Reconceptions In Philosophy And Other Arts And Sciences

Rupert Read, Kenneth Richman

Reconceptions In Philosophy And Other Arts And Sciences:

Reconceptions in Philosophy and Other Arts and Sciences Nelson Goodman, Catherine Z. Elgin, 1988-01-01 The authors argue against certain philosophical distinctions between art and science between verbal and nonverbal meaning and between the affective and the cognitive The book continues Goodman's argument against one traditional mode of philosophizing which privileges the notions of truth and knowledge Hence the book is in a broadly pragmatic tradition It also deals in detail with such topics as meaning in architecture and the concept of variation in art and contains a superb critique of some important views in contemporary epistemology This work will be savored even by those who will not accept all aspects of Goodman and Elgin's approach Essential for all undergraduate philosophy collections Stanley Bates Choice

Understanding and Conscious Experience Andrei Ionuț Măărăsoiu, Mircea Dumitru, 2024-09-02 This volume explores how understanding relates to conscious experience In doing so it builds bridges between different philosophical disciplines and provides a metaphysically robust characterization of understanding both in and beyond science The past two decades have witnessed growing interest from epistemologists philosophers of science philosophers of mind and ethicists in the nature and value of intellectual understanding This volume features original essays on understanding and the phenomenal experiences that underlie it The chapters are divided into three thematic sections Part 1 provides theoretical characterizations of understanding including Henk de Regt's defense of a contextual theory of scientific understanding and a debate on whether scientific inference and explanatory power are necessary or central features of understanding Part 2 explores how conscious experience and understanding are related The chapters articulate a phenomenal theory of understanding and address themes that are connected to understanding including awareness transformative experiences and exemplification Finally Part 3 is devoted to domain specific inquiries about understanding such as logical proofs particle physics and moral understanding Understanding and Conscious Experience will be of interest to scholars and advanced students working in the philosophy of science epistemology philosophy of mind ethics and phenomenology

Nelson Goodman and Modern Architecture

Kasper Lægrring, 2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman's aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman's aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman's concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman's framework the book aims to address accusations of emptiness and

alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics **Nelson Goodman's Theory of Symbols and Its Applications** Catherine Z. Elgin, 1997 A challenger of traditions and boundaries A pivotal figure in 20th century philosophy Nelson Goodman has made seminal contributions to metaphysics epistemology aesthetics and the philosophy of language with surprising connections that cut across traditional boundaries In the early 1950s Goodman Quine and White published a series of papers that threatened to torpedo fundamental assumptions of traditional philosophy They advocated repudiating analyticity necessity and prior assumptions Some philosophers realizing the seismic effects repudiation would cause argued that philosophy should retain the familiar framework Others considered the arguments compelling but despaired of doing philosophy without the framework Goodman disagreed with both factions Rather than regretting the loss of structure he capitalized on the opportunities that arise when the strictures of tradition are loosened *Beyond the Troubled Water of Shifei* Lin Ma, Jaap van Brakel, 2019-06-01 Offers the first focused study of the shifei debates of the Warring States period in ancient China and challenges the imposition of Western conceptual categories onto these debates In recent decades a growing concern in studies in Chinese intellectual history is that Chinese classics have been forced into systems of classification prevalent in Western philosophy and thus imperceptibly transformed into examples that echo Western philosophy Lin Ma and Jaap van Brakel offer a methodology to counter this approach and illustrate their method by carrying out a transcultural inquiry into the complexities involved in understanding shi and fei and their cognate phrases in the Warring States texts the Zhuangzi in particular The authors discuss important features of Zhuangzi's stance with regard to language meaning knowledge doubt questioning equalizing and his well known deconstruction of the discourse in ancient China on shifei Ma and van Brakel suggest that shi and fei apply to both descriptive and prescriptive languages and do not presuppose any fact value dichotomy and thus cannot be translated as either true false or right wrong Instead shi and fei can be grasped in terms of a pre philosophical notion of fitting Ma and van Brakel also highlight Zhuangzi's idea of walking two roads as the most significant component of his stance In addition they argue that all of Zhuangzi's positive recommendations are presented in a language whose meaning is not fixed and that every stance he is committed to remains subject to fundamental questioning as a way of life **Epistemic Autonomy** Jonathan Matheson, Kirk Lougheed, 2021-08-05 This is the first book dedicated to the topic of epistemic autonomy It features original essays from leading scholars that promise to significantly shape future debates in this emerging area of epistemology While the nature of and value of autonomy has long been discussed in ethics and social and political philosophy it remains an underexplored area of epistemology The essays in this collection take up several interesting questions and approaches related to epistemic autonomy Topics include the nature of epistemic autonomy whether epistemic paternalism can be

