## **Reciprocals Forms Functions:**

*Reciprocals* Zygmunt Frajzyngier, Traci Walker, 2000-03-15 The theoretical issues addressed in the present volume are semantic and cognitive properties of reciprocal events syntactic properties of reciprocals and the relationship of reciprocals to other grammatical categories Several papers discuss the history of reciprocal constructions offering alternative hypotheses regarding the grammaticalization of reciprocals The formal functional typological and historical approaches in the present volume complement each other contributing together to the understanding of forms and syntactic and semantic properties of reciprocal markers Several papers in the present volume make a double contribution to the problems of reciprocal constructions they provide new descriptive data and they address theoretical issues at the same time The languages discussed include English Dutch German Greek Polish Nyulnyulan Australia Amharic Ethio Semitic Bilin Cushitic Chadic languages Bantu Halkomelem Salishan Mandarin Yukaghir and a number of Oceanic languages The volume also includes a study of grammaticalization of reciprocals and reflexives in African languages *Reciprocals* Zygmunt

Frajzyngier, Traci S. Curl, 2000 The theoretical issues addressed in the present volume are semantic and cognitive properties of reciprocal events syntactic properties of reciprocals and the relationship of reciprocals to other grammatical categories Several papers discuss the history of reciprocal constructions offering alternative hypotheses regarding the grammaticalization of reciprocals The formal functional typological and historical approaches in the present volume complement each other contributing together to the understanding of forms and syntactic and semantic properties of reciprocal markers Several papers in the present volume make a double contribution to the problems of reciprocal constructions they provide new descriptive data and they address theoretical issues at the same time The languages discussed include English Dutch German Greek Polish Nyulnyulan Australia Amharic Ethio Semitic Bilin Cushitic Chadic languages Bantu Halkomelem Salishan Mandarin Yukaghir and a number of Oceanic languages The volume also includes a study of grammaticalization of reciprocals and reflexives in African languages *Reflexives* Zygmunt Frajzyngier, Traci S.

Curl, 2000 This text examines the forms and functions of reflexives Even when analyses have been conducted from different theoretical perspectives the volume indicates a certain degree of convergence of results The papers offer a variety of

approaches aiming to be of use in a variety of linguistic fields **Reciprocals and Semantic Typology** Nicholas Evans, Alice Gaby, Stephen C. Levinson, Asifa Majid, 2011-08-18 Reciprocals are an increasingly hot topic in linguistic research This reflects the intersection of several factors the semantic and syntactic complexity of reciprocal constructions their centrality to some key points of linguistic theorizing such as Binding Conditions on anaphors within Government and Binding Theory and the centrality of reciprocity to theories of social structure human evolution and social cognition No existing work however tackles the question of exactly what reciprocal constructions mean cross linguistically Is there a single Platonic reciprocal meaning found in all languages or is there a cluster of related concepts which are nonetheless impossible to

characterize in any single way That is the central goal of this volume and it develops and explains new techniques for tackling this question At the same time it confronts a more general problem facing semantic typology how to investigate a category cross linguistically without pre loading the definition of the phenomenon on the basis of what is found in more familiar languages

**Reciprocal Constructions** Vladimir P. Nedjalkov, 2007-11-06 This monograph constitutes the first comprehensive investigation of reciprocal constructions and related phenomena in the world's languages Reciprocal constructions of the type The two boys hit each other The poets admire each other's poems have often been the subject of language particular studies but it is only in this work that a truly global comparative picture emerges Nine stage setting chapters dealing with general and theoretical matters are followed by 40 chapters containing in depth descriptions of reciprocals in individual languages by renowned specialists The introductory papers provide a conceptual and terminological framework that allows the authors of the individual chapters to characterize their languages in comparable terms making it easy for the reader to see points of commonality between languages and constructions that have never been compared before This set of volumes is an indispensable starting point and will be a lasting reference work for any future studies of reciprocals

*Motion, Direction and Location in Languages* Erin Shay, Uwe Seibert, 2003-01-01 This book contributes to an area of study that is of interest to linguists of all backgrounds Typological in nature this volume presents data analysis from the major language families of Africa as well as Sino Tibetan Austronesian Japanese Indo European Siouan and Penutian The 16 contributors to the volume share a commitment to examining the language phenomena pertaining to the volume's theme with a fresh eye While most of the papers make reference to existing theoretical frameworks each also makes a novel and sometimes surprising contribution to the body of knowledge and theory concerning motional directional and locational predicates complements morphology adpositions and other phenomena This collection of articles suitably complements courses on comparative and diachronic linguistics semantics syntax typology or field methods

