**Our Knowledge of
the Historical Past**

Robbs Merrill

"Murphey's book is a genuine contribution to the analytical philosophy of history: an advance and a clarification. I respect the intelligence, acuity, and deep information from the social sciences which he brings to this, and would recommend it not require that anyone seriously interested in the subject confront his work."

—Arthur C. Danto, Columbia University

"Murphey writes as an inspired naïf, beginning at the beginning, asking questions so fundamental that other writers suddenly seem only to have skimmed the surface. At the same time he also writes as our supreme sophisticate of the borderland of history, philosophy, and social theory, beginning where others leave off, suggesting stunning solutions to traditional problems and discovering disturbing problems in the promised lands of methodology that others are still usually struggling to enter. This is not just the best book there is in the philosophy of history; it is very nearly the only one."

—Michael Zuckerman,
University of Pennsylvania

"Murphey is concerned with the questions that trouble historians and has taken their work seriously; but he has examined it in terms of the latest developments in analytic philosophy. The result is a fresh, exciting book—a challenging reappraisal of the problems of the philosophy of history as they have been defined over the last thirty years."

—Heinz Kuhlitz, University of Pennsylvania

Our Knowledge Of The Historical Past:

Our Knowledge of the Historical Past Murray G. Murphey, 1980-01-01 **Before and After 9/11** Tom

Rockmore, 2011-04-21 This clearly written and accessible work presents a philosopher's response to the series of events known as 9/11 and the global culture in the United States and global society that followed. It provides a comprehensive analysis of the emerging post-9/11 culture, situating it in a broad context that includes politics, religious discourse, economic theory, and philosophical orientation. *Before and After 9/11* reconstructs the events that led to and departed from the attacks on September 11, 2001. It criticizes the attempts to explain 9/11 by George W. Bush, his administration's neo-conservatives, Samuel Huntington, and Bernard Lewis. It also pays particular attention to the importance of the economic dimension in the emergence of conflicts in an age of globalization. The aim is to provide a philosophical overview of 9/11 understood as a series of connected events within an ongoing historical context. This unique work will appeal to anyone seeking to understand the current world, including the ongoing wars in Iraq and Afghanistan. *Michael Oakeshott and the Cambridge School on the History of Political Thought* Martyn P. Thompson, 2019-05-20

This book is a critique of Cambridge School Historical Contextualism as the currently dominant mode of history of political thought, drawing upon Michael Oakeshott's analysis of the logic of historical enquiry. While acknowledging that the early Cambridge School work represented a considerable advance towards genuinely historical histories of political thought, this work identifies two major historiographical problems that have become increasingly acute. The first is general: an insufficiently rigorous understanding of the key concept of 'pastness' necessarily presupposed in historical enquiry of all kinds. The second is specific to histories of political thought: a failure to do justice to the varieties of past political thinking, especially differences between ideology and philosophy. In addressing these problems, the author offers a comprehensive account of the history of political thought that establishes the parameters not just of histories of ideological thinking but also of the much-disputed character of histories of political philosophy. Since rethinking history of political thought in Oakeshottian terms requires resisting current pressures to turn history into the servant of currently felt needs, the book offers a sustained defence of the cultural value of modernist historical enquiry against its opponents. An important work for political theorists, historians of political thought, and those researching intellectual history, the philosophy of history, and proposed new directions in contemporary historical studies.

