Septicaemia and Endocarditis D. C. Shanson, 1989 In this volume leading British and American authorities provide practical clinical information on two widespread health threats Septicaemia is a life threatening infection that has become an increasingly important problem in hospitals throughout the world There is a great need for practitioners to have accurate and current information about its causative organisms and the management techniques that have proven effective in its treatment Infective endocarditis on the other hand is at least as prevalent as in the pre antibiotic era and is evidently evolving in terms of clinical presentation and causative organisms There are several controversial areas concerning diagnosis treatment and prevention of this disease All of these aspects are discussed in this valuable informative work

Microbiology in Clinical Practice D. C. Shanson, 2014-06-28 Microbiology in Clinical Practice presents the infections and syndromes caused by micro organisms It discusses the management of infective diseases and aetiological agents It addresses the latex agglutination immunofluorescent monoclonal antibody and nucleic acid probe investigations Some of the topics covered in the book are the classification and pathogenicity of microbes classification of bacteria classification of viruses classification of fungi general principles of antimicrobial chemotherapy antibiotic sensitivity tests procedures in the laboratory for microbiological diagnosis and the mode of action of antimicrobial drugs The resistance to antimicrobial drugs are covered The microbiological investigations of septicaemia are discussed The text describes the human immunodeficiency virus infection and AIDS in infants A study of the congenital immunodeficiency and impaired resistance to infection is presented A chapter is devoted to the predisposing factors for anaerobic infections Another section focuses on the infections of the central nervous system The book can provide useful information to doctors pathologists neurologists students and researchers