**Reciprocals and Reflexives** Ekkehard König, Volker Gast, 2008-11-06 This collection of original papers is a representative survey of recent theoretical and cross linguistic work on reciprocity and reflexivity Its most remarkable feature is its combination of formal approaches case studies on individual languages and broad typological surveys in one volume showing that the interaction of formal approaches to grammar and typology may lead to new insights and results for both fields Among the major issues addressed in this volume are the following How can our current knowledge about the space and limits of variation in the relevant domain be captured in a structural typology of reciprocity What light can such a typology shed on the facts of particular languages or groups of languages e.g. Austronesian How can recent descriptive and typological insights be incorporated into a revised and more adequate version of the Binding Theory How do verbal semantics argument structure and reciprocal markers interact How can we explain the pervasive patterns of ambiguity observable in these two domains especially the use of the same forms both as reflexive and reciprocal markers What are the major sources in the historical

development of reciprocal markers This combination of large scale typological surveys with in depth studies of particular languages provides new answers to old questions and raises important new questions for future research Interaction of Morphology and Syntax Zygmunt Frajzyngier, Erin Shay, 2008-05-21 The present volume deals with hitherto unexplored issues on the interaction of morphology and syntax These selected and invited papers mainly concern Cushitic and Chadic languages the least described members of the Afroasiatic family Three papers in the volume explore one or more typological characteristics across an entire language family or branch while others focus on one or two languages within a family and the implications of their structures for the family the phylum or linguistic typology as a whole The diversity of topics addressed within the present volume reflects the great diversity of language structures and functions within the Afroasiatic phylum

**Modality** **Aspect Interfaces** Werner Abraham, Elisabeth Leiss, 2008-06-26 The main topics pursued in this volume are based on empirical insights derived from Germanic logical and typological dispositions about aspect modality links These are probed in a variety of non related languages The logically establishable links are the following Modal verbs are aspect sensitive in the selection of their infinitival complements embedded infinitival perfectivity implies root modal reading whereas embedded infinitival imperfectivity triggers epistemic readings However in marked contexts such as negated ones the aspectual affinities of modal verbs are neutralized or even subject to markedness inversion All of this suggests that languages that do not or only partially bestow upon full modal verb paradigms seek to express modal variations in terms of their aspect oppositions This typological tenet is investigated in a variety of languages from Indo European German Slavic Armenian African Asian Amerindian and Creoles Seeming deviations and idiosyncrasies in the interaction between aspect and modality turn out to be highly rule based

**Adpositions** Dennis Kurzon, Silvia Adler, 2008 This book is a collection of articles which deal with adpositions in a variety of languages and from a number of perspectives Not only does the book cover what is traditionally treated in studies from a European and Semitic orientation prepositions but it presents studies on postpositions too The main languages dealt with in the collection are English French and Hebrew but there are articles devoted to other languages including Korean Turkic languages Armenian Russian and Ukrainian Adpositions are treated by some authors from a semantic perspective by others as syntactic units and a third group of authors distinguishes adpositions from the point of view of their pragmatic function This work is of interest to students and researchers in theoretical and applied linguistics as well as to those who have a special interest in any of the languages treated

*The Syntax of Anaphora* Kenneth J. Safir, 2004-04-08 In this work Ken Safir develops a comprehensive theory on the role of anaphora in syntax First he contends that the complementary distribution of forms that support the anaphoric readings is not accidental contrary to most current thinking but rather should be derived from a principle one that he proposes in the form of an algorithm Secondly he maintains that dependent identity relations are always possible where they are not prohibited by a constraint Lastly he proposes that there are no parameters of anaphora that all anaphora specific principles are universal and that the

patterns of anaphora across languages arise entirely from a restricted set of lexical properties This comprehensive consideration of anaphora redirects current thinking on the subject

**Proto-Australian** Mark Harvey, Robert Mailhammer, 2024-08-19 This book is the first full evaluation of the Proto Australian hypothesis which proposes that most Australian languages have a common ancestor Proto Australian PA Using the standard methodologies of historical linguistics the authors show that nearly all Australian languages descend from PA Given that PA was a single language it was spoken only in a small area of Australia Its descendants have spread across the continent Current theories of language spread do not offer clear motivations for large scale spread in hunter gatherer economies This raises significant questions for analyses of Australian prehistory and archaeology specifically and more widely for general theories of hunter gatherer prehistory and language spread

**Case and Grammatical Relations** Greville G. Corbett, Michael P. Noonan, 2008 The papers in this volume can be grouped into two broad overlapping classes those dealing primarily with case and those dealing primarily with grammatical relations With regard to case topics include descriptions of the case systems of two Caucasian languages the problems of determining how many cases Russian has and whether Hungarian has a case system at all the issue of case combining the retention of the dative in Swedish dialects and genitive objects in the languages of Europe With regard to grammatical relations topics include the order of obliques in OV and VO languages the effects of the referential hierarchy on the distribution of grammatical relations the problem of whether the passive requires a subject category the relation between subjecthood and definiteness and the issue of how the loss of case and aspectual systems triggers the use of compensatory mechanisms in heritage Russian

