Hermeneutical Approaches in

Psychology of Religion, 2025-02-10 Contemporary psychology is reviving with new vigor an interest in hermeneutics or the human science of interpretation After a period in which positivistic and statistical approaches have been dominant new

methods are being explored Most of these focus on narrative cultural analysis embodiment and interdisciplinarity Because of its specific object of study psychology of religion has never been without an hermeneutical emphasis In this field of psychology scholarship these new directions are especially welcomed as they offer perspectives for research which attempts to interpret religion as a human phenomenon This volume presents hermeneutical psychological studies on religion which rely on both classical and contemporary approaches Dealing with topics like mysticism religious symbols life stories and mental health contributions to the volume draw on a variety of perspectives These range from psychoanalysis narrative psychology and feminism to perspectives drawn deep from the wellspring of interdisciplinary collaboration with anthropology and history

The Sacraments Joseph Martos, 2009-08-01 What are the sacraments really For centuries the religious lives of Catholics and other Christians have revolved around church rituals with generally accepted individual and social effects What precisely are those effects and how are they produced Traditional theology used Greek philosophy to understand the sacraments and how they work But is there no other way to understand them In fact there are a number of ways and this book invites you to look at the sacraments through a variety of lenses psychology sociology anthropology history theology morality and spirituality As the introduction to this volume challenges If you read this book and especially if you engage in the interactive study to which it invites you your understanding of sacraments will be changed forever To help personalize your investigation the author has created a web site with thought provoking questions that encourage you to interact with the ideas being proposed in this volume To engage these topics more deeply see www.TheSacraments.org

Healing God's People Thomas A. Kane, 2013 In this age of growing divisions within the Church and society we need reconciliation and healing now more than ever Healing God's People brings together the thought of these theologians and pastors Francine Cardman M Shawn Copeland Frank Desiderio CSP Kate Dooley OP Peter Fink SJ Raymond G Helmick SJ Thomas A Kane CSP Melissa M Kelley Michael McGarry CSP Hoffsman Ospino Rodney L Petersen Thomas W Porter Thomas P Ryan CSP Robert J Schreiter CPPS Thomas Stegman SJ The fruit of two conferences held at the Boston College School of Theology and Ministry in 2009 and 2011 this collection of essays aims to introduce the reader to the complexity of the issues and suggest practical pastoral responses Book jacket

The Sacrament of Psychology Richard H. Cox, 2002-03 Simply put the premise of this book is that the church has allowed itself to become overwhelmed with psychology This is not truly new Karl Menninger challenged both the clergy and the psychologists to consider a similar concept over twenty five years ago Richard Cox argues that what many call superstition of materialism ascribing all power and glory to science and its accomplishments the church has capitalized upon and through the process has lost its identity It has done this he challenges by allowing the norms and diagnosis of contemporary psychology to replace the Gospel Sparing no sacred cows among the clergy or psychologists Cox builds a strong argument A critical addition to the literature The Sacrament of Psychology is not for the faint of heart It is not for the pop psychologist or as he calls them armchair theologians While the author accepts that theology needs psychology

and psychology benefits from theology he is quick to point out that there needs to be a redefining of this partnership in order to make the relationship truly productive Passions rise as one symbol after another is challenged in this highly enlightening and powerfully written acknowledgement that the power of the Gospels has been in many instances thrown to the uncritical winds of psychological embracing As one critic has said the amalgam has created neither good theology nor good psychology

Bernanos Hans Urs Von Balthasar,2011-10-06 This book is a double treat it combines the genius of the towering theologian Hans Urs von Balthasar and his ability to make his subject come alive before the reader along with the focus of that genius on someone with the spiritual depth and creative stature of Georges Bernanos considered by many to be the greatest Catholic creative writer of the twentieth century The goal of this book is to simply convey what Bernanos wanted to say as the devout Christian that he was Bernanos was a deeply prayerful practicing sacramental Catholic whose profound love for the Church made everything he created or wrote an ecclesial existence that has been given form existence derived not merely from an abstract individual faith but from the faith of the Church With judicious quoting of the primary source and careful juxtaposing of texts and commentary Balthasar provides a unique forum from which Bernanos can speak to the reader in a way that he can be clearly heard and genuinely understood Psychology and Catholicism Robert

Kugelmann,2011-05-26 In this study of psychology and Catholicism Kugelmann aims to provide clarity in an area filled with emotion and opinion From the beginnings of modern psychology to the mid 1960s this complicated relationship between science and religion is methodically investigated Conflicts such as the boundary of person versus soul contested between psychology and the Church are debated thoroughly Kugelmann goes on to examine topics such as the role of the subconscious in explaining spiritualism and miracles psychoanalysis and the sacrament of confession myth and symbol in psychology and religious experience cognition and will in psychology and in religious life humanistic psychology as a spiritual movement This fascinating study will be of great interest to scholars and students of both psychology and religious studies but will also appeal to all of those who have an interest in the way modern science and traditional religion coexist in our ever changing society

Tracing the Emergence of Psychology, 1520-1750 Sven Hroar Klempe,2020-08-25 This book pursues the very first use of the term psychology which is traced back to 1520 The appearance of the term was not as a part of philosophy Thus the main hypothesis of this book is that psychology from the very beginning was a stranger to philosophy It demonstrates that even Aristotle used his thesis on the soul to delineate philosophy from psychological aspects It is therefore suggested that psychological wisdom and knowledge has been retained and in popular culture as long as humans have reflected upon themselves There were however several reasons for why psychology appeared as a part of philosophy at around the year 1600 One important factor was Humanism which among other things had challenged Aristotelian logic Another important movement was Protestantism Luther s emphasis on the need to confess one s sin led to a certain interest to explore the human nature His slogan the scripture alone represented an attack on the close relationship that had existed

between theology and philosophy Yet when philosophy was thrown out of theology it was left without the basic theological tenets that had guided philosophical speculations for centuries in Europe Hence this book pursues how philosophy gradually adopts and includes psychological aspects to rebuild the foundation for philosophy This culminates partly with the British empiricists Yet they did not apply the term psychology It was the German and partly ignored philosopher Christian Wolff who opened up modern understanding of psychology with the publication of *Psychologia empirica* in 1732 This publication had a tremendous impact on the enlightenment in the modern Europe Sacramental Theology Bruce T. Morrill,2019-11-18

Throughout the second half of the twentieth century sacramental theology has evolved as a discipline advancing comprehensive theories of sacraments and sacramentality as integral to the Christian faith while also studying the history and theology of the particular rites Now in the twenty first century the need for attention to the actual performance and specific social settings of sacramental worship has become well established This makes the work of sacramental theology necessarily engaged with multiple cross disciplinary theories attentive to particular contexts whether local national or global Still the divine human encounter at the heart of Christian symbol and ritual likewise beckons to philosophical theological reflection The essays in this volume begin with profound philosophical perspectives on the personal and communal sacramental experience expanding from traditional cosmology to evolutionary and chaos theories of our planetary existence continuing with shifts especially among youth to interreligious and non institutional perspectives consideration of change in popular notions of guilt and social ethical issues in relation to liturgical theology and practice so as finally to return to fundamental theological reflection on human sacramentality and divine revelation **Depth Psychology** Dennis Patrick
