Design and Test Technology for Dependable Systems-on-Chip Ubar, Raimund, Raik, Jaan, Vierhaus, Heinrich Theodor, 2010-12-31 This book covers aspects of system design and efficient modelling and also introduces various fault models and fault mechanisms associated with digital circuits integrated into System on Chip SoC Multi Processor System on Embedded Processor-Based Self-Test Dimitris Gizopoulos, A. Paschalis, Yervant Chip MPSoC or Network on Chip NoC Zorian, 2013-03-09 Embedded Processor Based Self Test is a guide to self testing strategies for embedded processors Embedded processors are regularly used today in most System on Chips SoCs Testing of microprocessors and embedded processors has always been a challenge because most traditional testing techniques fail when applied to them This is due to the complex sequential structure of processor architectures which consists of high performance datapath units and sophisticated control logic for performance optimization Structured Design for Testability DfT and hardware based self testing techniques which usually have a non trivial impact on a circuit's performance size and power can not be applied without serious consideration and careful incorporation into the processor design Embedded Processor Based Self Test shows how the powerful embedded functionality that processors offer can be utilized as a self testing resource Through a discussion of different strategies the book emphasizes on the emerging area of Software Based Self Testing SBST SBST is based on the idea of execution of embedded software programs to perform self testing of the processor itself and its surrounding blocks in the SoC SBST is a low cost strategy in terms of overhead area speed power development effort and test application cost as it is applied using low cost low speed test equipment Embedded Processor Based Self Test can be

used by designers DfT engineers test practitioners researchers and students working on digital testing and in particular processor and SoC test This book sets the framework for comparisons among different SBST methodologies by discussing key requirements It presents successful applications of SBST to a number of embedded processors of different complexities and instruction set architectures **FPGAs and Parallel Architectures for Aerospace Applications** Fernanda Kastensmidt, Paolo Rech, 2015-12-07 This book introduces the concepts of soft errors in FPGAs as well as the motivation for using commercial off the shelf COTS FPGAs in mission critical and remote applications such as aerospace The authors describe the effects of radiation in FPGAs present a large set of soft error mitigation techniques that can be applied in these circuits as well as methods for qualifying these circuits under radiation Coverage includes radiation effects in FPGAs fault tolerant techniques for FPGAs use of COTS FPGAs in aerospace applications experimental data of FPGAs under radiation FPGA embedded processors under radiation and fault injection in FPGAs Since dedicated parallel processing architectures such as GPUs have become more desirable in aerospace applications due to high computational power GPU analysis under <u>Index of Conference Proceedings</u> British Library. Document Supply Centre, 2003 radiation is also discussed Software for Unreliable Hardware Semeen Rehman, Muhammad Shafique, Jörg Henkel, 2016-04-20 This book describes novel software concepts to increase reliability under user defined constraints. The authors approach bridges for the first time the reliability gap between hardware and software Readers will learn how to achieve increased soft error resilience on unreliable hardware while exploiting the inherent error masking characteristics and error stemming from soft errors aging and process variations mitigations potential at different software layers **Fault Detection** Wei Zhang, 2010-03-01 In this book a number of innovative fault diagnosis algorithms in recently years are introduced These methods can detect failures of various types of system effectively and with a relatively high significance Gain-Cell Embedded DRAMs for Low-Power VLSI Systems-on-Chip Pascal Meinerzhagen, Adam Teman, Robert Giterman, Noa Edri, Andreas Burg, Alexander Fish, 2017-07-06 This book pioneers the field of gain cell embedded DRAM GC eDRAM design for low power VLSI systems on chip SoCs Novel GC eDRAMs are specifically designed and optimized for a range of low power VLSI SoCs ranging from ultra low power to power aware high performance applications After a detailed review of prior art GC eDRAMs an analytical retention time distribution model is introduced and validated by silicon measurements which is key for low power GC eDRAM design The book then investigates supply voltage scaling and near threshold voltage NTV operation of a conventional gain cell GC before presenting novel GC circuit and assist techniques for NTV operation including a 3 transistor full transmission gate write port reverse body biasing RBB and a replica technique for optimum refresh timing Next conventional GC bitcells are evaluated under aggressive technology and voltage scaling down to the subthreshold domain before novel bitcells for aggressively scaled CMOS nodes and soft error tolerance as presented including a 4 transistor GC with partial internal feedback and a 4 transistor GC with built in redundancy IoT and Cloud Computing Advancements in Vehicular Ad-Hoc Networks

Computer Safety, Reliability, and Security Bettina Buth, Gerd Rabe, Till Seyfarth, 2009-09-03 Computer based systems have become omnipresent commodities within our vironment While for a large variety of these systems such as transportation systems nuclear or chemical plants or medical systems their relation to safety is obvious we often do not re ect that others are as directly related to risks concerning harm done to persons or matter as for example elevator control or mobile phones At least we are not aware of the risk in our daily use of them Safecomp as a community and a conference series has accompanied this velopment for 30 years up to Safecomp 2009 which was the 28th of the series During this time the topics and methods as well as the community have und gone changes These changes re ect the requirements of the above mentioned ubiquitious presence of safety related systems Safecomp has always encouraged and will further encourage academia and industry to share and exchange their ideas and experiences After 30 years we as the organizers of Safecomp 2009 found it imperative to take stock which methods found their way into the application areas which new approaches need to be checked for their practical applicability As di erent application domains developed their own approaches over the previous decades we tried to attract people with di erent backgrounds for this conference though the years 2008 and 2009 were not easy with regard to the overall global economic situation we succeeded with this goal **Proceedings**, 2005
