Abstract: The history of US-Greenland relations and the perception of Greenland in the US is a near complete historical desideratum with only few works dealing with the subject at all and those publications covering mainly the few well-known historic events. Neither US nor Danish or Greenlandic historians have dealt with the perception of Greenland in the US from Early Modern to today in its entirety.

The article provides an overview of the history of the perception of Greenland in the US and the bilateral relations of these countries from Early Modern to today, but more importantly also asks the question why this subject has been largely ignored. The title of John Griesemer's novel *No One Thinks of Greenland* is used as a parable to describe these reasons and the attitude of the US and US foreign policy towards Greenland. Furthermore, it is analyzed why the US tried purchasing Greenland several times and why certain groups in the US had an interest in keeping the US-Greenland relations in the shadows. It is also described how not purchasing Greenland made perfect sense for the US and generated a political vacuum on the island that provided some unique opportunities for the US military. Throughout history it remained true that nearly nobody in the US thought about Greenland, resulting in a unique history of bi-lateral relations.

The Shaping of Greenland's Resource Spaces Mark Nuttall, 2023-08-07 The book examines ideas about the making and shaping of Greenland's society environment and resource spaces It discusses how Greenland's resources have been extracted at different points in its history shows how acquiring knowledge of subsurface environments has been crucial for matters of securitisation and explores how the country is being imagined as an emerging frontier with vast mineral reserves The book delves into the history and contemporary practice of geological exploration and considers the politics and corporate activities that frame discussion about extractive industries and resource zones It touches upon resource policies the nature of social and environmental assessments and permitting processes while the environmental and social effects of extractive industries are considered alongside an assessment of the status of current and planned resource projects In its exploration of the nature and place of territory and the subterranean in political and economic narratives the book shows how the making of Greenland has and continues to be bound up with the shaping of resource spaces and with ambitions to extract resources from them Yet the book shows that plans for extractive industries remain controversial It concludes by considering the prospects for future development and debates on conservation and Indigenous rights with reflections on how and where Greenland is positioned in the geopolitics of environmental governance and geo security in the Arctic This book will be of great interest to students and scholars of environmental anthropology geography resource management extractive industries environmental governance international relations geopolitics Arctic studies and sustainable development

Foreign Policy in Greenland Maria Ackrén, 2025-05-13 Foreign Policy in Greenland will shed light on what kind of competences Greenland has in IR and how Greenland undertakes foreign policy while still being a self governing territory underneath Danish jurisdiction Even though Denmark has the ultimate power when it comes to foreign and security policy Greenland has received more autonomy in this field in recent years Back in 1995 a permanent Danish Greenlandic official group was established to discuss all foreign and security matters that were related to Greenland In 2003 Greenland and Denmark signed a joint declaration in Itilleq regarding the Greenlandic involvement in international affairs Since then the Government of Greenland has written a foreign policy report every year to outline the activities of Greenlandic international relations This book will undertake a systematic analysis of the foreign policy papers since 2003 or earlier and onwards What kind of activities have Greenland undertaken in international affairs What are the objectives Can Greenland be an influential player in international relations How far is the self government stretched or limited in relation to international relations This book will be of interest for those with an interest in international affairs and law as well as those with an interest in international politics and foreign policy

