

Semiotic foundations of language

- From a semiotic point of view, **languages** (both natural and artificial) are **codes**, e.g. **systems of signs** (systems of correspondences between expression and content) where an **expression** stands for a **content**
- How the communication happens?
 - A sender **encodes** (assigns a content) to an appropriate expression
 - A receiver **decodes** (identifies the content starting from the expression)
- A code is a set of conventions used to communicate meaning

Signification in the Divine Comedy Raffaele De Benedictis,2023-08-29 A new critical method for the Divine Comedy which focuses not only on language as writing but also and equally on other discursive modes that the Divine Comedy authorizes

Multimodality was already present in Dante's time and the reception of the Divine Comedy took place multimodally. Thus a theoretical study of multimodality carried out under the semiotic lens sheds light on how and why a mode is more effective than another and/or how they may combine in producing signification and new ontologies warranted by Dante's text. Also we do not yet have a critical theory that allows us to understand the function of multimodality for the creation of new forms of signification and of clarifying the ontological boundaries set forth by different modalities. It is a new and original study which contributes to the advancement of Dante Studies Literary Criticism with a focus on literary semiotics. Multimedia Multiliteracy philosophy of language communication and education. Semiotics 1981 John N. Deely, 2012-12-06. This volume differs from the volume *Semiotics 1980* in that it is no longer an experimental product but the result of a permanent commitment of the Semiotic Society of America to publish each year henceforward those papers presented at its Annual Meeting which are submitted to the Secretariat in timely and proper form. Thus *Semiotics 1981* marks the beginning following upon the experimental *Semiotics 1980* volume of an indefinite series of volumes presenting the cross-fertilization of styles, topics, methodologies and traditions in which new ideas vie for survival and experiment is at a premium. It is this cross-fertilization which is at the heart of the vitality and integration and redistribution of the world of knowledge. The historical value of such a record is obvious. But the more immediate objective of these volumes of annual proceedings is to promote participation in the work of semiotizing traditional perspectives and disciplines by providing a forum in which young scholars can meet regularly and find an outlet for their efforts at interdisciplinary thinking which are not always welcome in the journals and proceedings devoted to the promotion only of traditionally specialized perspectives.

Semiotic Margins Shoshana Dreyfus, Susan Hood, Maree Stenglin, 2010-12-16. *Semiotic Margins* analyses the meaning-making potential of not only language but modalities like laughter, music, colour and architectural spaces. By examining resources often positioned on the side-line of mainstream semiotic accounts, this study raises the question of what counts as part of language and communication and why. Beginning with the more established nonverbal resources of communication, four major themes of modalities of meaning are covered. The investigation of music and space looks at how semiotic systems in classical music interact. Using children's books, the relationship between images and verbal meaning is then explored, presenting implications for student literacy as well as a methodology for supporting children excluded from mainstream literary practices. Finally, new approaches to transcribing representations in screen-based technologies are presented through an examination of television advertisements. *Semiotic Margins* will appeal to linguists and semioticians wishing to pursue research in systemic functional linguistics and multimodal discourse analysis.

The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06. Although semiotics has in one guise or another flourished uninterruptedly since pre-Socratic times in the West and important semiotic

themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to take form only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the adventuring of the search itself

Advances in Visual Semiotics ,2011-12-07 No detailed description available for Advances in Visual Semiotics **The Digital Mind** Kristian Bankov,2022-02-23 This book reveals the core features of digital culture examined by means of semiotic models and theories It positions commercial and market principles in the center of the digital semiosphere avoiding the need to force the new cultural reality into the established textualist or pragmatist paradigms The theoretic insights and case studies presented here argue for new semiotic models of inquiry that include working with big data user experience and netnography along with conventional approaches The book develops a new concept of identity in the digital age analyzing the digital flows of recognition and value which led to the tremendous success of Social Media and the Web 2.0 era Self expression entertainment and consumerism are seen as the major drivers of identity formation in the post truth era where the self can no longer be considered independently of a given person's communication devices where a substantial part of it is stored and actualized It will be of interest to semioticians and researchers working on digital culture

Semiotics of the Christian Imagination Domenico Pietropaolo,2020-12-10 The semiotics of the Christian imagination describes the repository of signs and the logic of signification through which a community of faith envisions spiritual truths This book analyses various examples in text images music art and scientific treatise of the imaginative semiotisation of the fall of Man and the Church's semiotic perception of the Divine plan for Redemption The book includes a chapter detailing the theory of signs based on a close reading of primary sources and has nine further chapters on the meaning making inherent in ideas of the Fall and Redemption of mankind These are filtered through and given material representation by the semiotic paradigms of various cultural fields including philology verbal arts and science Central to this practice and to the book's message are two themes of theological semiotics fundamental to man's understanding of himself in the larger scheme of things Two of these include the theology of the Fall and a sacramental theory of signs The theory is grounded in the doctrine of analogy and this is the only reliable cognitive link between the

immanence of the thinking subject and the transcendence that is the object of thought **Analysing Performance** Patrick Campbell, 1996-04-15 A wide ranging collection of specially commissioned essays by contributors of international standing about key aspects of the performing arts
