography Regions Regulations And Institutions:

The New Industrial Geography ,1999 **The New Industrial Geography** Trevor Barnes,Merik S Gertler,2002-01-04

Drawing on the theoretical resources of institutional economics The New Industrial Geography opens new perspectives in economic geography In its focus on historical and geographical context institutional embeddedness and tacit rules and formal regulations institutional economics is shown to be the perfect basis for understanding the profound economic and geographical changes of the last two decades and on which also to build a new kind of industrial geography Issues covered include the retheorization of the geography of industrial districts the analysis of institutional thickness and the economic geographical effects of institutional rigidity and sclerosis the economic geographical consequences of new regulatory bodies and policies and the geographically situated character of institutions and regulatory frameworks and the effects of separating them from their originating context the development of new strategies for achieving more equitable forms of regional development **New Economic Spaces: New Economic Geographies** James W. Harrington,Richard Le Heron,2017-11-28

As a core volume in the Dynamics of Economic Space series contributors from North America Australasia Europe and the Middle East each address the constitutive processes of new economic and institutional spaces and the theoretical methodological and policy engaging practices of emerging economic geographies Together they provide a timely and important overview of the current debates about the geographies of economic change As national and regional economies change rapidly so the frameworks concepts and methods used to describe and analyse those processes also need to evolve This volume puts forward a comprehensive analysis of a range of different and innovative means currently available through which to view regional economic activities and interactions **Global Shift** Peter Dicken,2015-02-19 The definitive text on globalization this book provides an accessible jargon free analysis of how the world economy works and its effects on people and places Peter Dicken synthesizes the latest ideas and empirical data to blaze a clear path through the thicket of globalization processes and debates The book highlights the dynamic interactions among transnational corporations nations and other key players and their role in shaping the uneven contours of development Mapping the changing centers of gravity of the global economy Dicken presents in depth case studies of six major industries Now in full color throughout the text features 228 figures Companion websites for students and instructors offer extensive supplemental resources including author videos applied case studies with questions lecture notes with PowerPoint slides discipline specific suggested further reading for each chapter and interactive flashcards New to This Edition Every chapter thoroughly revised and updated All 228 figures now in color are new or redesigned Addresses the ongoing fallout from the recent global financial crisis Discussions of timely topics tax avoidance and corporate social responsibility global problems of unemployment poverty and inequality environmental degradation the Eurozone crisis and more Enhanced online resources for instructors and students

Proximity, Distance and Diversity Päivi Oinas,2017-09-29 Bringing together a wide range of empirical studies from

around the world Sweden Norway Austria Germany France UK Israel Russia China Taiwan Argentina Canada framed in related contemporary theoretical frameworks this book examines the question of the significance of proximate vs more distant relationships for economic agents performance and local economic development While this question has been the subject of intense debates in recent years it is obvious that proximity and distance are not explanatory factors as such The book argues for the need to understand the aims of economic relationships the nature of the regional environment in which they originate and the scale at which they operate The book suggests that the notions of diversity innovativeness maturity and multiple scales should be incorporated into the debates on the significance of proximity for economic performance

Global Shift, Sixth Edition Peter Dicken, 2011-02-25 Widely adopted throughout the world this definitive text comprehensively examines how the global economy works and its effects on people and places Peter Dicken provides a balanced yet critical analysis of globalization processes and debates The text synthesizes a wealth of data on production distribution consumption and innovation including detailed case studies of key global industries Students learn how the global economic map is being shaped and reshaped by dynamic interactions among transnational corporations states consumers labor and civil society organizations Useful features include nearly 250 quick reference figures and tables The companion website offers PowerPoint slides of the figures and tables additional case studies and questions annotated Web links and more New to This Edition Revised throughout to incorporate the latest ideas in the field gives increased attention to global production networks as a major organizing principle Addresses the current global financial crisis Chapter on environmental impacts of global production networks Case study chapter on the extractive industries Fully updated empirical data additional maps and charts