Fury and Ice Peter Harmsen, 2024-09-15 Harmsen makes a convincing

argument that the occupation of Greenland fits within the broader narrative of the war and is just as important to remember and understand as bigger events that overshadow it recommended for readers of all levels scholarly or casual The Journal of America s Military Past The wartime interest in Greenland was a direct result of its vital strategic position if you wanted to predict the weather in Europe you had to have men in place on the vast frozen island The most celebrated example of Greenland s crucial contribution to Allied meteorological services is the correct weather forecast in June 1944 leading to the decision to launch the invasion of Normandy In addition both before and after D Day a stream of weather reports from Greenland was essential for the Allied ability to carry out the bombing offensive against Germany The Germans were aware of the value of Greenland from a meteorological point of view and they repeatedly attempted to establish semi permanent weather stations along the sparsely populated east coast of the island This resulted in an epic cat and mouse game in which US Coast Guard personnel assisted by a celebrated sledge patrol manned by Scandinavian adventurers struggled to locate and eliminate German bases before they could make any difference It s a story seldom told but the fact remains that Greenland was the only part of the North American continent in which German troops maintained a presence throughout almost the entirety of the war At the same time the US entry into the war triggered an enormous American effort to hastily establish the necessary infrastructure in the form of harbors and air bases that enabled Greenland to form a vital link in the effort to send men and supplies across the North Atlantic in the face of stern opposition from the German Navy While Allied ships were passing through Greenland waters in massive numbers planes were plying the so called Snowball Route from Greenland over Iceland to the British Isles This gave rise to number of tragic incidents such as the sinking of the transport ship SS Dorchester off Greenland in February 1942 leading to the deaths of 674 out of 904 men on board including the Four Chaplains representing the Methodists the Reformed Church the Catholic Church and Judaism who gave up their life jackets to save others In July the same year in one of the most massive forced landings in history the lost squadron six P 38 Lightning fighter aircraft and two Flying Fortresses crash landed on a Greenland glacier

German Representations of the Far North (17th-19th Centuries) Jan Borm, Joanna Kodzik, 2020-11-24 German travellers explorers missionaries and scholars produced significant new knowledge about the Arctic in Europe and elsewhere from the 17th until the 19th century However until now no English language study or collective volume has been dedicated to their representations of the Arctic Possibly due to linguistic barriers this corpus has not been sufficiently taken into account in transnational and circumpolar approaches to the fast growing field of Arctic Studies This volume serves to heighten awareness about the importance of these writings in view of the history of the Far North The chapters gathered here offer critical readings of manuscripts and publications including travelogues natural histories of the Arctic newspaper articles and scholarly texts based on first hand observations as well as works of fiction The sources are considered in their historical context as political religious social economic and cultural aspects are discussed in relation to discourses about the Arctic in general The volume opens with a spirited preface by Professor Jean Malaurie France s most distinguished Arctic specialist and author of *The Last Kings of Thule* 1955

The Vinland Sagas ,1973-09-27 One of the most arresting stories in the history of exploration these two Icelandic sagas tell of the discovery of America by Norsemen five centuries before Christopher Columbus Together the direct forceful twelfth century Graenlendinga Saga and the more polished and scholarly Eirik s Saga written some hundred years later recount how Eirik the Red founded an Icelandic colony in Greenland and how his son Leif the Lucky later sailed south to explore and if possible exploit the chance discovery by Bjarni Herjolfsson of an unknown land In spare and vigorous prose they record Europe s first surprise glimpse of the eastern shores of the North American continent and the natives who inhabited them

Asia and the Arctic Vijay Sakhuja, Kapil Narula, 2016-09-26 This book presents narratives perspectives and policies on the Arctic and brings to fore the strategies of five Asian countries China India Japan Republic of Korea and Singapore who were granted the status of Permanent Observers in the Arctic Council in 2013 The book also captures Arctic countries reactions to Asian approaches and their expectations from these countries The melting of the polar sea ice induced by climate change has placed the Arctic region in the forefront of global scientific economic strategic and academic interest The discourse involves a number of issues such as claims of the littoral countries to the continental shelves of the region the management and exploitation of its living and non living resources the rights and interests of indigenous communities and the prospects of new ice free shipping routes The contemporary discourse also suggests that the Arctic region presents challenges and offers opportunities for the international community These issues have given rise to new geopolitical geoeconomic and geostrategic dynamics amongst the Arctic littorals and led to the growing interest of non Arctic states in the affairs of the Arctic It is evident that the Asian countries have a variety of interests in the Arctic and the grant of

Permanent Observer status to these countries is an acknowledgement of their capabilities These countries are keen to explore opportunities in the Arctic and have begun to formulate appropriate long term national strategies The preliminary approach of the Asian Observer countries has rightly been to graduate from involvement to engagement in the Arctic which seems to have generated significant interest amongst analysts This book helps to understand the approaches of various Arctic and non Arctic stakeholders in light of the evolving dynamics in the region **Selection of Reports and Papers of the House of Commons** ,1836 **Minutes of Evidence** Miners' Lamps Committee,1922