justified autonomy as an epistemic value and or vice and the relation of epistemic autonomy to social epistemology and epistemic injustice Epistemic Autonomy will be of interest to researchers and advanced students working in epistemology ethics and social and political philosophy

Goodman for Architects Remei Capdevila-Werning, 2013-10-15 American philosopher Nelson Goodman 1906 1998 was one of the foremost analytical thinkers of the twentieth century with groundbreaking contributions in the fields of logic philosophy of science epistemology and aesthetics This book is an introduction to the aspects of Goodman s philosophy which have been the most influential among architects and architectural theorists Goodman specifically discussed architecture in his major work on aesthetics *The Languages of Art An Approach to a Theory of Symbols* 1968 and in two essays *How Buildings Mean* 1985 and *On Capturing Cities* 1991 His main philosophical notions in *Ways of Worldmaking* 1978 also apply well to architecture Goodman s thought is particularly attractive because of its constructive aspect there is not a given and immutable world but both knowledge and reality are constantly built and rebuilt Whereas other theories such as deconstruction implicitly entail an undoing of modern precepts Goodman s conception of world making offers a positive constructive way to understand how a plural reality is made and remade Goodman s approach to architecture is not only relevant thinking in providing new insights to understanding the built environment but serves also as an illustration of analytical thinking in architecture This book shows that the methods concepts and ways of arguing characteristic of analytical philosophy are helpful tools to examine buildings in a novel and fruitful way and they will certainly enhance the architect s critical skills when designing and thinking about architecture

Music and Conceptualization Mark DeBellis, 1995-10-27 This book is a philosophical study of the relations between hearing and thinking about music The central problem it addresses is as follows how is it possible to talk about what a listener perceives in terms that the listener does not recognize By applying the concepts and techniques of analytic philosophy the author explores the ways in which musical hearing may be described as nonconceptual and how such mental representation contrasts with conceptual thought

Reason and the Nature of Texts James L. Battersby, 2016-11-11 Many of today s most prominent critics and teachers of literature insist on the endless deferral of textual meaning and on the social construction of meaning and thought Against these markers of current critical theory James L Battersby argues for the authorial construction of determinate textual meaning insisting that to think about anything at all we must be able to refer to it and that such references are necessarily the semantic consequences of an author s deliberate intentional acts Propelling Battersby s argument is his use of principles and arguments drawn from current philosophical literature on language and mind Battersby reveals the philosophical shortcomings and argumentative weaknesses of some of the most prominent and influential doctrines in critical theory today especially and principally those that inform and define postmodernism in both its linguistic and historicist materialist modes As he argues for a fresh conception of our understanding of language mind and meaning Battersby probes the critical positions of among others Stanley Fish Mikhail Bakhtin Paul de Man and Jacques