Reshaping Gender and Class in Rural Spaces Belinda Leach, 2016-04-08 Leach and Pini bring together empirical and theoretical studies that consider the intersections of class gender and rurality Each chapter engages with current debates on these concepts to explore them in the context of contemporary social and economic transformations in which global processes that reconstitute gender and class interconnect with and take shape in a particular form of locality the rural The book is innovative in that it responds to calls for more critical work on the rural other contributes to scholarship on gender and rurality but does so through the lens of class This book places the question of gender rurality and difference at its centre through its focus on class addresses the urban bias of much class scholarship as well as the lack of gender analysis in much rural and class academic work focuses on the ways that class mediates the construction and practices of rural men masculinities and rural women femininities challenges prevalent and divergent assumptions with chapters utilising contemporary theorisations of class With the empirical strongly grounded in theory this book will appeal to scholars working in the fields of gender rurality identity and class studies

Fiscal Deficits in the Pacific Region Akira Kohsaka, 2004-07-31 This important book looks at fiscal policy in the Asian Pacific economies and with a broad array of contributors will be a useful tool

Embedded Enterprise and Social Capital Simon

Leonard,2017-11-22 This title was first published in 2002 The concept of embeddedness refers to the social construction of inter firm relationships and the enmeshing of economic relationships within broader social structures and relationships in particular places Previous research has suggested embedding is the best way to generate local growth and social capital and has focused on SMEs in Europe and North America although the existing model is being more widely adopted now This volume is the first to examine the complex processes of embedding in this wider context Bringing together a broad range of case studies from the developed and developing world which address the nature of embeddedness from various perspectives it not only questions the universality of the current model and the policy initiatives it has spawned but also provides a much wider understanding of embeddedness It does so by discussing the social dimensions more fully and by throwing light on the spatial and temporal ambiguity of the concept and its inadequate treatment of power **The Relational Economy** Harald Bathelt,Johannes Glückler,2011-06-23 How are firms networks of firms and production systems organized and how does this organization vary from place to place This book synthesizes theories from across the social sciences with empirical research and case studies in order to answer this question **Knowledge Borders** Kathrine E. Richardson,2017-04-28 Key sections of the North American Free Trade Agreement NAFTA deal with temporary labor mobility Ideally NAFTA status provisions should make the temporary movement of professionals easier across the border of all NAFTA countries However in the case of some key sectors it is arguably not the case Within the context of recent literature on cross border trade city regions regionalism international labor mobility and post September 11 security measures this book probes the dynamics of transitory immigration of knowledge workers between the North American west coast city regions of Vancouver Seattle and the greater San Francisco Bay and Silicon Valley area This book includes in depth interviews with Canadian and US immigration officials immigration attorneys and executives and professional staff of new technology firms and Fortune 500 companies It ultimately explores whether or not the Canada US border is an impediment to the development of a cross border high tech clusters Regional Innovation Systems Hans-Joachim Braczyk,Philip Cooke,Martin Heidenreich,2003-09-02 First published in 1998 Routledge is an imprint of Taylor Francis an informa company Street Entrepreneurs John Cross,Alfonso Morales,2007-06-11 Addressing the current dearth of available literature on this topic the editors use a range of international case studies to explore street vending and informal economies which continue to be especially in developing countries a vital economic driver This volume collects essays from authors around the world about the markets and vendors they know best including studies of USA China Mexico Turkey The contributors speak of the struggles that vendors have faced to legitimize their activity the role that they play in helping societies adapt to and survive catastrophes as well as the practical roles that they play in both the local and global social and economic system As well as highlighting the importance of street markets as a phenomenon of interest in itself to a growing body of scholarship this study demonstrates how an analysis of street vending can provide insights not only into economic anthropology but also

