Sensor Sensibility

**Shangliang Huang, Kim D.
Bennett, David A. Jackson**

Sensor Sensibility:

Sensors Jose Gerardo Rocha, Senentxu Lanceros-Mendez, 2008-12-01 This book describes some devices that are commonly identified as tactile or force sensors This is achieved with different degrees of detail in a unique and actual resource through the description of different approaches to this type of sensors Understanding the design and the working principles of the sensors described here requires a multidisciplinary background of electrical engineering mechanical engineering physics biology etc An attempt has been made to place side by side the most pertinent information in order to reach a more productive reading not only for professionals dedicated to the design of tactile sensors but also for all other sensor users as for example in the field of robotics The latest technologies presented in this book are more focused on information readout and processing as new materials micro and sub micro sensors are available wireless transmission and processing of the sensorial information as well as some innovative methodologies for obtaining and interpreting tactile information are also strongly evolving

Nanotechnology-based Sensors for Detection of Environmental Pollution

Fernanda Maria Policarpo Tonelli, Arpita Roy, Munir Ozturk, H C Ananda Murthy, 2024-05-09 Nanotechnology based Sensors for Efficient Detection of Environmental Pollution discusses the use of nanotechnology to generate sensors capable of performing efficient detection of different types of environmental pollutants Nanomaterials characteristics such as large surface area good reactivity and possibility to suffer chemical surface modification to recognize different types of molecules are useful especially to perform the detection of specific environmental pollutants Innovative and efficient ways to detect environmental pollution are urgently needed for sustainability and the nanotechnology field has an enormous potential to offer strategic solutions Nanotechnology based sensors offer an efficient way of detecting the presence of contaminants and determine its structure and chemical nature is by applying nanotechnology and or nanobiotechnology This book will contain 5 parts the first one will be dedicated to exploring environmental pollution as a threat to life on Earth and main contaminants inorganic organic or pathogens and the risk they represent to living beings The second part will be dedicated to nanotechnology allowing pollutants detection covering a brief history of nanotechnology based sensors different types of nanotechnology based sensor optical electrochemical and magnetic nanotechnology based sensors design and fabrication and nano biosensors The third part will be focused on important specific pollutants pesticides heavy metal dyes toxic gas pharmaceutical waste petroleum hydrocarbons and pathogenic microbes and their detection by nanotechnology based sensors The fourth part will be dedicated to important nanomaterials in nanotechnology based sensors exploring carbon based and non carbon based material in nanoscale graphene carbon nanotubes quantum dots magnetic nanomaterials non magnetic nanoparticles and also point of care sensors and functionalization to generate optimized nanotechnology based sensors to pollutants detection The fifth and last part of Nanotechnology based Sensors for Efficient Detection of Environmental Pollution will address relevant practical aspects related to nanotechnology based sensors covering advantages

and challenges safety economic and commercial aspects related to the field and also sustainability highlighting green nanomaterials on nanotechnology based sensors Provides a comprehensive multidisciplinary review of nanotechnology based sensors Supplies readers extensive knowledge on detecting harmful pollutants in different environments using nanotechnology based sensors Presents chapters dedicated to the detection of pollutants different from toxic gas and pharmaceutical products such as pesticides heavy metals dyes pathogens and petroleum hydrocarbons Introduces information on pollutants and the threats they represent to living beings nanotechnology based sensor s design and fabrication a brief history of the field and practical issues related to the field such as economics safety and challenges

Artificial Human Sensors Peter Wide,2012-03-23 As the elderly population increases the importance of creating sophisticated information support to humans with limited sensing performance has also grown This book discusses human and artificial sensing in conjunction with human perception capabilities auditory taste smell vision and touch It also discusses the fusion of this sensing information to find answers to questions such as how we can increase our human fuzzy decision capability perception The book presents intelligent new technologies that can enhance the natural sensing perception and mobility abilities of humans allowing them to have healthier more productive safer lives *Third Many-core Applications Research Community (MARC) Symposium* Diana Göhringer,Michael Hübner,Jürgen Becker,2011