Derrida Making room for an alternative and Battersby asserts more intellectually appealing framework requires a skeptical dissection of the linguistic and historicist tenets that form the foundation of poststructuralism The striking outcome of his effort is a book as lively erudite theoretically informed and provocative as his earlier Paradigms Regained Film, Art, and the Third Culture Murray Smith, 2017-03-24 In the mid 1950s C P Snow began his campaign against the two cultures the debilitating divide as he saw it between traditional literary intellectual culture and the culture of the sciences urging in its place a third culture which would draw upon and integrate the resources of disciplines spanning the natural and social sciences the arts and the humanities Murray Smith argues that with the ever increasing influence of evolutionary theory and neuroscience and the pervasive presence of digital technologies Snow s challenge is more relevant than ever Working out how the scientific and everyday images of the world hang together is no simple matter In Film Art and the Third Culture Smith explores this question in relation to the art technology and science of film in particular and to the world of the arts and aesthetic activity more generally In the first part of his book Smith explores the general strategies and principles necessary to build a third cultural or naturalized approach to film and art one that roots itself in an appreciation of scientific knowledge and method Smith then goes on to focus on the role of emotion in film and the other arts as an extended experiment in the third cultural integration of ideas on emotion spanning the arts humanities and sciences While acknowledging that not all of the questions we ask are scientific in nature Smith contends that we cannot disregard the insights wrought by taking a naturalized approach to the aesthetics of film and the other arts From a Metaphorical Point of View Zdravko Radman, 2015-03-30 No detailed description available for From a Metaphorical Point of View Dictionary of Untranslatables Barbara Cassin, Emily Apter, Jacques Lezra, Michael Wood, 2014-02-09 Characters in some languages particularly Hebrew and Arabic may not display properly due to device limitations Transliterations of terms appear before the representations in foreign characters This is an encyclopedic dictionary of close to 400 important philosophical literary and political terms and concepts that defy easy or any translation from one language and culture to another Drawn from more than a dozen languages terms such as Dasein German pravda Russian saudade Portuguese and stato Italian are thoroughly examined in all their cross linguistic and cross cultural complexities Spanning the classical medieval early modern modern and contemporary periods these are terms that influence thinking across the humanities The entries written by more than 150 distinguished scholars describe the origins and meanings of each term the history and context of its usage its translations into other languages and its use in notable texts The dictionary also includes essays on the special characteristics of particular languages English French German Greek Italian Portuguese Russian and Spanish Originally published in French this one of a kind reference work is now available in English for the first time with new contributions from Judith Butler Daniel Heller Roazen Ben Kafka Kevin McLaughlin Kenneth Reinhard Stella Sandford Gayatri Chakravorty Spivak Jane Tylus Anthony Vidler Susan Wolfson Robert J C Young and many more The result is an invaluable reference for

students scholars and general readers interested in the multilingual lives of some of our most influential words and ideas
Covers close to 400 important philosophical literary and political terms that defy easy translation between languages and cultures
Includes terms from more than a dozen languages
Entries written by more than 150 distinguished thinkers
Available in English for the first time with new contributions by Judith Butler Daniel Heller Roazen Ben Kafka Kevin McLaughlin Kenneth Reinhard Stella Sandford Gayatri Chakravorty Spivak Jane Tylus Anthony Vidler Susan Wolfson Robert J C Young and many more
Contains extensive cross references and bibliographies
An invaluable resource for students and scholars across the humanities

The Value of Emotions for Knowledge Laura Candiott, 2019-04-23 This innovative new volume analyses the role of emotions in knowledge acquisition It focuses on the field of philosophy of emotions at the exciting intersection between epistemology and philosophy of mind and cognitive science to bring us an in depth analysis of the epistemological value of emotions in reasoning With twelve chapters by leading and up and coming academics this edited collection shows that emotions do count for our epistemic enterprise Against scepticism about the possible positive role emotions play in knowledge the authors highlight the how and the why of this potential lucidly exploring the key aspects of the functionality of emotions This is explored in relation to specific kinds of knowledge such as self understanding group knowledge and wisdom specific functions played by certain emotions in these cases such as disorientation in enquiry and contempt in practical reason the affective experience of the epistemic subjects and communities