urban studies post modernism spatial geography political sociology and globalization theory **Globalization and the Chinese City** Fulong Wu, 2006-05-09 Introducing readers to the far reaching global orientation that is now taking place in urban China an international team of contributors describe overarching globalization through a detailed examination of the transformation of the built environment A range of urban development processes are analyzed including urbanization real estate development changing landscapes the industrial restructuring of the second tier city and the formation of the city region in the context of global and local interactions In examining city development and local practices as part of globalization processes the global city is treated as a collection of microcosms and concrete places overcoming the analytical tension of the dichotomy of the perceived East versus West divide **The Integration Imperative** Michael P. Gillingham, Greg R. Halseth, Chris J. Johnson, Margot W. Parkes, 2016-04-05 The purpose of this work is to develop a better understanding and thinking about the cumulative impacts of multiple natural resource development projects Cumulative impacts are now one of the most pressing but complex challenges facing governments industry communities and conservation and natural resource professionals There has been technical and policy research exploring how cumulative environmental impacts can be assessed and managed These studies however have failed to consider the necessary integration of community environment and health Informed by knowledge and experience in northern British Columbia this book seeks to expand our understanding of the cumulative impacts of natural resource development through an integrated lens The book offers a timely response to a growing imperative proposing integrative response to multiple natural resource developments in a way that addresses converging environment community and health issues Informed by the editors experiences across several complementary areas of expertise we envision this book as appealing to a wide range of researchers educators and practitioners with relevance to a growing audience with appetite for and interest in integrative approaches *Transformation of Resource Towns and Peripheries* Greg Halseth, 2016-07-01 Most developed economies including single industry and resource dependent rural or small town regions are transforming rapidly as a result of social political and economic change Collectively they face a number of challenges as well as new opportunities This international collaboration describes a critical political economy framework that will be useful for understanding these transitions *Transformation of Resource Towns and Peripheries* describes the multi faceted process of transition and change in resource dependent rural and small town regions since the end of the Second World War The book incorporates international case studies from Australia Canada Finland and New Zealand with the express purpose of highlighting similarities and differences in patterns and practices in each country Chapters explore three main themes how corporate ties and trade linkages are changing and impacting rural communities and regions how resource industry employment is changing in these small communities and how local community capacity and leadership are working to mitigate challenges and take advantage of new opportunities This book will be of interest to students of regional studies geography and rural and industrial sociology It

will also have a strong appeal to policy makers and local regional development practitioners

Investing in Place Sean Markey, Greg Halseth, Don Manson, 2012-08-01 The future of northern British Columbia a vast resource rich region of vibrant cultures and diverse communities could be either driven by a narrow economic agenda or guided by innovative place based solutions that seek to build viable communities and resilient local and regional economies Investing in Place is about creating the foundations for renewing northern British Columbia's rural and small town economies Markey Halseth and Manson argue that renewal is not about nostalgic reliance on the policies and economic strategies of the past rather it is about building a pragmatic and innovative vision for development one that acknowledges both the opportunities and the challenges posed by resource development and global and technological change For policy makers and residents alike the path to renewal lies in place based development which consists of people working together at all levels of the community and region to take advantage of local opportunities in a sustainable responsible way

Financial Crises Brenda Spotton Visano, 2006-04-18 This study explores the major patterns of change in the evolution of financial crises as enduring phenomena and analyzes the paradoxical position that crises are at once similar to and different from each other Brenda Spotton Visano examines economic psychological and social elements intrinsic to the process of capitalist accumulation and innovation to explain the enduring similarities of crises across historical episodes She also assesses the impact that changing financial and economic structures have on determining the specific nature of crises and the differential effect these have in focal point manner and extent of transmission to other otherwise unrelated parts of the economy Financial Crises offers a consistent method for interpreting variations in financial crises through time and allows for a better overall appreciation for both the transitory fragility and enduring flexibility of financial capitalism and the potential vulnerability created by on going financial development Topical and informative this key book is of keen interest to all those studying and researching international economics and political economy

Remaking the Global Economy Jamie Peck, Henry Wai-Chung Yeung, 2003-08-21 With a bibliography pp 231 252

Thoughts on Economic Development in China Ma Ying, Hans-Michael Trautwein, 2013-03-05 This book is about mutual influences of thinking about economic development in China and in the West from the 18th century until the present Its chapters are contributed by development economists and historians of thought from China and other parts of the world The book describes important stages in the evolution cross fertilization and contextual modification of ideas about economic order development and institutional change It illustrates how Western concepts and theories have been adopted and adapted to Chinese conditions in different waves of modernization from the late 19th century until the present and that this was and is no one way traffic The book examines to what extent pre classical thinking in the West in particular French Physiocracy in mid 18th century was influenced by China as an ideal and a source of ideas at a time when China was the largest and most advanced economy in the world It discusses to what extent different approaches of modern Western style economics in particular in the fields of development economics and institutional economics can be used to understand

the rapid transitions and developments of the Chinese economy in recent decades and to what extent they need to be modified in the light of new experiences and insights Against this background several contributions to the volume provide assessments of the current state of economic science and teaching in China in particular with regard to Chinese views on Western economics The book should be of interest to those who are interested in the economic history of China
