Our Greener Ways:

Our Greener Ways Donald Scherer,2002-04 **How the Global Automotive Industry Stole our Green Mobility Future** Peter E Wells,2025-01-09 This book provides a compelling exploration of the dysfunctionality of car electrification and green mobility Detailing how car companies aim to control the future of automobility through circular business models Peter E Wells highlights the pivotal role of governments in this unsustainable transition *Our Green Earth -04* ,2018-10-27 A Text Book Of Environmental Studies *Our Green Heart* Diana Beresford-Kroeger,2024-09-03 In this inspiring culmination of Diana Beresford Kroeger s life s work as a botanist biochemist biologist and poet of the global forest she delivers a challenge to us all to dig deeper into the science of forests and the ways they will save us from climate breakdown and then do our part to plant and protect them As the last child in Ireland to receive a full Druidic education Diana Beresford Kroeger has brought an unusual and ancient holistic attitude to the science of trees which has led her to many fresh insights into how closely we are tied to one another and to the natural world Her influential message is to pay rapt attention to trees because they are the green heart of the living world Forests are our lungs our medicine our oxygen and the renewal of our soil Planting the right trees in the right places protecting the last virgin forests and working to create new ones is our best means to ensure a future for our children and grandchildren on this burning earth Each of the essays gathered in *Our Green Heart* show us a slice of the natural world through Diana s unique lens illuminating the way our health individually and as a species is tied to the health of the forest a tie we ignore at our peril She maps the science that still needs to be done there is so much we don t know about the ways trees and forests work but also eloquently shows us the path to survival that her own science has revealed the bioplan or blueprint for the connectivity of life in nature If we realize that even the flowerpot on our doorstep is a natural habitat and plant it according to its bioplan we will be aiding and abetting life rather than destroying it

Southern Gardener's Handbook Troy Marden,2014-11 Your complete guide on plants how to select plan plant maintain and problem solve **Our Green and Living World** ,1984-10-18 Tending our gardens Global mosaic Plants for people A paradise to save A third chance **Designing the Green Economy** Brian Milani,2000-09-20 Designing the Green Economy explores realistically and in detail the world s enormous potential for human and ecological regeneration It also explains why this potential has been suppressed or distorted by industrial institutions thus creating economic crisis growing inequality and environmental destruction The first half of the book looks at the challenge ecological change has represented to capitalism as well as capitalism s repressive response the waste economy as expressed in postwar Fordist capitalism and current trends toward a globalized economy But today the great divide between waste and green economies can be narrowed by emerging legal institutional and market approaches to production and environmentalism In Part II Milani explores the practical and theoretical implications of fully unleashing these new productive forces to create community based ecological economies Milani argues that neither sustainability social justice nor economic stability can be secured without

comprehensive redesign of the economy along ecological principles It looks at key sectors of the economy including manufacturing energy and money and finance to illustrate how this redesign can and is taking place through both incremental grassroots initiatives and transformative politics

Climate Politics as Investment Simon Wolf, 2013-05-23 Simon Wolf describes how the growing awareness for the economic consequences of climate change and the economic opportunities of climate protection has led to changes in the rationality of governing climate change from reducing emissions to building low carbon economies One crucial strategy for

governments in orchestrating the transformation to cleaner economies is to enable low carbon investment The author therefore takes a critical look at how climate governance is reframed as an economic and investment challenge in recent years and reveals some of the blind spots of focusing on the economic and investment opportunities related to climate protection
