Scientific American, 1925

1912 Chris Turney, 2012-11-02 The South Pole discovered trumpeted the front page of The Daily Chronicle on March 8 1912 marking Roald Amundsen's triumph over the tragic Robert Scott Yet behind all the headlines there was a much bigger story Antarctica was awash with expeditions In 1912 five separate teams representing the old and new world were diligently embarking on scientific exploration beyond the edge of the known planet Their discoveries not only enthralled the world but changed our understanding of the planet forever Tales of endurance self-sacrifice and technological innovation laid the foundations for modern scientific exploration and inspired future generations To celebrate the centenary of this groundbreaking work 1912 The Year the World Discovered Antarctica revisits the exploits of these different expeditions Looking beyond the personalities and drawing on his own polar experience

Chris Turney shows how their discoveries marked the dawn of a new age in our understanding of the natural world. He makes use of original and exclusive unpublished archival material and weaves in the latest scientific findings to show how we might reawaken the public's passion for discovery and exploration.