**Crosslinguistic Studies of Clause Combining** Ritva Laury, 2008 The study of clause combining has been advanced lately by increasing interest in the study of actual language use in a typologically diverse set of languages A number of received understandings have been challenged among these the idea of clause combinations as being divisible into subordination and coordination in a binary fashion Connected to this idea is the nature of conjunctions a topic treated in several articles here Couched within the larger issue of the nature of categoriality in language several of the papers show that conjunctions are highly polyfunctional items and that clause combining is only one of the uses to which speakers put them Other topics treated in the volume are the historical development of conjunctions and the use of formulaic main clause constructions as projective units in conversation The articles manifest both typological and theoretical breadth They are based on data from Bulgarian English Estonian Finnish Indonesian Japanese and Spanish The theoretical approaches include discourse functional interactional historical and generative linguistics

**Formulaic Language: Distribution and historical change** Roberta Corrigan, 2009-01-01 Printbegr nsninger Der kan printes 10 sider ad gangen og max 40 sider pr session

The Linguistics of Eating and Drinking John Newman, 2009-03-11 This volume reviews a range of fascinating linguistic facts about ingestive predicates in the world's languages The highly multifaceted nature of eat and drink events gives rise to interesting clausal properties of these predicates such as the atypicality of transitive constructions

involving eat and drink in some languages The two verbs are also sources for a large number of figurative uses across languages with meanings such as destroy and savour as well as participating in a great variety of idioms which can be quite opaque semantically Grammaticalized extensions of these predicates also occur such as the quantificational use of Hausa shaa drink meaning roughly do X frequently regularly Specialists discuss details of the use of these verbs in a variety of languages and language families Australian languages Papuan languages Athapaskan languages Japanese Korean Hausa Amharic Hindi Urdu and Marathi

**Negation Patterns in West African Languages and Beyond** Norbert Cyffer, Erwin Ebermann, Georg Ziegelmeyer, 2009 This volume deals with issues on negation patterns in languages of West Africa and the adjacent north and east The first aim is to provide data on various aspects of negation in African languages Although the topics addressed here reflect a great diversity of negation patterns the following typological features have been identified to be prominent in our region conflict or even incompatibility between negation and focus use of other indirect means of negating non indicative mood covered under the term Prohibitive different negation patterns in different Tense Aspect Moods e g Imperfective vs Perfective lack of negative indefinites and disjunctive negative marking often referred to as double negation The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond On the other hand genetic factors seem to be less prominent

A Typology of Purpose Clauses Karsten Schmidtke-Bode, 2009-10-22 wThis book presents the first comprehensive typology of purpose clause constructions in the world s languages Based on a stratified variety sample of 80 languages it uncovers the unity and diversity of the morphosyntactic means by which purposive relations are coded and discusses the status of purpose clauses in the syntactic and conceptual space of complex sentences Explanations for significantly recurrent coding patterns are couched in a usage based approach to language structure which pays due attention to the cognitive and communicative pressures on usage events involving purpose clauses to frequency distributions of grammatical choices in corpora and to the ways in which usage preferences conventionalize in pathways of diachronic change The book integrates diverse previous strands of research on purpose clauses with a thorough empirical analysis in its own right and thus reflects the current state of the art of crosslinguistic research into this distinctive type of adverbial clause An appendix to A Typology of Purpose Clauses can be found on the author s website [www.karsten-schmidtke.net/purpose](http://www.karsten-schmidtke.net/purpose)

**Formulaic Language** Roberta Corrigan, 2009 This book is the second of the two volume collection of papers on formulaic language The collection is among the first in the field The authors of the papers in this volume represent a diverse group of international scholars in linguistics and psychology The language data analyzed come from a variety of languages including Arabic Japanese Polish and Spanish and include analyses of styles and genres within these languages While the first volume focuses on the very definition of linguistic formulae and on their grammatical semantic stylistic and historical aspects the second volume explores how formulae are acquired and lost by speakers of a language in what way they are psychologically real and what their functions

in discourse are Since most of the papers are readily accessible to readers with only basic familiarity with linguistics the book may be used in courses on discourse structure pragmatics semantics language acquisition and syntax as well as being a resource in linguistic research      *Variations on Polysynthesis* Marc-Antoine Mahieu,Nicole Tersis,2009-04-08 This work is comprised of a set of papers focussing on the extreme polysynthetic nature of the Eskaleut languages which are spoken over the vast area stretching from Far Eastern Siberia on through the Aleutian Islands Alaska and Canada as far as Greenland The aim of the book is to situate the Eskaleut languages typologically in general linguistic terms particularly with regard to polysynthesis The degree of variation from more to less polysynthesis is evaluated within Eskaleut Inuit Yupik vs Aleut even in previously insufficiently explored domains such as pragmatics and use in context including language contact and learning situations and over typologically related language families such as Athabascan Chukotko Kamchatkan Iroquoian Uralic and Wakashan