The What and the Why of History Goldstein, 2021-12-06 *The What and the Why of History* deals with history as a cognitive discipline concerned to establish justifiable knowledge about a past we can never experience. It is divided into three parts. The first focuses on the conditions that are presupposed when historians offer explanations of what they have come to know. But whatever is to be explained must first come to be known, and the second part is concerned with the character of the cognitive activity which is the constitution of the historical past. The point is that we must attend to the historical enterprise on its own terms and not try to make it fit the epistemology of natural science or of common sense. The last section deals with

Historical Judgement Jonathan Gorman, 2014-11-27 The historical profession is not noted for examining its own methodologies Indeed most historians are averse to historical theory In *Historical Judgement* Jonathan Gorman's response to this state of affairs is to argue that if we want to characterize a discipline we need to look to persons who successfully occupy the role of being practitioners of that discipline So to model historiography we must do so from the views of historians Gorman begins by showing what it is to model a discipline by using recent philosophy of law and philosophy of science There are different models at work whose rivalry and resolution are to be historically understood With this approach in place he is able to develop the history of historiography and explore the character of historiography as presented by historians He reveals that historians conform to various norms that historians now and in the past have agreed and disagreed about the same set of interrelated matters truth telling moral judgement and the synthesis of facts and it is this internal understanding that we need to recover if we are to arrive at a correct characterization of the discipline of historiography Demonstrating how the practice of historiography requires choices and therefore the exercise of judgement Gorman is able to show that in their making of judgements historians enjoy the immense benefit of hindsight He shows how in reflecting on their own discipline historians have typically failed to attend adequately to the history of historiography neglecting to situate previous historians within their historical contexts or to pay adequate attention to the fact that present historians too are within a context that will change In addition Gorman's approach which emphasizes the power and necessity of choice and which rests on the pragmatic holistic empiricism of Quine shows postmodernism not to be the threat that some historians feel it to be indeed it is shown to be a radical form of empiricism Gorman shows how the historical enterprise may be established in our factual and moral understanding in the light of our choices and commitments to a shared world *Historical Judgement* is an original and important contribution to the philosophy of history By bringing together the ideas of historians and philosophers Gorman presents a much more practitioner focused examination of the discipline of history one that will hopefully encourage historians to think more about the nature of what they do

The Future of History Alun Munslow, 2010-07-30 In this radical reassessment Alun Munslow challenges conventional notions of history and offers a new vision of historical thinking and practice Deploying a range of concepts such as scepticism aesthetics ethics standpoint irony authorship and a new understanding of truth *The Future of History* examines history as a form of knowledge in itself arguing that in the future the multiple forms of its expression will be as significant as its content This thought provoking challenging and unique book offers a way forward for history after postmodernism and is essential reading for anyone asking the question what is history

movements in philosophy Towards a Realist Philosophy of History Adam Timmins, 2022-06-21 Towards a Realist Philosophy of History argues for the radical at least in contemporary historical theory view that historians are by and large successful in their goal of providing accurate knowledge and understanding about the historical past Adam Timmins provides a philosophical framework that supports this endeavor as well as highlighting some of the issues with the strong constructivist accounts common in contemporary historical theory Among other things the book provides a realist construal of colligatory concepts historiographical reference and the use of narrative as well as examining the mechanisms of historiographical progress The work also provides some much needed criticism of aspects of the strong constructivist position such as the contemporary adoption of irrealism and the idealist implications of this that has have yet failed to make their way into the existing literature The book proves that historical theory has not moved on from the realism idealism debate and that realism with regards to the products of historiography is still very much a live option **Knowledge, Evolution and Paradox** Koen DePryck, 1993-08-03 Historical Knowledge, Historical Error Allan Megill, 2007-02 In the past thirty years historians have broadened the scope of their discipline to include many previously neglected topics and perspectives They have chronicled language madness gender and sexuality and have experimented with new forms of presentation They have turned to the histories of non Western peoples and to the troubled relations between the West and the rest Allan Megill welcomes these developments but he also suggests that there is now confusion among historians about what counts as a justified account of the past In Historical Knowledge Historical Error Megill dispels some of the confusion Here he discusses issues of narrative objectivity and memory He attacks what he sees as irresponsible uses of evidence while accepting the art of speculation which incomplete evidence forces upon historians Along the way he offers succinct accounts of the epistemological road historians have traveled from Herodotus and Thucydides through Leopold von Ranke and Alexis de Tocqueville and on to Hayden White Natalie Zemon Davis and Lynn Hunt
