Our Films Their Films:

Our Films, Their Films Satyajit Ray, 1976 An Indian moviemaker's views on cinematic trends and the film industry articles and lectures *Cinema, Emergence, and the Films of Satyajit Ray* Keya Ganguly, 2010 This is a deeply researched theoretically sophisticated and organic study Keya Ganguly's intellectual tour de force in this analysis of the great Indian film maker Satyajit Ray will provide a benchmark for future studies of the subject Partha Mitter author of *The Triumph of Modernism Indian Artists and the Avant Garde 1922-1947* What distinguishes Ganguly's book from the more fashionable approaches to non Western cinema is her willingness to assert the importance of European theory specifically writings on film by Eisenstein Benjamin Kracauer Balzs among others as a way to elaborate Satyajit Ray's contributions in the larger postwar context of an international New Wave cinema movement She does this with extraordinary intelligence and finesse and the result is an illuminating statement on how a cinema that seems nostalgic for a disappearing cultural past can in fact be read for the first time perhaps for its intimations of an as yet unrealized futurity Rey Chow author of *Sentimental Fabulations Contemporary Chinese Films* *Our Classrooms* Dhruva Trivedy, 2018-12-11 This book highlights the significance of perceptiveness that takes readers to formidable heights showing relevance in most revered professions and in the corporate world We have had various leadership attributes discussed globally but the attribute of perceptiveness has been overlooked particularly in the context of transformational leadership This book highlights the significance of perceptiveness that takes readers to formidable heights showing relevance in most revered professions and in the corporate world Individual personalities and their lives have been depicted to emphasize this experience The style of managing the corporate has been most vulnerable to change because of rapid growth in technology and changes in the physical and social environment Leadership styles ought to be ready for quick adaptation and perceptiveness is one attribute that will show the way Relevance of the attribute has been exemplified in different functional domains The success stories of some futuristic organizations have been cited in the concluding part *The Cinematic Legacy: Preserving Our Film Heritage* Pasquale De Marco, In the realm of cinema there lies a treasure trove of moving images that hold the power to transport us to distant lands introduce us to captivating characters and make us laugh cry and ponder the complexities of life These films both iconic and obscure collectively form our cinematic heritage a legacy that is both precious and fragile Yet this cinematic heritage is under threat The ravages of time neglect and technological obsolescence conspire to erase these precious works of art leaving us with a diminished understanding of our history culture and collective experience Nitrate films the medium upon which many early motion pictures were recorded are highly flammable and prone to decomposition Acetate films which replaced nitrate films in the mid 20th century are also susceptible to deterioration especially if not stored properly The advent of digital technology has brought new challenges to film preservation As film studios and archives transition to digital formats there is a risk that older films will be lost or forgotten Digital files can be easily corrupted or deleted and they

require specialized equipment and software to access and view This book serves as a clarion call to action urging governments film studios archives and individuals worldwide to join forces in preserving our cinematic heritage for posterity Within these pages readers will find a comprehensive exploration of the importance of film preservation the challenges it faces and the inspiring stories of those who have dedicated their lives to saving our cinematic legacy Through a series of thought provoking essays interviews and case studies this book delves into the various aspects of film preservation from the identification and selection of films for preservation to the latest technologies used to restore and digitize aging film prints It also sheds light on the crucial role that film festivals archives and libraries play in preserving and showcasing our cinematic heritage This book is not only a valuable resource for film preservationists and archivists but also an engaging and informative read for anyone interested in the history of cinema and the enduring power of moving images It is a testament to the resilience of our cinematic heritage and the unwavering commitment of those who are working tirelessly to ensure that future generations can continue to experience the magic of the movies If you like this book write a review
