Kleist's Prinz Friedrich Von Homburg Mary Garland, 1968 *Political Change and Human Emancipation in the Works of Heinrich Von Kleist* Elystan Griffiths, 2005 Challenges traditional views of Kleist by situating his work in relation to the political and philosophical debates of his age The German writer Heinrich von Kleist 1777 1811 was an unconventional and often controversial figure in his own day and has remained so His ideas on art politics and gender relations continue to challenge modern readers and his complex and radically open texts remain the object of vigorous scholarly debate Kleist has often been portrayed as a poet without a society whose writing served as escape from the realities of his social environment This new study challenges such a view by situating Kleist in relation to the central political and philosophical debates of his momentous age The study first establishes the German and Prussian context of Kleist's day and then provides a short introduction to Kleist's life here seen in particular relation to the political world Developing his argument in relation to Kleist's literary work and essays in a series of close readings Elystan Griffiths shows how Kleist's writings responded to four pressing political issues the relationship of national culture and the state education and social reform the theory and practice of war and administration and the delivery of justice Griffiths sheds fresh light on Kleist's writing by placing emphasis on its intricacy and rich ambiguity which are often

simplified or overlooked in political studies of Kleist Thus Griffiths furthers the critical understanding of Kleist's political thinking by uncovering crucial tensions between a pragmatic readiness for compromise and a utopian longing for freedom and truth Elystan Griffiths is a Research Fellow in the Department of German Studies at the University of Birmingham
