White, 2001-01-31 When approached by Plenum to put together a volume of social science research on the topic of youth and justice I found the interdisciplinary challenge of such a project intriguing Having spent 2 years as Director of the Law and Social Science Program at the National Science Foundation I was well aware of the rich diversity of research that could fit within that topic I also knew that excellent research on youth and justice was coming from different communities of researchers who often were isolated from each other in their respective disciplines as psychologists sociologists criminologists or policy analysts I saw this project as an opportunity to break down some of this isolation by introducing these researchers and their work to each other and to the broader community of social scientists interested in law and justice There was another gap or set of gaps to be bridged as well The juvenile justice system and the criminal justice system differ in significant ways and the civil justice system which is a major venue for issues of youth and justice is yet another separate world Few researchers are likely to know the whole picture For example a focus on juvenile justice often ignores the extent to which civil justice proceedings shape the lives of young people through divorce custody adoption family preservation policies and other actions and vice versa *Ministry with Youth in Crisis, Revised Edition* Harley T. Atkinson, W. Lee Barnett, Michael Severe, 2016-11-09 Ministry with Youth in Crisis is a comprehensive treatment of major adolescent crises related to life themes including self identity faith formation family life social relationships sexuality suicide substance abuse and eating disorders The distinctiveness of this book is that it offers a fine blend of solid research workable theory and specific strategies for successfully ministering to and with youth in crisis Furthermore it emphasizes the caring and sensitive side of working effectively with adolescents experiencing both normal and extreme crisis situations This volume therefore is both descriptive and prescriptive in nature in that it describes the world teens live in and offers biblical responses for ministry **Integrated Developmental and Life-course Theories of Offending** David P. relationships that's what you hear in the news. The media through its dramatization of the dangers and risks children confront and pose have created a well established image of disenfranchised hostile and often destructive children and adolescents. This image ignores the many children who are thriving as well as the possibility of positive outcomes for children and youth. With children comprising roughly 30% of the global population almost 2 billion children worldwide understanding exactly what leads children to grow into confident caring responsible adults is an issue that belongs at the forefront of every nation's agenda. Increasingly it is understood that we need not only to prevent negative outcomes but to promote positive outcomes.

Preventing Violence in America Robert L. Hampton, Pamela Jenkins, Thomas P. Gullotta, 1996. What can be done to address the problem of violence in society? The book discusses such issues as the disproportionate presence of violence within North American minority populations, the concept of psychological resiliency, how spirituality may serve as a protective factor and the role of television in promoting violence. The contributors also address prevention and intervention strategies among gangs of young people and the implementation of special programmes in schools.

Youth Ministry Malan Nel,2018-12-01 This book aims at contributing to the scientific and academic discourse as regards to the what and why of youth ministry Too often youth ministry has been approached from a mainly practical point of view almost asking how we keep young people off the streets Its methodology has often not included the theological and theoretical presuppositions that lie behind this ministry Previous scientific reflection has been determined by a one dimensional and almost exclusive point of view In comparison with existing literature this book does not focus so much on the how of youth ministry It innovates a different approach The book challenges the existing exclusive approach and develops an inclusive congregational and missional understanding of and approach to youth ministry From a particular perspective on the understanding the main objectives of Practical Theology the author endorses the so called movement of what is supposed to be going on He adds the outcome of an empirical round table discussion with some 16 leaders in this field on the descriptive and interpretive movements within the subject field what is going on and why is it going on The book will form the standard for any new research with regard to youth ministry The book s contribution lies on the level of sound theological reasoning and argumentation supported by many scholars for an inclusive congregational understanding of ministry as an integral part of every congregation being missional in being and doing Youth children adolescents and emerging adults are just as integral a part of every congregation within which they live and serve