The Ethics of Belief Jonathan Matheson, Rico Vitz, 2014-08-14 How do people form beliefs and how should they do so This book presents seventeen new essays on these questions drawing together perspectives from philosophy and psychology The first section explores the ethics of belief from an individualistic framework It begins by examining the question of doxastic voluntarism i e the extent to which people have control over their beliefs It then shifts to focusing on the kinds of character that epistemic agents should cultivate what their epistemic ends ought to be and the way in which these issues are related to other traditional questions in epistemology The section concludes by examining questions of epistemic value of whether knowledge is in some sense primary and of whether the ethics of belief falls within the domain of epistemology or ethics The second section extends this traditional debate to issues concerning the social dimensions of belief formation It begins with essays by social psychologists discussing the past three decades of research in lay epistemics It continues by examining Humean Kantian and feminist insights into the social aspects of belief formation as well as questions concerning the ethics of assertion The section concludes with a series of essays examining a topic that is currently of great interest to epistemologists namely the significance of peer disagreement

Contours of Privacy David Matheson, 2009-01-14 The contours of privacy its particular forms and our reasons for valuing it are numerous and varied This book explores privacy s contours in a series of essays on such themes as the relationship between privacy and social accountability privacy in and beyond anonymity the psychology of privacy and the privacy concerns of emerging information technologies The book s international and

multidisciplinary group of contributors provides rich insights about privacy that will be of great interest not only to the scholarly privacy community at large but also to professionals academics and laypersons who understand that the contours of privacy weave themselves throughout wide swaths of life in present day society The stylistically accessible yet scholarly rigorous nature of The Contours of Privacy along with the diversity of perspectives it offers set it apart as one of the most important additions to the privacy literature on the contemporary scene Aesthetics and Literature David

Davies,2007-08-19 Reading is an essential life skill it can raise intelligence and develop confidence in learning Susan Elkin s handy introductory guide outlines teaching concepts and practical strategies to encourage reading both in and out of the classroom Topics covered include Creative suggestions to encourage reading in all age groups Ideas to support reading for pleasure as well as for information gathering Making the most of schemes offering incentives for children to read This is essential reading for all teachers **Defining Cinema** Peter Lehman,1997 On film studies **The New Hume Debate**

Rupert Read,Kenneth Richman,2002-11 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **The Oxford Handbook of Interdisciplinarity** Robert Frodeman,Julie Thompson Klein,Roberto C. S. Pacheco,2017 Interdisciplinarity has become as important outside academia as within Academics policy makers and the general public seek insights to help organize the vast amounts of knowledge being produced both within research and at all levels of education The second edition of The Oxford Handbook of Interdisciplinarity offers a thorough update of this major reference work summarizing the latest advances within the field of inter and transdisciplinarity The collection is distinguished by its breadth of coverage with chapters written by leading experts from multiple networks and organizations The volume is edited by respected interdisciplinary scholars and supported by a prestigious advisory board to ensure the highest quality and breadth of coverage The Oxford Handbook of Interdisciplinarity provides a synoptic overview of the current state of interdisciplinary research education administration and management and of problem solving knowledge that spans the disciplines and interdisciplinary fields The volume negotiates the space between the academic community and society at large Offering the most broad based account of inter and transdisciplinarity to date its 47 chapters provide a snapshot of the state of knowledge integration as interdisciplinarity approaches its century mark This second edition expands its coverage to discuss the emergence of new fields the increase of interdisciplinary approaches within traditional disciplines and professions new integrative approaches to education and training the widening international presence of interdisciplinarity its increased support in funding agencies and science policy bodies and the formation of several new international associations associated with interdisciplinarity This reference book will be a valuable addition to academic libraries worldwide important reading for members of the sciences social sciences and humanities engaged in interdisciplinary research and education and helpful for administrators and policy makers seeking to improve the use of knowledge in society *What Gardens Mean* Stephanie Ross,1998-05-13 Are gardens works of art Author Stephanie Ross

draws on the history of culture to explore the magical lure of gardens Paying special attention to the amazing landscape gardens of 18th century England and tracing various connections between gardens and the art of painting Ross documents the complex messages gardens can convey 8 color plates 60 b w photos
